Note: The format of the Trust's Annual Report for 2019-20 is in line with the revised Annual reporting guidance in view of the impact of the Covid-19 pandemic. As such this annual report does not include a Performance Analysis section, as has been the case in previous years.

Foreword

Welcome to our Annual Report and Accounts for 2019/20

Staff at East Lancashire Hospitals NHS Trust (ELHT) achieved some amazing things during a year in which the Trust began facing the biggest challenge the NHS has ever seen. The Covid-19 virus dominated the lives of all ELHT staff for the final quarter of this reporting period.

We managed the continuous substantial demand for our services, whilst planning for a predicted significant increase in critically ill Covid-19 positive patients. These plans were then implemented to enable ELHT to provide Safe Personal and Effective Care to our patients.

Perhaps the biggest achievement pre Covid-19 was the completion of our £15m Fairhurst Building at the Burnley General Teaching Hospital site. This new building has provided state of the art facilities for a number of our services such as Ophthalmology and Maxillofacial. On the ground floor, the easy access Outpatients Department provides a total of 21 consulting rooms and a dedicated blood room, an important specialist facility that the previous outpatient facilities did not have. The new Outpatients Department will be of huge benefit to staff and the 58,000 patients who visit each year.

Throughout the year, our staff continued to strive tirelessly to provide both the quality of care and the speed of access to treatment to which we aspire. We are confident that we have done both although the continued increase in patient numbers has at times made it difficult. We are determined to improve our performance to achieve the standards our patients expect. We are encouraged by the terrific results we achieve in the NHS Friends and Family test, with patients overwhelmingly recommending ELHT as a place to receive their care.

After achieving our best ever performance in the NHS Staff Survey for 2018, we continued to do even better this year. The 2019 NHS Staff Survey was completed by a record 46.9 per cent of employees (3,942 respondents in total). This showed that staff at ELHT rate the organisation higher than ever in comparison to working environments at England's other acute hospital and community trusts.

The latest results saw ELHT score higher than the national average for 9 of the survey's 11 key themes. These include health and wellbeing, quality of care, morale, quality of appraisals, safety culture, staff engagement and team working. Staff rated the Trust 'significantly above average' for 93 of the survey's 104 questions, and there were no ratings of 'significantly worse' in any area. From these results there is clear evidence that ELHT is among the best places to work in the NHS for staff morale, team working, safety culture and staff health and wellbeing.

The past 12 months have seen us continue to improve delivery of emergency and urgent care services. This delivery is fully integrated within the local health and care system and meets the needs of the new NHS Long Term Plan. Following the opening of new Ambulatory Emergency Care and Surgical Ambulatory Emergency Care units in the last period, we were delighted to receive funding to build a new £10 million Emergency Care Village at the Royal Blackburn Teaching Hospital. The approval of this further significant investment into purpose-built emergency care facilities is excellent news for patients, staff and the people in East Lancashire. The construction work for this project commenced in summer 2019 and currently remains on schedule to be completed in Winter 2020/21.

ELHT continues to be fully engaged with the Integrated Care Partnerships which are playing a key role in how health and social care services are being transformed. More and more, ELHT works closely with our NHS and local authority partners to meet the needs of our local population with greater co-ordination between providers here in Pennine Lancashire and the wider Lancashire and South Cumbria region.

It is important to remember that even in a publicly funded service such as ours, charitable funding needs to play an important part in our activities. A separate report is available which details our charitable activities and we would like to thank all our supporters who fundraise for our official charity ELHT&Me in so many different ways.

To summarise, this year has seen unprecedented challenges as is the case for many NHS organisations. However, the Trust continues to learn, progress and achieve excellence because of our dedicated staff to whom we are indebted.

Professor Eileen Fairhurst, Chairman
Mr Kevin McGee, Chief Executive Officer

Performance Overview

Introduction and background

East Lancashire Hospitals NHS Trust (ELHT) was established in 2003 and is a large integrated health care organisation providing acute secondary and community healthcare for the people of East Lancashire and Blackburn with Darwen.

Our population includes patients who live in several of the most socially deprived areas of England.

We aim to deliver high quality, high value care and contribute to a health gain for our community. Located in Lancashire in the heart of North West England, with Bolton and Manchester to the South, Preston to the West and the Pennines to the East we have a combined population of approximately 530,000. We employ over 8,000 staff, some of whom are internationally renowned and have won awards for their work and achievements.

We offer care across five hospital sites, and various community locations, using state-of-the-art facilities. In addition, our patients are also offered a range of specialist hospital services which are provided either by the Trust, neighbouring Trusts, with some being delivered in Manchester.

The majority of the Trust's services are funded by NHS East Lancashire and Blackburn with Darwen Clinical Commissioning Groups (CCGs) and NHS England. The Trust continues to work alongside our commissioners and local authorities to deliver the best possible care in the most appropriate locations for the people of East Lancashire.

Our absolute focus on patients as part of our vision 'to be widely recognised for providing safe, personal and effective care' has been demonstrated in the Trust's continued progress and being rated 'Good with areas of outstanding' by the Care Quality Commission (CQC).

The underlying performance position of the Trust has continued its upward path during 2019-20, with steady improvement in the four-hour treatment target measured in the Emergency Department. Further details of our performance against key national, local access and treatment priorities can be found later in this document.

Performance Report

Chief Executive's Statement

Staff at ELHT achieved some amazing things during a year in which the Trust began facing the biggest challenge the NHS has ever seen. The Covid-19 virus dominated the lives of all ELHT staff for the final quarter of this reporting period.

The Trust reported a one per cent financial performance surplus for the 2019-20 financial year, which is in line with the 2019-20 financial plan.

The Trust achieved the majority of its performance targets for the year, with the notable exception being the Accident and Emergency four hour standard.

Our most obvious achievement was the completion of our £15m Fairhurst Building at the Burnley General Teaching Hospital site. This new building has provided state of the art facilities for our Outpatients, Ophthalmology and Maxillofacial services.

However, it's truly in times of adversity that you see teamwork and commitment shine through. Our staff and volunteers worked tirelessly to deal with the operational pressures that we experienced during the last financial year and the Trust remains committed to delivering safe, personal and effective care to every patient every time.

Vision and values

Our vision is to be widely recognised for providing safe, personal and effective care.

We will do this by achieving our objectives to:

- put safety and quality at the heart of everything we do
- invest in and develop our workforce
- work with key stakeholders to develop effective partnerships
- encourage innovation and pathway reform and deliver best practice.

Our objectives are underpinned by our values. We have committed in all our activities and interactions to:

- put patients first
- respect the individual
- act with integrity
- serve the community, and
- promote positive change.

In achieving the objectives our staff observe our operating principles:

- Quality is our organising principle
- We strive to improve quality and increase value
- Clinical leadership influences all our thinking
- Everything is delivered by and through our clinical divisions
- Support departments support patient care
- We deliver what we say we will deliver
- Compliance with standards and targets is a must; this helps secure our independence and influence
- We understand the world we live in, deal with its difficulties and celebrate our successes.

Our staff are committed to delivering against these challenges by continually improving the quality of the services we provide to meet the needs of our local population. Our improvement priorities for the year were to:

- reduce mortality
- avoid unnecessary admissions
- enhance communication and engagement
- deliver reliable care
- ensure timeliness of care.

Our services

2019 saw the formation of a new Division within the Trust – Community and Intermediate Care Services.

The Division has been established to reflect our out of hospital work with partner organisations and our communities alongside the emerging Primary Care Networks to advance our Case Management model which delivers person centred care as close to an individual's home as possible.

Our Integrated Neighbourhood Teams are at the centre of these developments and consist of nursing and therapy staff who are now providing care with GPs, social service colleagues and local voluntary sector organisations. Our Integrated Discharge Service, Intensive Home Support Service, Intermediate Care Allocation Team, Podiatry Service and Specialist Palliative Care Service also form part of the Division.

2019 also saw the further development of our Intensive Home Support Services and Intermediate Care Allocation Team to work with North West Ambulance Service to prevent any avoidance conveyance to the Emergency Department and unnecessary admissions to hospital. In January 2020, these services supported our 5000th patient to return home from hospital on our nationally recognised Home First Service.

We provide a full range of acute hospital and adult community services. We are a specialist centre for Hepatobiliary and Pancreatic Surgery and Interventional Vascular Centre.

Royal Blackburn Hospital provides a full range of hospital services to adults and children. This includes:

- General and specialist medical
- Elective and Emergency Surgery
- Full range of diagnostic (e.g. MRI, CT scanning) and support services
- 11 Operating Theatres including Robotic assisted Surgery
- Urgent Care Centre
- Emergency Department
- 2 cardiac catheterisation laboratories
- 3 endoscopy rooms
- state of the art inpatient facilities
- Centralised outpatients department
- Renal Dialysis services (provided by Lancashire Teaching Hospitals Foundation Trust)

Burnley General Hospital provides a full range of elective hospital services. This includes:

- general, specialist medical and surgical services
- 13 Theatres, 2 Obstetric and 1 procedures room
- full range of diagnostic (e.g. MRI, CT scanning) services
- Urgent Care Centre for minor injuries and illnesses
- The Lancashire Women and Newborn Centre, comprising:
  - Centralised consultant-led maternity unit
  - Level 3 Neonatal Intensive Care Unit
  - Midwife-led birth centre
  - Purpose-built Gynaecology unit
- Lancashire Elective Centre
- 3 endoscopy rooms
- Phase 8 development to include new specialist ophthalmology centre, maxillo-facial department and outpatient facilities
- Specialised Neuro-Rehabilitation
- Renal Dialysis services (provided by Lancashire Teaching Hospitals Foundation Trust)

Accrington Victoria Community Hospital provides inpatient services and a Minor Injuries Unit for the local population. The hospital also has access to dedicated specialist services together with a range of outpatient services.

Many consultants and specialties use this busy facility which allows local people to be seen within their community. Services include:

- Audiology clinics
- Inpatient services
- Minor injuries
- Occupational therapy
- Outpatient services
- Physiotherapy
- Renal services (provided by Lancashire Teaching Hospitals Foundation Trust)
- X-Ray

Clitheroe Community Hospital provides:

- 32-bed inpatient ward on the first floor
- outpatient clinics and other services on the ground floor, including a restaurant for visitors
- inpatient and Rehabilitation services for people 16 years old or over
- outpatient facility sees patients of any age as requested by the consultants

Our **outpatient services** are also provided at a range of local community settings, enabling patients to access care closer to their homes wherever appropriate. The Trust also provides community services such as district nursing and health visiting in patients' homes.

Pendle Community Hospital in Nelson provides:

- Rehabilitation service for people following illness or injury
- Two 24 bed rehabilitation wards
- A 24 bed stroke rehabilitation unit
- East Lancashire Community Stroke Team
- Outpatient services

Trusts Statement on Covid-19 and its Impact upon the Trust

Towards the end of the 2019-20 financial year Trusts across the country were faced with the need to respond to the Covid-19 outbreak. The Trust implemented Incident Command and Control arrangements for the management of the Covid-19 outbreak. A Trust Incident Co-ordination Centre was established and functioned on a 24/7 basis under the leadership of the Director of Integrated Care and Partnerships and Director of Infection Prevention and Control.

Operational Co-ordination Centres were established for all Clinical Divisions and Corporate Directorates and these reported to the Trust's Incident Co-ordination Centre. Nothing in these command and control arrangements impaired the Chief Executive or Deputy Chief Executive from discharging their leadership and direction to the Trust.

The Trust established an Incident Management Team meetings initially held twice daily and subsequently once daily. The Incident Management Team meetings were chaired by the Director of Integrated Care and Partnerships or Director of Operations and consisted of the Incident Co-ordination Centre, one representative of each Operational Co-ordination Centre and a Clinical Commissioning Group representative.

Operational Co-ordination Centres established their meetings to act as a cascade for information and actions from Incident Management Team meetings. Executive oversight was maintained through twice weekly Trust Executive meetings chaired by the Chief Executive or Deputy Chief Executive.

The Trust Executive meetings supported the effective oversight of the incident and provided a space for any other relevant Trust business not related to the Covid-19 outbreak to be conducted and managed.

The control environment to respond to the Covid-19 outbreak is described above. A Trust Covid-19 Bulletin was produced to support effective communication across the Trust. Initially these bulletins were produced twice daily (morning and afternoon/evening) and subsequently once daily. Bulletins were produced by the Communications and Engagement Operational Co-ordination Centre (OCC) and approved and issued in the name of the Director of Integrated Care and Partnerships and Director of Infection Prevention and Control as the Incident Co-ordination Centre Leads.

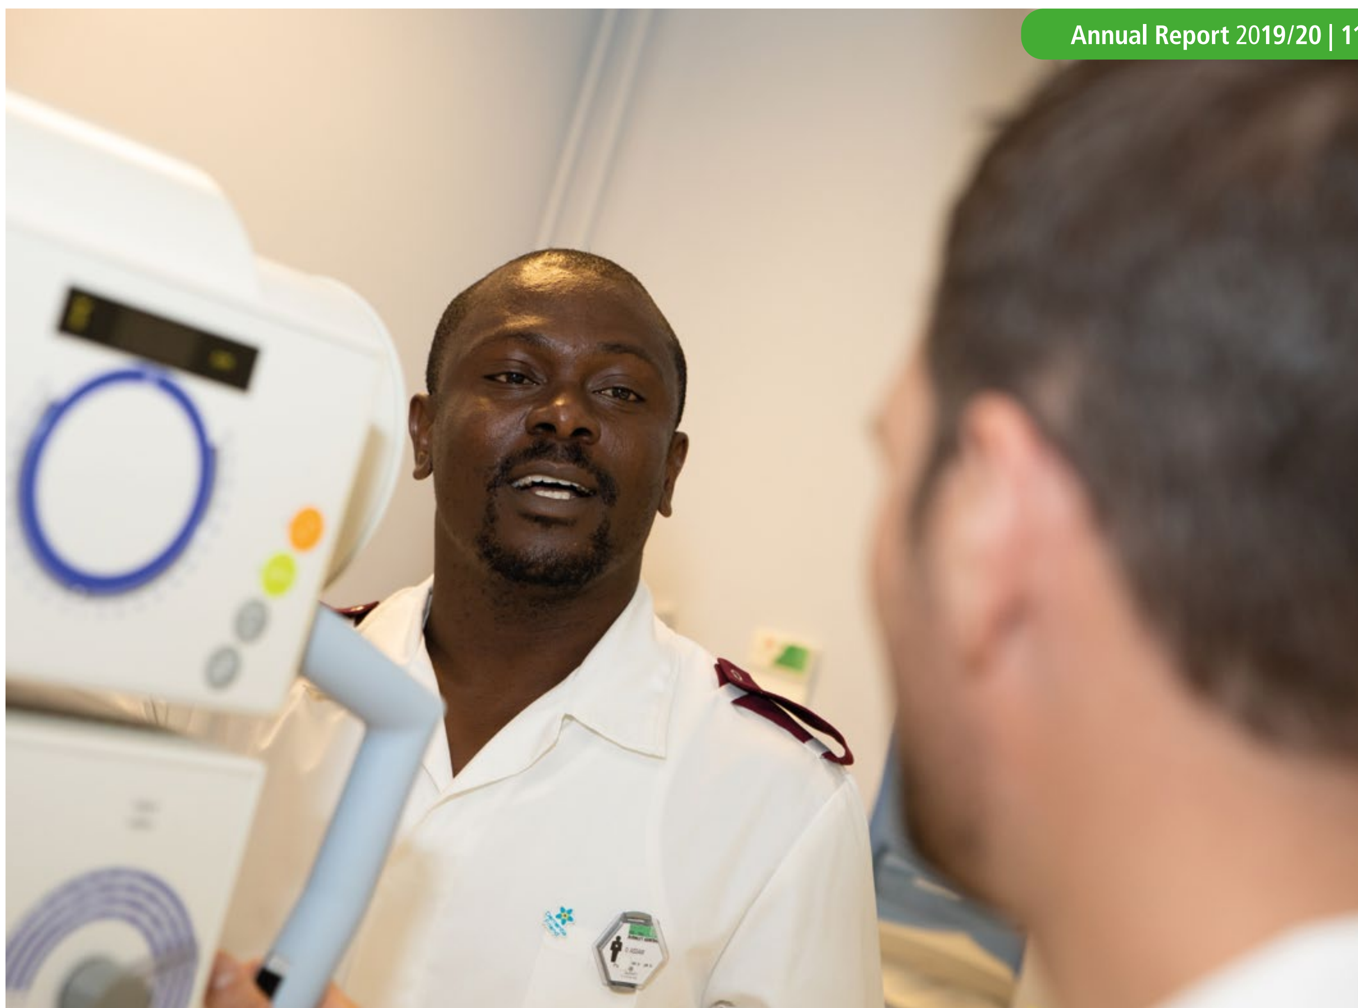
In addition, an information cascade system was also established to ensure all key priority services received a verbal communication of Covid-19 Bulletins. This included:

- Assessment Units (including Ambulatory Pathways, Paediatrics and Maternity)
- Critical Care
- Emergency Medicine
- Medical Handover
- Patient Services
- Theatres

The Operational Co-ordination Centres for the relevant key priority areas were responsible for implementing this verbal cascade system.

Issues potentially affecting business continuity or service disruption were identified through the arrangements described above. Such issues were identified, eliminated or mitigated such that business continuity and/or service provision was maintained, adapted or stopped as necessary.

The Head of Internal Audit's Opinion has not been affected by the Trust's response to the Covid-19 pandemic, nor has the overall review of effectiveness or the control environment by the Chief Executive.



Staff

The Trust is a major local employer and sees itself as an anchor organisation within the local area. We recognise that our ongoing success is due to the hard work, dedication and commitment of all our staff and volunteers and have agreed a new People Strategy to ensure that The Trust can achieve its ambition to be seen as the 'Best Place to Work'. During the course of the year the Trust has worked hard to recruit and retain nursing and medical staff.

Recognising that in order to provide consistent high standards of safe, personal and effective care means high staffing requirements at times of peak demand. The Trust continues to increase our Staff Bank and reduce the cost of agency staff.

As well as ensuring that we have the appropriate workforce numbers, the Trust has worked hard to recognise the importance of employee engagement. Our Trust has an Employee Engagement Strategy which was designed and developed with input from staff across the organisation and a focused staff engagement team is in place.

In addition to the information and data from the national NHS Staff Survey, we conduct more focused surveys to enable staff to feedback confidentially their experience of working for the Trust. We do this regularly and then monitor the actions that have been taken to improve the staff experience at our monthly Employee Engagement Sponsor Group chaired by the Chief Executive.

Employee engagement

At ELHT we believe our employees are our greatest asset, and we all have a part to play in setting and achieving our vision, values and key priorities.

Our people are at the heart of everything that we do, striving for excellence and driving up standards of care. We want our staff to enthuse pride in their service and similarly for our patients and carers to be proud of us as their local health provider.

As an organisation we are committed to improving employee engagement and empowerment. Our strategy led by the Chief Executive and championed by the Director of Human Resources and Organisational Development (HR&OD) has enabled ELHT to drive the organisation forward by highlighting the importance of employee engagement as well as implementing evidence based interventions to enhance it.

We have devised, implemented and embedded a systematic approach to engage and empower our employees through our 10 Enablers of Employee Engagement which has now created an environment whereby our workforce demonstrates high levels of advocacy is truly involved and motivated, working together towards our shared vision of being widely recognised for providing safe personal and effective care.

Finance

Financial duties

The Trust reported a £5.1 million adjusted financial performance surplus for the 2019-20 financial year. The surplus includes a non-recurrent £12.6 million allocation from the Provider Sustainability Fund and Marginal rate emergency tariff (MRET) funding, approved by the Department of Health and Social Care (DHSC) and HM Treasury. This is in line with the 2019-20 financial plan.

The Trust achieved this outturn whilst delivering a £16.4 million Waste Reduction Programme (WRP) improving the way it delivers services. In addition, the Trust achieved all its other financial duties as set out later in this report.

Better Payments Practice Code

Although it is not a financial duty, the Trust met the Better Payment Practice Code target by paying more than 95% of undisputed invoices within 30 days of receipt of the goods or invoice, whichever is the later.

Where our money comes from

In 2019-20, the Trust received income of £567.7 million compared with £512.7 million in the previous year, including £426.8 million for healthcare services provided to people living in East Lancashire and Blackburn with Darwen.

Most of the Trust's income comes from Clinical Commissioning Groups (CCGs) who purchase healthcare on behalf of their local populations. The Trust negotiates an annual contract with the local CCGs for the payment of services.

Where our money goes

From a total revenue spend of £601.1 million in 2019-20, £385.8 million or 64% was spent on staff costs. Throughout the year the Trust employed an average of 7,686 staff and contracted a further average 915 staff.

At £42.1 million, drugs costs were the next highest area of expenditure with the Trust spending a £33.7 million on other clinical supplies and services and a further £16.1 million on clinical negligence 'insurance' premiums.

During the year the Trust's valuer has carried out a full revaluation of the Trust estate, this has resulted in a net impairment charge of £38.9 million.

Capital Expenditure

The Trust has continued to invest in healthcare facilities, including a further £5.0 million on the Fairhurst Building, the new Ophthalmology Department at Burnley General Teaching Hospital, which opened in October 2019 and was funded from Public Dividend Capital (PDC) received from DHSC. An additional £4.5 million of PDC funding has been spent on the new Emergency Care Village at the Royal Blackburn Teaching Hospital site, with further investment of £5.5 million planned in advance of the scheduled opening in December 2020, backed by a further £2.5 million of PDC funding.

In total the Trust invested £22.9 million on new building works, improvements and equipment across all its sites.

Financial Outlook for 2020-21

The financial outlook for the NHS is uncertain due to the Covid-19 pandemic. Prior to pandemic the Trust had submitted a draft annual financial plan of a £36.4 million deficit, which included a Waste Reduction Programme of £17 million. Since the submission of the draft financial plan the planning round has been suspended for the NHS, for the first four months of the financial year NHS England/Improvement have set block contracts with further guidance on the outlook for 2020-21 expected imminently.

Modern Slavery Act 2015 – Annual Statement 2019-20

In accordance with the Modern Slavery Act 2015, East Lancashire Hospitals NHS Trust (ELHT) agreed the final statement regarding the steps it has taken in the financial year 2019-20 to ensure that Modern Slavery i.e. slavery and human trafficking, is not taking place in any part of its own business or any of its supply chains. The full statement can be found on the Trust's website (www.elht.nhs.uk).

Principal activities of the Trust

Our principal activities are to provide:

- elective (planned) operations and care to the local population in hospital and community settings
- non-elective (unplanned emergency or urgent) operations and care to the local population in hospital settings
- diagnostic and therapy services on an outpatient and inpatient basis to the local population in hospital and community settings
- specialist services within a network of regional and national organisations e.g. Level 3 Neonatal services, Interventional Vascular Centre and specialist Hepatobiliary and Pancreatic Centre
- ELHT also provides Robotic Assisted Surgery within Urology, Colorectal and Head and Neck Services
- learning and development opportunities for staff and students
- additional services commissioned where agreement has been reached on service delivery models and price
- support services to deliver the above activity and support the activity of other local health providers where these have been commissioned and agreement has been reached on service delivery models and price.

Lancashire and Cumbria Integrated Care System

Lancashire and South Cumbria experience significant levels of health inequality with an average life expectancy significantly worse than the national average. To help address this, an overarching programme is being developed to help transform health and care services to make them more effective and efficient. In so doing they will become more sustainable. Within Lancashire and South Cumbria there are five health and care economies. ELHT is part of the 'Pennine Lancashire' health and care economy (Pennine Lancashire Integrated Care Partnership). It is recognised that the majority of the required transformation will need to take place in each local health and care economy; however for some services this will be across the whole of Lancashire & South Cumbria.

The transformation or change programme aims to deliver:

- Financial improvement – We estimate there is a recurrent resource gap of over £800 million facing the Lancashire & South Cumbria health and care economy over the next five years (about £250 million in Pennine Lancashire and over £100 million in ELHT). We intend to close this gap by greater standardisation of our clinical processes, reducing waste, by rationalising our estates and continuing to transform our workforce.
- Access standards – With the exception of the four-hour standard, ELHT's performance is robust. In the course of 2019-20 we have continued to modify our acute pathway which has helped to sustain our performance; however we need to improve access to out of hospital services.
- Reducing variability – As a health and care economy, we see variability in services and duplication across a range of health and social care providers. The transformation programme aims to significantly reduce this meaning care is more coordinated and therefore more effective and efficient.

Local health and care system vision

The Pennine Lancashire leadership (ELHT, East Lancashire Clinical Commissioning Group, Blackburn with Darwen Clinical Commissioning Group, Lancashire and South Cumbria Care NHS Foundation Trust, Blackburn with Darwen Council and Lancashire County Council) have worked together to further develop the integrated care partnership. This partnership, or coming together of organisations and the services they provide, works to ensure people in Pennine Lancashire have long and healthy lives but also that when they need extra help and support this is easy to find.

A new model of care has been developed, through engagement and consultation with the public. ELHT will continue as the single largest provider of secondary care services to the community of Pennine Lancashire. Partners continue to work together to develop and implement neighbourhood teams to continue to develop the high quality care that is delivered across the Pennine Lancashire area, including closer and more integrated working with primary care. ELHT also has a significant role to play in preventing people from becoming ill.

The executive team at ELHT are closely involved with the governance arrangements at both the ICS and ICP. From the ICS Partnership Board through to the Care Professionals Board, Digital Health Board and the Finance & Investment Group, ELHT executives are helping to shape and respond to the needs of the Five Year Forward View and new models of care. The work of the Executive extends out to broader leadership roles including for example the following workstreams: Cancer services, Hyper Acute Stroke, Acute services, vulnerable services, collaborative services, pathology reconfiguration and the broader configuration of diagnostics services.

These partnership arrangements aim to secure improved sustainable outcomes for our population. The partnership approach extends between the NHS, Local Authorities, the third sector and patients groups.

Stakeholder Engagement

The Trust's Patient, Carer and Family Experience Strategy 2018 to 2021 sets out how staff, patients, families, carers and stakeholders can all work together to review, develop and improve services. This ensures patients have the best possible experience whilst using our services.

Any patient or carer of a patient is welcome to attend our Public Participation Panel (PPP) to give us their views about the services we provide and work with us to improve them. Set up in 2018, PPP meetings offer the opportunity for independent observers to make a meaningful contribution to the development of Trust services.

A patient story is presented at each public Board meeting. Patients/carers attend in person to relate their experience and identified opportunities for change/improvement direct to the Board. In addition to routine media activity, we work with patients from across the Trust to share their experience of our services. Stories from a purely patient perspective regularly appear in national and local publications.

The good relationships with the local, regional and national media provide an opportunity to publicly share our plans and developments, and celebrate the skill and professionalism of our staff. Our social media accounts are proving an effective and engaging method of two way contact, with the following average reach per week:

- Facebook – 352,559
- Twitter impressions – 126,350
- Instagram impressions – 1,950 (reach of 1,085)

We routinely involve patient representatives in Quality Improvement projects. For example the Frailty Care Pathway project, Electronic Patient Record Project, development of an information booklet for patients, family and carers and the End of Life Steering Group.

Acting on feedback from local MPs, we have developed a light version of our monthly Team Brief which we issue to staff. The MP version includes performance information, areas of development and key messages from the executive board. In addition the MPs have regular meetings with our Chief Executive.

The Trust works closely with Healthwatch Lancashire and Healthwatch Blackburn with Darwen and with the Carers Services for East Lancashire and Blackburn with Darwen. Regular meetings are held between the Trust and these organisations and representatives are invited to take part in quality improvement projects. The Trust is also involved in and contributes to Healthwatch projects; for example the 'The Young Person's Voice' project on the Children's Ward, and the 'Spotlight on Accident & Emergency' project.

Representatives from Healthwatch, the Carers Services and the local CCGs are invited to participate in 'mini' inspections which are carried out on our wards and departments, and Healthwatch representatives take part in the annual Patient-Led Assessments of the Care Environment (PLACE) assessments along with representatives from ELMS (East Lancs Medical Services) and the Patient Voices Group.

The Trust has established partnerships with the University of Central Lancashire (UCLan) and Blackburn, Burnley and Nelson and Colne colleges which help us attract local young people to come and work at the Trust. The Trust will benefit from students and graduates from UCLan's Medical School as well as IT, HR and Finance and other administrative professions.

The Trust works closely with the CCGs to ensure that issues raised by GPs and local healthcare providers via the CCG 'Connect' mailbox, are investigated and responded to.

We are continuously working closely with our NHS partners. For example, in the Pennine Lancashire Together a Healthier Future programme, we are part of:

1. Partnership Leadership Forum
2. Transformation Steering Group
3. Care Professionals Board
4. Finance and Investment Group
5. Joint Cost Improvement/Quality, Innovation, Productivity and Prevention (QIPP) Plans
6. Out of hospital working groups around development of the Integrated Neighbourhood Teams
7. On a wider Lancashire and South Cumbria footprint, we are part of the Integrated Care Partnership Board
8. Provider Board
9. Acute and Specialist work stream
10. Working groups on ICS priorities e.g. Stroke, Urology, Vascular, CAMHS, Head and Neck Cancer, Diagnostics etc.

Principal risks

The Trust has identified and assessed its risk areas and put in place mitigation strategies.

The Board Assurance Framework and Corporate Risk Register are regularly presented to the senior leadership at the Operational Delivery Board and to the Directors at the Trust Board. The five main risks outlined on the Board Assurance Framework during last year were relating to:

1. Transformation and improvement schemes fail to deliver their anticipated benefits, thereby impeding the Trust's ability to deliver safe personal and effective care.
2. Recruitment and workforce planning fail to deliver the Trust objectives
3. Lack of effective engagement within the partnership organisations of the Integrated Care System (ICS) for Lancashire and South Cumbria and the Integrated Care Partnership (ICP) for Pennine Lancashire results in a reduced ability to improve the health and wellbeing of our communities.
4. The Trust fails to achieve a sustainable financial position and appropriate financial risk rating in line with the Single Oversight Framework
5. The Trust fails to earn significant autonomy and maintain a positive reputational standing as a result of failure to fulfil the regulatory requirements defined in the NHS Constitution and relevant legislation.
6. Covid-19: this is a new risk that has been added to the Board Assurance Framework in March 2020 as a result of the global pandemic related to the Covid-19.

Risks 1, 2, 4 and 5 were high and their scoring was above 15 throughout the year. Various actions were undertaken to reduce and mitigate the risks and the detail of those is provided in the Board Assurance Framework which is published as part of the Trust Board Reports. The Annual Governance Statement which follows later in the document describes the risk approach for the Trust and provides details of risk management across the organisation and gives more details about the significant risks that the Trust encountered in the year.

NHS

Accountability Report

a) Corporate Governance Report

i. Statement of the Accountable Officer

Statement of the Chief Executive's Responsibilities as the Accountable Officer of the Trust

The Chief Executive of NHS Improvement, in exercise of power conferred on the NHS Trust Development Authority, has designated that the Chief Executive should be the Accountable Officer of the Trust. The relevant responsibilities of Accountable Officers are set out in the NHS Trust Accountable Officer Memorandum. These include ensuring that:

- there are effective management systems in place to safeguard public funds and assets and assist in the implementation of corporate governance;
- value for money is achieved from the resources available to the Trust;
- the expenditure and income of the Trust has been applied to the purposes intended by Parliament and conform to the authorities which govern them;
- effective and sound financial management systems are in place; and
- annual statutory accounts are prepared in a format directed by the Secretary of State to give a true and fair view of the state of affairs as at the end of the financial year and the income and expenditure, other items of comprehensive income and cash flows for the year.

As far as I am aware, there is no relevant audit information of which the trust's auditors are unaware, and I have taken all the steps that I ought to have taken to make myself aware of any relevant audit information and to establish that the entity's auditors are aware of that information.

To the best of my knowledge and belief, I have properly discharged the responsibilities set out in my letter of appointment as an Accountable Officer.

Signed *(electronically)*:

Kevin McGee, Chief Executive
Date: 1 July 2020

ii. Statement of Directors' Responsibilities

Statement of Directors' Responsibilities in respect of the Accounts

The directors are required under the National Health Service Act 2006 to prepare accounts for each financial year. The Secretary of State, with the approval of HM Treasury, directs that these accounts give a true and fair view of the state of affairs of the trust and of the income and expenditure, other items of comprehensive income and cash flows for the year. In preparing those accounts, the directors are required to:

- apply on a consistent basis accounting policies laid down by the Secretary of State with the approval of the Treasury
- make judgements and estimates which are reasonable and prudent
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the accounts and
- prepare the financial statements on a going concern basis and disclose any material uncertainties over going concern.

The directors are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the trust and to enable them to ensure that the accounts comply with requirements outlined in the above mentioned direction of the Secretary of State. They are also responsible for safeguarding the assets of the trust and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors confirm to the best of their knowledge and belief they have complied with the above requirements in preparing the accounts.

The directors confirm that the annual report and accounts, taken as a whole, is fair, balanced and understandable and provides the information necessary for patients, regulators and stakeholders to assess the NHS trust's performance, business model and strategy

By order of the Board

iii. Annual Governance Statement 2019/20

Scope of responsibility

1. As Accountable Officer and Chief Executive of East Lancashire Hospitals NHS Trust, I have responsibility for maintaining a sound system of internal control that supports the achievement of the Trust's policies, aims and objectives, whilst safeguarding the public funds and departmental assets for which I am personally responsible, in accordance with the responsibilities assigned to me.

   I am also responsible for ensuring that the Trust is administered prudently and economically and that resources are applied efficiently and effectively. I also have responsibility for safeguarding the Trust's quality standards. In carrying out these obligations I and the Trust Board adhere to the NHS Codes of Conduct and Accountability. I also acknowledge my responsibilities as set out in the NHS Trust Accountable Officer Memorandum. These include:

   a) Ensuring that the accounts of the Trust that are presented to the Board for approval are prepared under principles and in a format directed by the Secretary of State with the approval of the Treasury.
   b) Ensuring that the accounts disclose a true and fair view of the Trust's finances
   c) Ensuring that managers at all levels have a clear view of their objectives and the means to assess achievements in relation to those objectives, have well defined responsibilities for making the best use of resources, have the training, information and access to expert advice they need to exercise their responsibilities effectively and are appraised and held to account for the responsibilities assigned to them
   d) Ensuring the Trust achieves value for money from the resources available to it, avoiding waste and extravagance in the Trust's activities
   e) Ensuring the implementation of any recommendations affecting good practice
   f) Ensuring the National Audit Office is provided with information it requests and that the Trust co-operates with external auditors in their enquiries
   g) Ensuring internal audit arrangements comply with the NHS Internal Audit Manual
   h) Ensuring prompt action is taken in response to concerns raised by internal or external audit
   i) Ensuring the Director of Finance properly discharges his responsibilities for the effective and sound financial management and information and that the Trust meets the financial objectives set by the Secretary of State for Health and the assets of the Trust are properly safeguarded
   j) Ensuring that the Codes of Conduct and Accountability are promoted to and observed by staff
   k) Ensuring appropriate advice is tendered to the Board on all matters of financial probity and regularity and all considerations of prudent and economical administration, efficiency and effectiveness
   l) Ensuring that the appropriate action is taken if the Board or Chairman contemplates a course of action which I consider would infringe the requirements of propriety and regularity or adversely affect my responsibility for obtaining value for money from the Trust's resources.

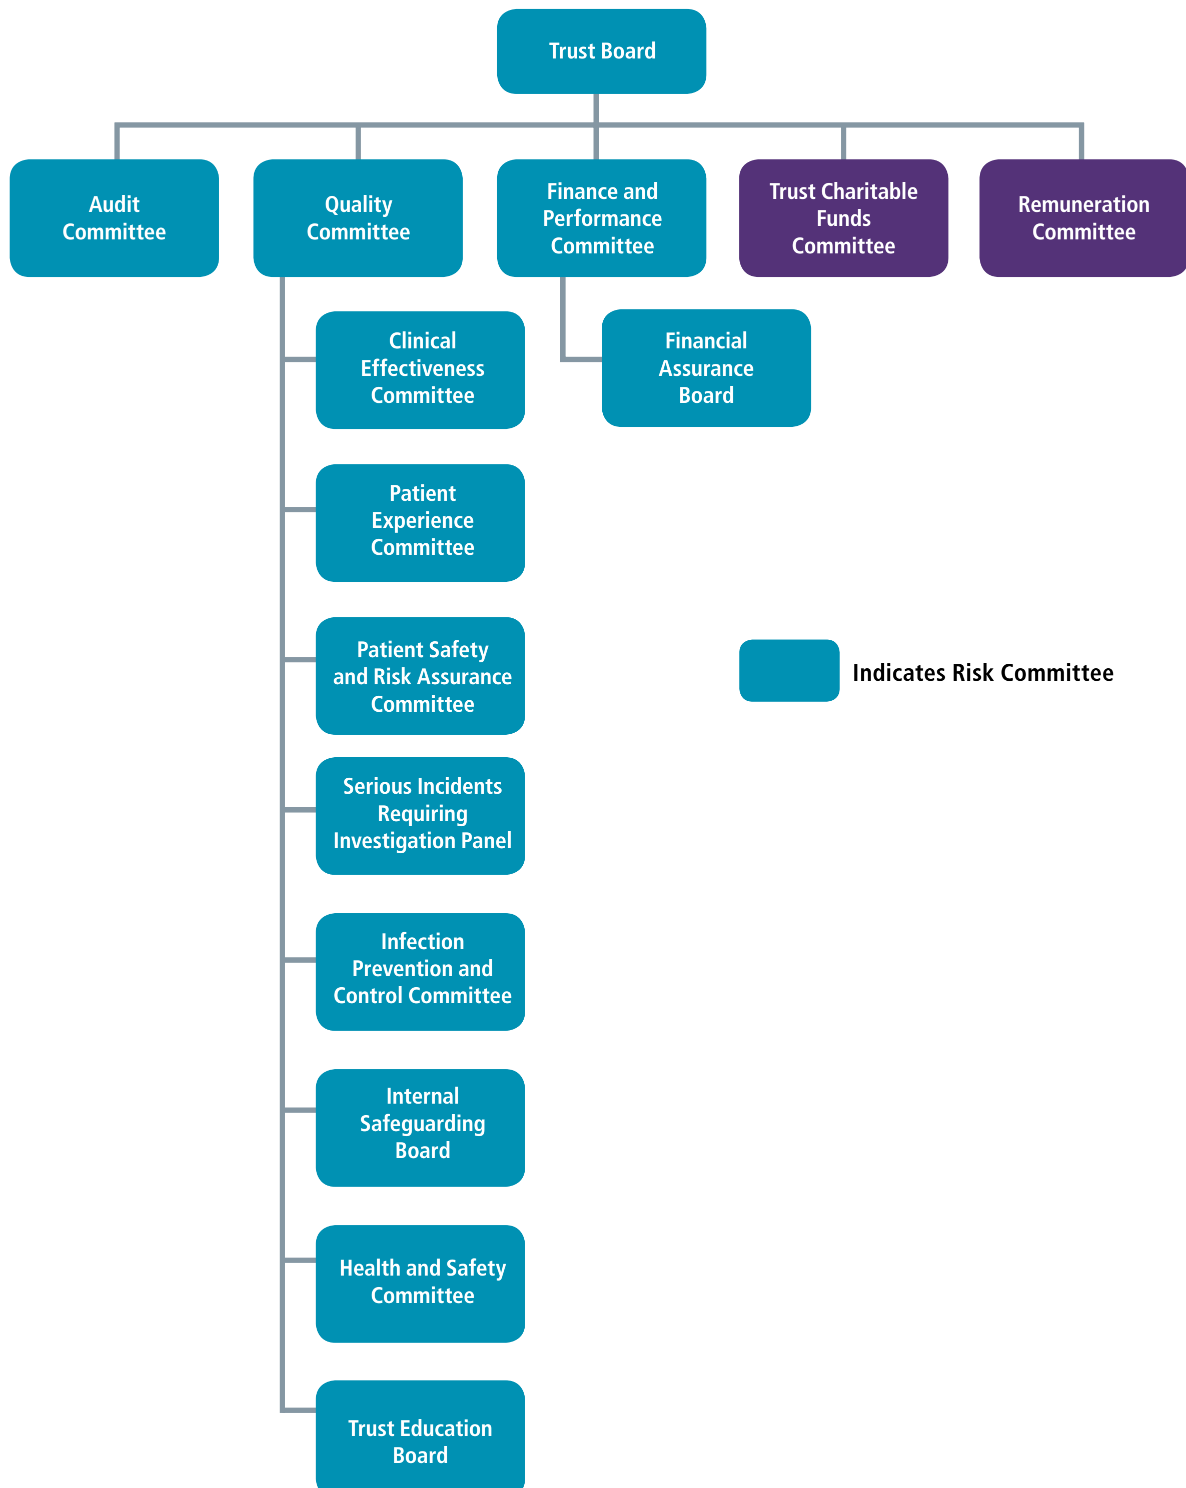
2. As Accountable Officer I have fulfilled these duties by:

   a) Continuing to review and realign the responsibilities of the Executive Directors
   d) Being a member of the Finance and Performance Committee which provides assurance on the delivery of the finance and performance requirements of the organisation
   e) Maintaining the Board focus, through my Chief Executive Report, on actions taken to address any areas of slippage on performance and advise the Board of emergent national and regional priorities
   f) Ensuring there is effective partnership between the Trust and the wider health economy and beyond and establishing processes to ensure that I and the senior management team have effective working relationships with our partner organisations, the Care Quality Commission, local commissioners and social care providers, local and regional education partners, local councils and MPs, other NHS providers including Trusts and GPs and the public. I also chair the system wide Accident and Emergency Delivery Board
   g) Attendance at Chief Executive Forums and other appropriate local, regional and national conferences
   h) Attendance and pro-active participation at the meetings in relation to the Pennine Lancashire Integrated Care Partnership and the Lancashire and South Cumbria Sustainability and Transformation Partnership.

The Governance Framework of the Trust

Board Committee Structure

3. The Trust Board has overall responsibility for setting the strategic direction of the Trust and managing the risks to delivering that strategy. All committees with risk management responsibilities have reporting lines to the Trust Board.



Board and Committee Attendance Records and Scope of Work

4. The Trust Board is responsible for monitoring the overall programme for management of risk across the organisation and its activities and decides the risk appetite of the Trust. The Trust Board sets the strategic direction of the Trust and receives regular reports on the performance of the Trust in meeting its objectives.

5. The Board utilises the Risk Appetite for NHS Organisations matrix to support better risk sensitivity in decision making. The risk appetite of the Board varies between a 'Preference for ultra-safe delivery options that have a low degree of inherent risk' and 'Willing to consider all potential delivery options and choose while also providing an acceptable level of reward (and value for money (VfM))' depending upon the risk area/matter under consideration.

8. The role of the Finance and Performance Committee is to provide assurance on the delivery of the financial plans approved by the Board for the current year, develop forward plans for subsequent financial years for consideration by the Board and examine in detail risks to the achievement of national and local performance and activity standards. It maintains an overview of the financial and performance risks recorded on the Board Assurance Framework.

Board Performance and Effectiveness

9. The Board is committed to continuous improvement and development. The Trust has worked with the Good Governance Institute since 2015 when it carried out an independent review of the Board's performance. A resultant action plan was developed and completed which paid particular attention to the well-led framework as well as other governance matters to ensure the Trust's ongoing improvements in corporate and clinical governance. Part of the work focused on a measurement of the Board against the Good Governance Institute Matrix of Board Maturity and the action plan was developed to promote and evidence evolution of behaviours and processes. During 2019-20 the Board continued to work with the Good Governance Institute and had several strategy sessions discussion the challenges of the evolving health sector landscape and the opportunities for the organisation to continue on its journey of delivering safe, personal and effective care to the population of East Lancashire and indeed the Lancashire and South Cumbria population whilst improving our governance systems and processes and providing increasingly robust assurance.

10. The Trust Board considers the success of each Trust Board meeting in public at the conclusion of the meeting with particular focus on whether Board members have had sufficient focus on aspects such as patient experience, quality, risk and partnership working.

11. The Care Quality Commission (CQC) carried out a Well Led Review of the Trust on the 25 and 26 September 2018. The outcome of the review has resulted in the Trust being awarded an overall rating of 'Good' by the regulator.

12. The Trust has a clear vision, objectives, values, operating principles and improvement priorities. The hospital services are supported by strong governance processes including well managed risk registers and processes feeding into the Trust Board. This ensures a robust overview of the risks within the organisation. There is on-going work to enhance the Board Assurance Framework and risk management in the Trust and this is included in the action plan from the CQC Well Led Review which is regularly monitored through the Quality Committee. The Trust has a Clinical Strategy in place. The Trust Board has undertaken a programme of Board development with an external partner since 2015 and this has elements of both self and external assessment. The Board is committed in its support of continuous learning and professional development; is clear on roles and accountabilities in relation to Board governance and there are clearly defined and understood processes, for escalating and resolving issues and managing performance. The Trust Board ensures that it actively engages with its patients, staff and its shadow governors and other stakeholders as appropriate on quality, operational and financial performance. Reports are taken to the Trust Board at each meeting on matters of performance and through the assurance committees of the Trust.

Highlights of Board Committee Reports

13. The Audit Committee has been active throughout the year in providing assurance on governance, risk management, the control environment and the integrity of the financial statements. Reports have been considered in detail from management representatives where 'limited assurance' opinions have been given by the internal audit service. Audit Committee members assess the strength of assurances received from a number of sources over the course of the year. These sources include but are not limited to:

    a) Internal Audit Reports
    b) External Audit Reports
    c) Anti-Fraud Service Reports
    d) The Quality Committee
    e) The Finance and Performance Committee
    f) External reviews and self-assessments against best practice guidance
    g) External reviews commissioned by the Trust
    h) Stakeholder feedback
    i) Management responses to internal audit reports, providing updates on actions taken to address any recommendations given as a result of audits.
    j) Media reports
    k) Learning from other organisations
    l) Reports from internal service providers.

14. The Trust Board has additionally considered a number of annual reports, including, but not limited to those in relation to Infection Control, Emergency Planning, Winter Planning, Medicines Management, and the recommendations of national reports. The Trust Board has engaged proactively in the development of a five year Clinical Strategy for the Trust and the wider health and social care economy that was approved in April 2016.

15. The Clinical Strategy is subject to regular review. Whilst it's basic tenets remain as relevant today as when first written it has been revised to be more reflective of the integrated system working prevalent within both the Pennine Lancashire Integrated Care Partnership and also the Lancashire and South Cumbria Integrated Care System. It was also reviewed subsequent to the publication of the NHS Long Term Plan to ensure it is coherent with the key recommendations and overall national policy direction.

16. Through this process, initiated through the 2019-20 planning round, we are confident there is a 'golden thread' from the NHS Long Term Plan, the Pennine Plan, ELHT's Clinical Strategy, the corporate Operational Plan and the individual Clinical Divisional and Directorate plans. Such plans have been shared with partners and there are some tangible areas of service development that have improved services to patients e.g the development of Same Day Emergency Care, more integrated working with Neighbourhood Teams and General Practice.

Quality Governance

17. The Trust is committed to the continuous improvement of the quality of care given to local people and, in so doing, achieving our organisational aim 'to be widely recognised for providing safe, personal and effective care'. All Executive Directors have responsibility for Quality Governance across their particular spheres of activity and the Executive Medical Director is the delegated lead for Quality on the Board overall.

18. Quality monitoring occurs through our Clinical Governance structure, reporting to the Board via the Quality Committee. The Quality Committee is informed by the Patient Safety and Risk Assurance Sub-Committee, Serious Incidents Requiring Investigation Panel, Clinical Effectiveness Sub-Committee, Patient Experience Group Sub-Committee, Health and Safety Committee, Internal Safeguarding Board and Infection Prevention and Control Sub-Committee. Divisional Directors or their agreed deputies attend and report at these committees. Reporting in Divisions replicates this corporate structure to ensure consistent reporting from 'floor to Board'.

Safe

Incident Management

19. The Trust has robust systems to manage and learn from incidents. The Board receives a regular written report on serious incidents requiring investigation at each meeting held in public where new incidents are reported and an update is given in relation to the progress of the management of incidents, including Duty of Candour and a section on what lessons have been learnt as a consequence of the incident investigation process and how the lessons have been translated to deliver improvements in the quality and safety of services.

20. The Trust also has a Serious Incident Requiring Investigation (SIRI) Panel which is supported by a Non-Executive Director. The Panel reviews the investigations undertaken as a result of never events and serious incidents to ensure that a thorough review is completed, the Duty of Candour is observed and that learning from incidents is circulated appropriately across the organisation. The Panel has senior representatives from local commissioning organisations and provides assurance to the Quality Committee on the matters within the remit of its Terms of Reference.

21. Incidents are reported in accordance with the NHS England Serious Incident Framework (SIF) and no significant control issues have been identified as a result of the incidents investigated during the course of the year.

22. Never Events are also managed in accordance with the SIF, reported via StEIS and investigated and validated in partnership with our Commissioners, East Lancashire CCG.

Risk Management Strategy, Policy and Plan

23. The Trust's Risk Management Strategy currently shows inspiration from the AS/NZS Risk Management Standards ISO 31000:2009 including ISO 31000:2018 and best practice in robustly crafting and articulating its risk management framework, escalation and governance arrangements from `Ward to Board`. The Trust will be revising its risk management plan during 2020/21. New processes have been implemented following an Internal Audit in early 2019 and improvements have been made to the overall approach and monitoring of risk management during 2019-20.

24. The Trust is committed to implementing a structured, standardised, systematic, integrated, comprehensive, performance-based and whole-system approach to managing both operational and strategic risks. The Trust's risk management process which includes establishing the context, risk identification, assessment, prioritisation, monitoring and review is:

    a) Based on best available information e.g. data.
    b) Systematic, consistent, timely and underpinned by a structured enterprise-wide approach that seeks to contribute to efficiency and reliable results.
    c) Transparent and inclusive and involves appropriate stakeholders at all levels of the organisation.
    d) Enhanced training delivered digitally and face to face throughout the trust.
    e) Dynamic, iterative and responsive to change.
    f) Capable of continual improvement and enhancement in patient care and safety.
    g) Wrapped around the values of the Trust – Value-based Risk Management.
    h) Focused on encouraging staff to continuously scan the horizon for emerging risks and to ensure appropriate mitigations are in place.
    i) Driven by the need to develop and strengthen staff capacity and capability in risk management through education and training.

j) Underpinned by a succinct Risk Management Strategy which is available on the Trust's intranet system for staff to access, explore and utilise.

25. The Trust uses Equality Impact Assessments as part of its policy development and ratification process. Policies are assessed against the equality standards and are integrated into the process through the Trust's Policy Council.

26. Sharing the learning through risk related issues, incidents, complaints and claims is an essential component to maintaining the risk management culture within the Trust. In order to complement learning, the Trust also places emphasis on training and developing staff capacity and capability in risk management underpinned by the use of clearly articulated descriptors for likelihood and consequence as well as the use of the 5X5 matrix. These have not only enabled engagement and consistency but have established a common currency, framework and methodology for the assessment of all types of risk. Learning is shared in a wide variety of ways at departmental, divisional and corporate levels through a number of face to face meetings and bulletins and the publication of the Trust's Share to Care newsletters. Learning is acquired from a variety of sources including:

    a) Analysis of incidents, complaints and claims and identification of trends with appropriate mitigating actions
    b) External inspections
    c) Internal and external audit reports
    d) Clinical audits
    e) Outcome of investigations and inspections relating to other organisations
    f) Quality Improvement Programmes

Personal

Learning from Complaints and Patient Experience

26. The Trust has made significant organisational, cultural, and behavioural changes to achieve its 'Good' CQC rating in 2019. One aspect to the achievement has been the Trust's improvements in responding to patient and family's concerns and complaints; through strengthening the communication with complainants and providing rigorous investigations that understand the causes of the dissatisfaction. As stated within this document, complaints and the learning from there are closely aligned to incident reporting and Quality Improvement, so not only the individual and area will learn from identified issues, but the organisation as a whole. Key to the Trust's approach is to keep the patient central to the process.

27. Patient Experience is pivotal in all aspects of how the Trust deliver patient care, and to the wider support of their families; with the Patient Experience team supporting staff to enhance all parts of their interactions with patients. The Patient Experience team gather, share and utilise patient experience metrics collated from sources such as Friends and Family Test, national surveys regarding Inpatient, Maternity and Children and Young People. They are also involved in analysing local surveys, where patients and carers have given their views; helping staff to interpret the information into genuine service improvements.

28. Complementing the above work has been the establishment of the Trust's Patient Participation Panel, which consists of members of the public providing a critical friend role to the Trust, through examining and being involved in service delivery and improvement work. We now have the foundation and opportunity to consider with our patients where the Trust wants to go from here in providing experience excellence.

Effective

Clinical Effectiveness

29. The Trust has a Clinical Effectiveness Team which reports regularly to the Clinical Effectiveness Committee, which is a sub-committee of the Quality Committee via assurance reports which measure the quality and safety of care against national best practice indicators. Having identified areas for improvement, the Quality Improvement team supports clinical teams in the implementation of improvement and action plans and measuring the effectiveness of tests of change on an on-going basis. A summary of the work of the Clinical Audit and Effectiveness Department is reported to the Quality Committee.

Quality Improvement

30. In order to support the delivery of safe, personal and effective care the Trust has a robust process for the identification and agreement of key quality priorities. Those that require quality improvement are consolidated into our Quality Improvement Plan including Harms Reduction Programme, Clinical Effectiveness (reliability) and Patient Experience, and monitored for progress through this structure.

31. Our Quality Improvement methodology is the 7 Steps to Safe Personal Effective Care. The 7 steps are noted to be: define the project aims, discover (Project Set Up); measure, investigate opinions (Diagnostic Phase), test out the change, implement change (intervention and impact phase) and celebrate, spread and sustain (Sustain and spread phase). This is based on the Model for Improvement and also incorporates Lean and other tools. For large multi-team improvements we

run Breakthrough Series Collaboratives. The Quality Improvement Team has strengthened its partnership working with the wider Improvement Programme Office to ensure governance priorities are supported and aligned with the implementation of the Vital Signs programme.

32. We have strengthened our quality improvement team of facilitators and analyst as part of the Quality and Safety Unit, linking with the Quality Committee structure. A staff development programme in quality improvement skills is in place both internally and through our membership of Advancing Quality Alliance (AQuA). Professionals in training are supported to develop and participate in quality improvement projects, and support for projects is agreed at the Quality Improvement Projects Triage group.

33. Our Harm Reduction Programme now has a standardised approach to identifying high risk areas through review of incident reports and proactive identification of risk. Once identified, a number of different tools are used to drive improvement. Specific notable areas of improvement include falls, deteriorating patient, sepsis, medication errors and still births through a collaborative approach, and the reduction of medication safety incidents.

34. The Trust has adopted the Care Quality Commission methodology of assessment to use on a regular basis to understand how quality governance arrangements are working across all spheres of activity by undertaking mini assessments. Regular meetings with the Care Quality Commission enhance a wider understanding of our progress and ensure we are able to access learning from other organisations. The Trust was last inspected by the Care Quality Commission in August/September 2018. The outcome of the inspection was that the Trust was awarded an overall rating of 'good' with some areas of Outstanding.

35. The Trust produces a regular Share to Care magazine based on sharing the learning and improvement work that has been initiated within the organisation following the identification of challenges, serious incidents and/or common themes. The trust's Human Factors Share to Care publication won a Gold award for Best Publication, from the Chartered Institute of Public Relations in 2019.

Data Quality

36. The Trust has a Data Quality Group which reports to the Trust Contracting and Data Quality Group. The group reviews the Secondary Uses Service data quality dashboards and the Dr Foster data quality summary dashboard. We have an online report for key data quality risks which has named leads for each data quality risk and an overall data quality log including risk scoring.

37. We work closely with the local Clinical Commissioning Groups and Commissioning Support Unit including a monthly Contract Performance and Delivery Group where we discuss data quality issues and monitoring of the data quality plan.

38. East Lancashire Hospitals NHS Trust submitted records during 2019-20 to the Secondary Uses Service for inclusion in the Hospital Episode Statistics which are included in the latest published data.

39. The Trust undertakes a weekly review at specialty level of all patients which includes Quality and accuracy of elective waiting time data.

Discharge of Statutory Functions

40. As Accountable Officer my enquiries have confirmed that there are arrangements in place for the discharge of statutory functions and that the arrangements have been checked for irregularities and they are legally compliant. The Trust has taken action to ensure that the estate is statutorily compliant and that compliance processes are audited and monitored through the Estates and Facilities Quality and Safety Board and Trust Quality Committee. The Trust has confirmed compliance with Emergency Planning, Resilience and Response (EPRR) requirements in line with the Civil Contingencies Act 2004 and has substantial compliance with the associated EPRR standards.

The purpose of the system of internal control

41. The system of internal control is designed to manage risk to a reasonable level rather than to eliminate all risk of failure to achieve policies, aims and objectives. It can therefore only provide reasonable and not absolute assurance of effectiveness. The system of internal control is based on an on-going process designed to identify and prioritise the risks to the achievement of the policies, aims and objectives of East Lancashire Hospitals NHS Trust; to evaluate the likelihood of those risks being realised and the impact should they be realised; and to manage them efficiently, effectively and economically.

42. In addition to a system of internal controls, a performance management approach compromising two KPIs (compliance and maturity) is also used in undertaking a health check of the Trust`s risk management culture. There is sufficient energy and momentum across the Trust in effectively minimising and managing risks by strengthening and developing integrated and agile risk management systems and processes which are wrapped around appropriate governance, scrutiny, assurance and oversight. Datix is the principal risk management system while risk registers are used as repositories for risks. As a general principle, the Trust will seek to eliminate or effectively

control all risks to patients, staff, and other stakeholders including those which pose a threat to its reputation.

43. The system of internal control has been in place in East Lancashire Hospitals NHS Trust for the year ended 31 March 2020 and up to the date of approval of the annual report and accounts.

Capacity to handle risk

44. All members of the Trust Board have signed up to the Trust Risk Management and Governance plans which clearly identify the Board's responsibilities and accountability arrangements. These are reflected in the Trust's Standing Orders and Standing Financial Instructions, the Scheme of Reservation and Delegation and the Trust's Performance Accountability Framework. These are, in turn, repeated in the internal guidance and policies of the organisation.

45. Scrutiny by the Trust's Non-Executive Directors and internal and external auditors provide assurance on the systems and operation of the processes for internal control across the whole of the Trust's activities including probity in the application of public funds and in the conduct of the Trust's responsibilities to internal and external stakeholders.

46. In addition to the Committees outlined in the diagram earlier in this document which have Non-Executive Director membership, the Trust also has the Operational Delivery Board. The function of this committee is: to provide a forum by which the senior staff in the organisation can assist in the development of strategies to present to the Board; monitor operational delivery against the Trust's strategic objectives and policies; advise the Board on the emerging risks to operational and strategic objectives; and the mitigation plans being deployed to ensure the delivery of safe, personal and effective care.

47. The Trust risk management process clearly identifies a score-based system in allocating responsibility for reviewing and scrutinising risks to specific committees and individuals. Directorate and Divisional risk registers are reviewed and discussed at appropriate directorate and divisional meetings. The Corporate Risk Register, the Trust-wide Risk Register and Board Assurance Framework are also sighted at appropriate meetings which include Risk Assurance Meeting, Patient Safety and Risk Assurance Committee, Quality Committee, Operational Delivery Board and the Trust Board. Risk register reports reviewed and scrutinised at the above meetings provide assurance as well as consistently confirm the Trust's attachment to the robust scrutiny, governance and oversight of our risk management culture. Whilst risks scoring 1-8 and 9-12 are managed at Directorate and Divisional levels respectively, those scoring 15 and above are escalated by the Divisions for consideration by the Risk Assurance Meeting for inclusion onto the Trust Corporate Risk Register although ownership is still locally owned and led. The Corporate Risk Register and the Board Assurance Framework are linked as they feed-off and inform each other.

48. The Board has in place established risk management groups and supporting governance structures that together are responsible for identifying, assessing, managing and reporting the risks associated with clinical, corporate, financial and information governance. The Medical Director has the lead responsibility for the risk management processes including the development and implementation of the Board Assurance Framework, Risk Management Strategy Policy and Plan and associated learning and development to ensure all staff are appropriately trained and supported thereby ensuring our risk management processes are thoroughly embedded across the organisation.

49. The Medical Director is supported by the members of the Executive Team in providing leadership to the risk management process. Executive Directors are lead directors for the strategic risks on the Board Assurance Framework. In this way the senior leaders in the organisation have an operational and strategic oversight of the key risks to achieving the Trust's strategic objectives. Each area of risk is mapped to the Care Quality Commission's Core Outcomes and risks contained in the Corporate Risk Register. The Trust Board receives a regular update on recommended changes to the Board Assurance Framework taking into account the progress of mitigation plans, positive assurances received since the last report to the Trust Board, and gaps in assurance identified in the period. In addition, two of the Sub-Committees of the Trust Board (Quality Committee and Finance and Performance Committee) continue to undertake deep-dives of the risks on the Board Assurance Framework (BAF). Work is continuing on refining the Board Assurance Framework and the Corporate Risk Register. This work is described in the CQC action plan following the last inspection and the plan is regularly monitored

50. The Executive Medical Director, as Responsible Officer, reports directly to the Chief Executive Officer. The Executive Medical Director has oversight of the systems and processes to ensure there is strong clinical education across the whole of the organisation, that medical revalidation arrangements are robust and effective and that the professional standards required of our medical staff are met, addressing any shortcomings effectively within the guidance issued by the General Medical Council. The Caldicott Guardian, who reports to the Executive Medical Director, is the senior person

responsible for protecting the confidentiality of patient and service-user information and enabling appropriate information-sharing.

51. The Executive Director of Nursing provides professional leadership to nursing and midwifery staff within the organisation and provides senior leadership along with the Executive Medical Director, to the organisation in relation to patient safety and quality of service delivery. She is supported by the Deputy Director of Nursing and Divisional Directors of Nursing within the clinical divisions, who ensure there is a continuing focus on the delivery of safe, personal and effective care. As a senior leadership team they ensure that there are sufficient appropriately qualified nursing and midwifery staff deployed on a daily basis to meet the levels of capacity and acuity and to meet safe staffing requirements.

52. The Executive Director of Finance is accountable to the Trust Board and Chief Executive for the Trust's financial risk management activities. They are responsible for ensuring that the Trust carries out its business of providing healthcare within sound Financial Governance arrangements that are controlled and monitored through robust audit and accounting mechanisms that are open to public scrutiny on an annual basis. She also has delegated responsibility for 'Registration Authority'. The Executive Director of Finance is the Board lead for Information Security and the Senior Information Risk Officer (SIRO).

53. The Directors of Operations are responsible for the overall management of all patient services, ensuring that all key access targets are met. They are the Accountable Emergency Officers under the 2004 Civil Contingencies Act. The Trust Lead for Emergency Preparedness, Resilience & Response is one of the Directors of Operations. The Trust also has a nominated Non-Executive Director with oversight of EPRR within their specific duties.

54. The Executive Director of HR and OD is responsible for the management of risks within his areas of operational responsibility, especially those risks associated with sickness absence, bullying and harassment. He is responsible for ensuring provision of employment services across the Trust and ensuring that there is a systematic approach to managing the risks of employment checks and professional clinical registration.

55. Each clinical division is further supported by Quality and Safety Leads working with the divisions and reporting to the Associate Director of Quality and Safety.

56. The Trust supports the whole workforce to ensure they are appropriately trained and equipped to manage risk relevant to their role and requirements.

57. All staff are required to complete Core Skills Training (CST) and any essential to role training identified by their line manager. All managers have access to live CST compliance reports via the Learning Hub. Staff and their managers will receive 90, 60 and 30 day reminders of any CST due, enabling them to schedule this in.

58. As part of the Appraisal process all staff have the opportunity to contribute to their development via the Learning and Development Journey and are able to further support their personal and professional development using the e-portfolio area of the Learning Hub.

59. The Agency Group meets monthly to review the detail and identify appropriate actions to ensure maximum use and productivity of our workforce. These groups report into the Executive Oversight Committee that meets monthly to review agency spend and receive assurance that risks and hotspot areas are being addressed in order to reduce agency spend in line with the target set by NHS Improvement. There are multiple workstreams which underpin our programme to reduce agency spend and ensure the most effective use of our resources.

The Risk and Control framework

60. The main thrust of the Trust Risk Management Strategy is to support the development of an organisation-wide and integrated risk management culture that not only embeds an awareness of safety and risk alertness across all levels of the Trust but empowers staff to frequently scan the horizon for emerging risks. This is also underpinned by an enterprise-wide and consistent approach which includes appropriate ranking, grading, prioritisation, management, escalation and governance of risks in accordance with best practices and the Good Governance Framework. This equally ensures that both operational and strategic risks are consistently managed and mitigated to acceptable or tolerable levels. Significant residual risks are openly accepted, monitored and managed by systematically addressing any gaps in control via action plans while reducing their potential impact to both individuals and the organisation as far as reasonably practicable. Analysis of the severity and likelihood of risks determines their overall ratings, level of management and governance.

    The overarching performance management framework for risk management within the organisation endeavours to ensure that there are appropriate controls in place to mitigate and manage any risks to the delivery of key performance targets. National priorities highlighted either by NHS Improvement, NHS England or the Care Quality Commission are systematically reported to the Trust Board while risks to the achievement of strategic objectives are monitored through the Board Assurance Framework.

61. The objective of the Risk Management Strategy is to support the development of a culture that not only embeds an awareness of safety and risk across all levels of the organisation, but ensures the application of a consistent approach to a risk management process, thus allowing risks to be ranked and graded in order that they may be prioritised. This minimises and mitigates risk to acceptable levels. Where significant risks remain, we can openly accept and monitor those risks, systematically addressing any gaps in control measures and reducing their impact to both individuals and the organisation so far as reasonably practicable.

62. The identification of risk to the organisation achieving its objectives is undertaken by staff at all levels of the organisation. The Trust focuses on a proactive identification of risks although staff may also identify risks reactively from the following internal and external sources:

    a) Non Clinical Risk Assessments
    b) Incident reports, Deep Dives, Internal Reviews, Walkabouts etc.
    c) Complaints / Patient Experience or Claims Audits and work place surveys
    d) Clinical risk assessments
    e) Patient satisfaction surveys
    f) External/Internal Audits, Coroner Reports, External Visits,
    g) Regulatory Agency notices (e.g. CQC Reports, Safety Notices e.g. MHRA)
    h) National Enquiry Reports, Benchmarking and Key Performance Indicators.
    i) Financial

63. An acceptable risk is one which the Trust Board or the Operational Delivery Board and the Divisions are prepared to accept provided that acceptable mitigation is put in place to address any negative impacts to the achievement of its objectives. Once a risk has been accepted, staff choose from a range of tools often referred as the 4Ts (Treat, Tolerate, Terminate and Transfer) as to how best to effectively control and mitigate the risk. Risk treatment is closely linked to prioritisation which is underpinned by available information and sound judgements. Deciding what is an acceptable risk involves identifying and assessing risks in relation to the impact. A risk is deemed acceptable when there are adequate control mechanisms in place and the risk has been mitigated and managed, as far as is considered to be reasonably practicable.

64. As a general principle the Trust will seek to eliminate or control all risk which has a potential to harm its

patients, staff, and other stakeholders, which would result in loss of public confidence in the Trust and/or its partner agencies and/or would prevent the Trust from carrying out its functions on behalf of its local residents. However, the following list identifies areas which would never be deemed to be acceptable:

65. Any act, decision or statement which;

    a) would result in death
    b) would contravene Trust Standing Orders or Standing Financial Instructions
    c) would be illegal and/or breach of legislation
    d) would result in significant loss of Trust assets or resources
    e) would constitute wilful contravention of Trust policies or procedures
    f) would fail to observe key targets and objectives

66. The risk grading system in use is adapted from the National Patient Safety Agency 'Risk Matrix for Risk Managers' and uses a scoring mechanism of a 5x5 grid approach to grade risks in respect of consequence and likelihood. The Trust uses DATIX to record incidents and risks and access to this system is via the Trust intranet, a web based package and an application for mobile users.

67. Each entry onto the DATIX system is allocated a manager to review and action the risk and monitor the effectiveness of the risk mitigation plan. Low and moderate risks (those scoring 1-8) are managed at a local level by wards and teams and the department manager using appropriate controls. These are recorded on the local risk register. Significant risks (those scoring 9-12) are managed at a divisional level with assurance being sought through divisional structures and recorded on divisional risk registers. Extreme risks scoring 15 or above escalated by the Divisions, are presented at the Risk Assurance Meeting for approval for inclusion onto the Corporate Risk Register. The Trust has clear risk governance arrangements in place which offer the platform for risks to be discussed, challenged, reviewed, scrutinised, approved and where necessary the score of the risk including title and description may be modified. These mechanisms leverage the opportunity for informed scrutiny, accountability and oversight in line with the Principles of Good Governance. Risks included on the corporate risk register are monitored via the Operational Delivery Board, Quality Committee and the Trust Board.

68. Directorate and Divisional risk registers are reviewed and discussed at Directorate and Divisional Quality & Safety Meetings and the Divisional Management Board respectively in line with the Trust Risk Management Strategy. The Trust-wide Risk Register and the Corporate Risk Register are both regularly reviewed, scrutinised and monitored at the Risk Assurance Meeting with the latter presented to other sub-committees of the Board as articulated above. The Trust focuses on ensuring that risks are locally led, owned and managed, thereby prioritising local ownership and engagement as tools for effective risk management and embedding an effective risk awareness culture across the organisation. It is everyone's responsibility from 'ward to board' to actively manage risks However, it is the responsibility of the risk lead/handler to regularly refresh and update them as well as ensuring that appropriate actions are in place to mitigate them. Therefore effective governance sits with the appropriate committee as stated in the Trust Risk Management Strategy.

69. The Trusts key strategic risks in 2019-20 were:

    a) Transformation and improvement schemes fail to deliver their anticipated benefits, thereby impeding the Trust's ability to deliver safe personal and effective care.
    b) Recruitment and workforce planning fail to deliver the Trust objectives
    c) Lack of effective engagement within the partnership organisations of the Integrated Care System (ICS) for Lancashire and South Cumbria and the Integrated Care Partnership (ICP) for Pennine Lancashire results in a reduced ability to improve the health and wellbeing of our communities.
    d) The Trust fails to achieve a sustainable financial position and appropriate financial risk rating in line with the Single Oversight Framework
    e) The Trust fails to earn significant autonomy and maintain a positive reputational standing as a result of failure to fulfil the regulatory requirements defined in the NHS Constitution and relevant legislation.
    f) Covid-19: this is a new risk that has been added to the Board Assurance Framework in March 2020 as a result of the global pandemic related to the Covid-19.

70. The consistently high scoring risks in 2019-20 related to risks 'b' and 'd' above. As a result of the gaps in assurance for these particular risks the Finance and Performance Committee and Quality Committee agendas were structured to specifically focus on these elements. Summary reports from the Committees were provided to the Trust Board covering each of these elements to ensure that the Trust Board, both through the Board Assurance Framework, and the reports of sub-committees were continually sighted on the risks and the actions being taken to mitigate them and the positive assurances being received in a timely manner.

71. The Trust tests for gaps in assurance via the following actions:

    a) Independent assurance provided to or requested by the Audit Committee from internal and external auditors

    b) Independent assurance provided to the Quality Committee and supporting subcommittees from external reviews, inspections and assessments and monitoring of subsequent action plans to address any gaps identified

    c) Review by internal departments such as the Quality and Safety Unit with Clinical Effectiveness, Clinical Audit and Divisional teams and Directorates reporting to Board sub-committees and the Operational Delivery Board

    d) Rapid responsive reviews of areas of clinical practice in response to incidents, complaints and concerns whether these are raised internally by staff or externally by stakeholders such as Coroners and Commissioners.

72. A range of other actions designed to address identified gaps in controls and assurances have been implemented throughout the year including:

    a) Deteriorating Patients: Implementation of a Trust-wide approach to improve the recognition and the response to the deteriorating patients

    b) End of life care: Optimise learning from complaints to improve end of life care

    c) Hand Hygiene: Increase compliance with hand hygiene and infection prevention guidance through 'Prompt to Protect' improvement package

73. Risk management is embedded in the activity of the organisation and the Trust has continued to take significant steps to encourage incident reporting. The Trust has signed up to and promotes the 'Speak Out Safely' campaign to encourage an open culture both of raising concerns and learning from them across the organisation. The Trust uses safety huddles across all clinical areas and Share to Care meetings where staff meet on a weekly basis to share good practice and

learn from areas of improvement identified in their own practice and from other services across the organisation.

74. The Trust seeks to actively engage with a wide variety of stakeholders including the Shadow Governors and Trust members to consult and communicate with them on issues of mutual concern. The Trust recognises that there are significant benefits to be gained from this engagement. The Trust also proactively engages with statutory and other stakeholders on a regular basis including staff, Healthwatch, Clinical Commissioning Groups, Local Overview and Scrutiny Committees and local education providers. The Trust has held regular stakeholder events throughout the year and invited stakeholders to meet with the senior leadership teams to ensure transparency of decision making processes and appropriate consultation takes place.

Workforce Strategies

75. The Trust's workforce strategy is cognisant of the aims of the NHS Long Term Plan and the recommendations from 'Developing Workforce Safeguards' by ensuring that the Trust maintains safe staffing levels and effectively deploys its workforce.

76. The Trust has a divisionally owned, multi-disciplinary annual workforce plan which is developed through the Business Planning process, and triangulates these plans with our Clinical Strategy, Safely Releasing Costs Programme, key service developments, guidance from bodies such as the Royal Colleges and incorporates the outputs of the annual professional judgement reviews in respect of registered and non-registered nurse and midwifery staffing in line with the guidance from the National Quality Board (NQB) to ensure that we deploy the right staff with the right skills at the right place and time.

    The Trust Board has oversight of the workforce plan which is signed off annually by the Chief Executive and executive leaders. The Finance and Performance Committee acts as an assurance committee of the Board and receives regular reports detailing workforce related metrics, including matters relating to embedding the recommendations of the Developing Workforce Safeguards report. In addition to the annual workforce planning cycle, the workforce plan is a dynamic plan which is reviewed as and when required as a consequence of changing service need which is identified on an on-going basis through the business case process.

77. To ensure that the Trust effectively deploys its workforce, we have developed detailed action plans in respect of minimizing the need for agency usage and increasing our eRostering levels of attainment and oversight of this is held at Executive level through the Agency Group meetings that reports into the Finance and Performance Committee through the regular workforce report. The Trust has also embedded an electronic job planning process which provides evidence of available clinical capacity across the seven day working week and assurance is provided through the Integrated Performance Report which is considered by the Finance and Performance Committee on an exception basis and by the Board bi-monthly.

78. The Trust continues to consider the use of emerging roles in its future workforce through the use of evidence based tools and data, adopting the Health Education England STAR tool to support wider workforce transformation, which has 5 main points of focus – Supply, Upskilling, New Roles, New Ways of Working and Leadership. This is further supported across the Trust and across the Integrated Care System (ICS) using the Workforce Repository and Planning Tool (WRaPT) which is an activity-based workforce capacity and demand modelling tool which allows managers to test scenarios and develop new models of care. This ensures that the Trust has a workforce plan which is safe and sustainable.

79. The Trust also actively benchmarks its performance against key workforce indicators through the data held in the Model Hospital and the Board has oversight of all of all workforce issues and risks through monthly reporting through the Operational Delivery Board (ODB).

CQC Registration

80. The Trust remains registered unconditionally with the Care Quality Commission to provide the following regulated activities:

    a) Diagnostic and screening procedures
    b) Family planning services
    c) Management of supply of blood and blood derived products
    d) Maternity and midwifery services
    e) Nursing care
    f) Surgical procedures
    g) Termination of pregnancies
    h) Treatment of disease, disorder or injury

81. The Trust is rated as 'Good' with some areas of 'Outstanding' following the most recent CQC inspection in August and September 2018.

82. The Trust is fully compliant with the registration requirements of the Care Quality Commission.

Declarations of Interest

83. The Trust has published in its website an up-to-date register of interests, including gifts and hospitality, for decision-making staff (as defined by the Trust) within the past twelve months, as required by the 'Managing Conflicts of Interest in the NHS' guidance and can be found on the Trust's website under 'Publication Scheme' (Section 6: Lists and Registers).

NHS Pension Scheme Statement of Compliance

84. As an employer with staff entitled to membership of the NHS Pension Scheme, control measures are in place to ensure all employer obligations contained within the Scheme regulations are complied with. This includes ensuring that deductions from salary, employer's contributions and payments into the Scheme are in accordance with the Scheme rules, and that member Pension Scheme records are accurately updated in accordance with the timescales detailed in the Regulations.

Diversity and Equality

85. Control measures are in place to ensure that all the organisation's obligations under equality, diversity and human rights legislation are complied with.

Sustainable Development

86. The Trust has undertaken risk assessments and has a sustainable development management plan in place which takes account of UK Climate Projections 2018 (UKCP18). The trust ensures that its obligations under the Climate Change Act and the Adaptation Reporting requirements are complied with.

87. The Trust is improving the performance of its estate by upgrading or replacing aged and dilapidated stock with new or refurbished buildings with inherently better energy performance.

88. The Trust has also adopted the Building Research Establishment Environment Assessment Method (BREEAM) healthcare toolkit for all significant new and refurbishment building projects. The most recent example is the new £15.6 million Ophthalmology Unit, General Outpatients, Maxillofacial Department and ancillary services facility at Burnley General Teaching Hospital (Phase 8) which is rated at a BREEAM standard of 'Very Good'.

Review of economy, efficiency and effectiveness of the use of resources

89. The Audit Committee is charged with reviewing the economy, efficiency and effectiveness of the use of resources throughout the course of the year and ensuring that there is a robust system of integrated governance and internal control across all spheres of the Trust's activity. Having reviewed the regular reporting of the Audit Committee on its activities presented to the Trust Board I am satisfied that it has met these requirements during the course of the year and assisted in the further development and improvement in the embedding of internal control systems. Together with the comprehensive programme of quality improvement work for the care of patients reporting to the Quality Committee and the Trust Board I am satisfied that there are clear lines of governance and accountability within the Trust for the overall quality of clinical care and these are reflected in the achievements highlighted in the Trust's annual Quality Account.

Information governance

90. The Trust has an Information Governance (IG) Steering Group charged with ensuring the effective operation of safeguards for, and appropriate use of, patient and personal information and compliance with the NHS Data Security Protection (DSP) Toolkit. The Trust has a policy of proactively managing incidents and reporting Information Governance Incidents and near misses to the Information Commissioner when required by guidance and legislation. The Trust has self-reported four incidents in year. The Information Commissioner has seen fit to take no further action in relation to these incidents and near misses reported.

91. The Trust has undertaken a comprehensive review of its declaration of compliance with the requirements of the NHS DSP Toolkit and is expecting to declare standards met against all DSP Standards of Health and Care Assessment Assertions 2019-20. This has been monitored at the Finance and Performance Committee during the course of the year and reported to the Trust Board. The IG Steering Group reports to the Trust's Audit Committee and reports are provided to the SIRO on an on-going basis. Information Governance (Personal Data Breaches) incidents escalated to the ICO 2019-20 are detailed below:

Date of Incident (Month Reported to ICO)	Type of breach	Number Affected	How Many Patients Were Informed	Lessons Learned
08/11/2019	Personal Data Breach (Unauthorised Access)	1	1	Trust wide communications to remind staff of policies Reviewed warning messages on key systems in relation to unauthorised access Communication to all staff reminding them of responsibilities and repercussion which could result in legal action / dismissals/criminal record etc
04/10/2019	Personal Data Breach (Unauthorised Access)	2	2	Trust wide communications to remind staff of policies Reviewed warning messages on key systems in relation to unauthorised access Communication to all staff reminding them of responsibilities and repercussion which could result in legal action / dismissals/criminal record etc
21/06/2019	Personal Data Breach (Unauthorised Access)	1	1	Trust wide communications to remind staff of policies Reviewed warning messages on key systems in relation to unauthorised access Communication to all staff reminding them of responsibilities and repercussion which could result in legal action / dismissals/criminal record etc

92. The Trust has invested significantly over the past 12 months in cyber defences to ensure personal data is kept as secure as possible, with major investments in software such as Vectra (AI to monitor network traffic), new Firepower and Checkpoint Firewalls and enhanced Active Directory management. In working to obtain Cyber Essentials accreditation, the Trust has been liaising with Mersey Internal Audit Agency (MIAA) to externally monitor, support and validate the actions taken to ensure compliance. The Trust successfully submitted its DSP toolkit for 2020 and was independently verified. Where possible, all systems have been brought into central management by the Informatics Systems team and those that remain in divisions are now registered on our central database.

Although the majority of the electronic systems in the Trusts are legacy, regular Business Continuity and Data Quality Audits take place and such audits are available for review. All patching and system updates are tested prior to roll out and ELHT responds to Care Cert alerts well within the required timescales. New backup systems have been procured and are in the process of installation (completion Aug 2020), to provide additional levels of assurance should there be a system failure. Dedicated Information Governance, Subject Access Request, Cyber and FOI teams exist within the Informatics Department and a report is produced to each months IG steering group re progress. Weekly Data Quality reviews take place and data quality issues are addressed by on call and full time staff during 'down times'. All systems have audit trails and regular reports are produced and access checked to ensure compliance. The biggest risk to the Trust remains the absence of a full core electronic patient record including the lack of an electronic prescribing and administration system. These risks are identified within the Trust Datix system, the corporate risk register and highlighted at ICS level. All new systems are subject to a full Data Protection Impact Assessment (DPIA) and signed DPIA's. All clinical systems have a full Clinical Safety Case completed by the Chief Nursing Information Officer (CNIO) and these are available for review and audit. Any breaches of data security are initially managed by the IG team and escalated to the Data Protection Officer (DPO), Senior Information Risk Owner (SIRO) and Caldicott Guardian.

Advice is sought from the ICO as required. A full training programme re patient confidentiality, Information Governance and Cyber Security is undertaken by staff with compliance numbers produced monthly. The Informatics department issues regular and timely cyber alert emails to staff and undertakes simulated 'phishing' attacked to manage and review compliance. Finally, the Trust commissions external agencies to undertake regular system penetration tests to understand system vulnerabilities. The most recent test indicated a high level of protection from outside attack was being maintained. Results are available for audit.

Cyber Security Incidents escalated to the ICO 2019-20.

93. There was one cyber security incident that occurred in the 2019-20 year which required escalation to the ICO, it is detailed below:

Date of Incident (Month Reported to ICO)	Type of breach	Number Affected	How Many Patients Were Informed	Lessons Learned
01/08/2019	Network Information Services Directive (NIS) Phishing Email	2	2	Communication to all levels of staff reminding them of cyber security policies and guidance

Annual Quality Account

94. The directors are required under the Health Act 2009 and the National Health Service (Quality Accounts) Regulations 2010 (as amended) to prepare Quality Accounts for each financial year.

95. The Trust publishes an annual Quality Account which is subject to a review by the Trust's External Auditors, Messrs Grant Thornton, who are able to provide independent assurance on the data that is published and the systems that are used to collate the information presented in the Quality Account and in reports to the Board and its Committees on a regular basis. The Quality Account is reviewed by the Audit Committee, the Quality Committee and the Operational Delivery Board prior to a recommendation being made to the Trust Board that the Annual Quality Report should be released for publication. The Quality Account is also reviewed and commented upon by our health and social care partners to ensure that there is a consistent view on the quality both of the data that is published and the quality of the patient experience of our services.

96. Among the controls in place to ensure the accuracy of data used in both the Quality Account and on-going internal and external reporting of data are:

    a) Specific policies on the recording of data and quality indicators including
        i. Root Cause Analysis Policy
        ii. Risk Management Policy
        iii. Clinical Records Policy
        iv. Production of Patient Information
        v. Information Governance Policy
        vi. Clinical Audit Policy

    b) Continued development and expansion of near real time dashboard reporting systems with reporting of quality indicators at every level from ward to Board

    c) Training programmes to ensure staff have the appropriate skills to record and report quality indicators including training on particular software and hardware systems, Information Governance Toolkit training and corporate and departmental induction and mandatory training

    d) A rolling programme of audits on quality reporting systems and metrics

    e) Alignment of the internal audit, clinical audit and counter fraud work plans on a risk based approach linked to the Board Assurance Framework and the Corporate Risk Register.

97. The Trust utilises its quality and risk associated committee structure to routinely review the data and information that is included within the Quality Report. This provides the Board with assurance that the Quality Report presents a balanced view of the action taken by the Trust in year to ensure the provision of high quality, safe and effective services.

98. Our quality priorities for 2019-20 were:

    a) Support safe discharges to continuing care

    b) Ensure safe transfers of care between providers

    c) Continue the work on improving the recognition and response to acutely deteriorating patients

    d) Continue the work reducing the number of patients who fall in our care.

Review of Effectiveness

99. As Accountable Officer, I have responsibility for reviewing the effectiveness of the system of internal control. My review of the effectiveness of the system of internal control is informed by the work of the internal auditors, clinical audit and the executive managers and clinical leads within the NHS Trust who have responsibility for the development and maintenance of the internal control framework. I have drawn on the information provided in this annual report, as well as the content of the quality report attached to the annual report and other performance information available to me. My review is also informed by comments made by the external auditors in their management letter and other reports. I have been advised on the implications of the result of my review of the effectiveness of the system of internal control by the Trust Board, the Audit Committee and the Quality Committee and a plan to address weaknesses and ensure continuous improvement of the system is in place.

100. The Head of Internal Audit opinion by Mersey Internal Audit found that: 'Substantial Assurance can be given that that there is a good system of internal control designed to meet the organisation's objectives, and that controls are generally being applied consistently.'

101. During the year 17 internal audit reports have been presented to the Trust by Mersey Internal Audit Agency (MIAA) in 2019-20. Of those, three audits received either moderate or limited assurance ratings, they were noted to be:

    a) Consultant Job Plans (limited assurance)
    b) Financial Systems Hosted Services (Moderate Assurance)
    c) DNA CPR (Moderate Assurance)

102. Appropriate actions have been or are being undertaken to address the recommendations set out within the limited assurance reports and management are satisfied that there are no significant control or governance weaknesses identified as a result of the limited assurance reports.

103. The Assurance Framework and the internal auditor's opinion on the effectiveness of the systems and processes supporting the Assurance Framework provide me with evidence that the effectiveness of controls that manage the risks to the organisation in achieving its principal objectives have been reviewed.

104. My review is also informed by internal and external information including:

    a) Detailed reports from the Trust's internal auditors (Mersey Internal Audit Agency) and external auditors (Grant Thornton)
    b) Performance and financial reports to the Trust Board and its subcommittees
    c) NHS Improvement performance management reports
    d) NHS England Area Team performance management reports
    e) Clinical Commissioning Groups performance management reports
    f) Governance reports to the Quality Committee, Audit Committee and Trust Board
    g) Compliance with action plans as part of our performance management arrangements
    h) Patient Led Assessments of the Care Environment
    i) Care Quality Commission Report
    j) Reports from external inspections and assessments during the course of the year from bodies such as Royal Colleges, Health Education North West etc.
    k) Information Governance risk assessment against the Information Governance Toolkit
    l) Information Commissioners Office Audit (October 2017)
    m) Feedback from local and national staff and patient surveys
    n) The work of the Executive team within the organisation who have responsibility for the development and maintenance of the internal control framework within their portfolios.

105. Where reports have identified limitations in assurance these have been acted upon and in relation to auditors' reports have been monitored by the Audit Committee. The Trust Board and its subcommittees have been actively engaged in the on-going development and monitoring of the Assurance Framework and will continue to shape the iterative development of the Assurance Framework and its associated risk management systems and processes throughout 2019-20.

Significant Issues

106. The following issues have prejudiced the achievement of the priorities set during 2019-20 for the Trust:

    a) Financial Position: The Trust was able to meet its financial objectives for 2019-20 delivering a £5.1 million surplus and living within its Capital Resource Limit. Prior to Covid-19 pandemic the Trust board agreed a draft annual financial plan of a £36.4 million deficit, which included a Waste Reduction Programme of 3.1% amounting to a value of £17 million. Since the submission, the planning round has been suspended for the NHS. Initially for the first four months of the financial year, NHS England/ Improvement have set block contracts for all providers with no expectations of efficiency savings. Further guidance on the position for the entire 2020-21 financial year is expected imminently. The following measures are in place:
    b) Workforce – including staffing, supporting attendance and Health and Wellbeing
        i. Mitigating actions taken include:
            - On-going Global Learners Programme (GLP) through Health Education England (HEE) to recruit international nurses – as at the end of March 2020, the Trust has had 48 nurses start through the GLP and has a further 14 candidates in the pipeline.
            - Continuing to reduce time to hire through the Trust Vital Signs Programme – the Trust has continued to improve upon it's time to hire figures, reducing by a further day in 2019-20.

The Trust actively monitors time to hire figures in the monthly Agency Group meetings which allows us to manage avoidable delays as well as highlight areas for process improvement.

- Use of a number of recruitment platforms which have reduced the number of vacancies within the last six months and are still helping to recruit to the hard to fill roles
- Increased advertising through the BMJ for all medical posts
- Increased internal bank recruitment to reduce reliance on agency supply – significant Healthcare Assistant Bank recruitment undertaken in December 2019 and January 2020 which yielded an additional 220 workers for the Trust. The Trust has continued to increase agency to bank conversion for Medical staff.
- Regular reviews of all medical rotas against establishment and budget and review of long term agency workers in line with recruitment activity
- Completing the implementation of the Allocate rota system for Medics in order that the Trust has clearer oversight of its medical workforce for the purposes of planning
- A review of the end to end governance process for Medical bank/agency bookings, rates agreed and off cap/off framework requests
- Ongoing collaboration across Trusts in the North West in relation to options such as a collaborative medical bank and harmonisation of rates. Workforce Transformation strategy which will support the reduction in vacancies through the use of the HEE STAR tool to support workforce transformation, which has 5 main points of focus – Supply, Upskilling, New Roles, New Ways of Working and Leadership. This is further supported across the Trust and across the ICS using the Workforce Repository and Planning Tool (WRaPT) which is an activity-based workforce capacity and demand modelling tool which allows managers to test scenarios and develop new models of care

Supporting Attendance

- The Trust has a detailed action plan in place to address sickness absence and has identified high impact areas to support improvement, as outlined below:
- The creation of an Attendance Team at the end of 2019 to identify hotspot areas (sickness over 6%) and work with Directorates on identifying reasons and developing relevant action plans
- Newly developed training for managers, with e-learning to be developed in 2020/21
- Real time absence reporting to be rolled out in 2020/21

Health & Wellbeing

- The Trust launched its new Health and Wellbeing Strategy in January 2019 & the EASE Service is one way in which we are committed to support staff with their health and wellbeing. EASE stands for Early Access to Support for Employees. It is an early intervention service provided by Occupational Health for all staff who are unable to attend work due to musculoskeletal (MSK) or mental health (MH) conditions
- The Staff Health & Wellbeing Strategy Action Plan identifies 6 key themes to holistically support people at work. These are Leadership & Management, Data & Communication, Healthy Working Environment, Mental health, Musculoskeletal (MSK) and Healthy Lifestyles.

c) Patient Flow

i. Mitigating actions taken include:

- Development of Same Day Emergency Care facilities for:
  - – Acute Respiratory conditions
  - – Older Persons Rapid Assessment
  - – Medical Ambulatory Emergency Care
  - – Surgical Ambulatory Emergency Care
- Same Day Emergency Care Facilities are now operational 7 days a week with Streaming of patients following triage on arrival in the Emergency Department and Urgent Treatment Centres here at ELHT. Clinical Pathways are in place to support the appropriate streaming of patients to the right service to meet their needs on arrival.
- GP referrals are centralised in Acute Medicine through the Medical Emergency Ambulatory Care Unit with calls being taken by a clinician who is able to access Consultant advice to support decision making. Patients also have the option to be offered Hot Clinic appointments and diagnostics in a planned way to avoid unnecessary admission.

- A North West Ambulance Service (NWAS) Low Risk Chest Pain Pathway is now in place which allows direct access for Ambulance Crews to the Medical Ambulatory Emergency Care Unit for a number of patients therefore supporting the reduction in occupancy within ED.
- In addition, the Trust is working to redevelop its two Acute Medical Units (AMU) to be sited together and closer to the emergency department. This is scheduled for delivery in December 2020.
- In relation to the point above, work is ongoing with clinical teams to review the Medical Model of Care. The developments will provide new ways of working to support inpatients in accessing the right specialist care in a timely way which will help to reduce their length of stay (LOS).
- Covid-19 has accelerated the Trust's need and ability to work differently. It has allowed work plans to be brought forward, and cross-divisional working has been enhanced which will assist the care delivery within the new unit. Examples of this include: admission avoidance, speciality in-reach and reduction in length of stay.
- The Trust is also in the process of improving its discharge processes including Delayed Transfers of Care (DTOC) and 'Senior review, All patients, Flow, Early discharge, Review' (SAFER) work.
- Redeployment or necessary modifications to the working environment for vulnerable staff during the response to Covid-19, e.g. home working or redeployment to lower risk services/areas.
- The Integrated Discharge Service (IDS) has successfully maintained a healthy discharge position. The position is closely monitored and reported daily to ensure that any barriers to discharge are managed in a timely manner. The Complex Case Management Team has operated a 7 day, 8am-8pm service.
- The IDS service manager has worked closely with care/residential home managers to support the timely discharge of patients by providing infection control advice and ongoing support via clinical monitoring of patients.
- We have also developed additional work streams to support internal flow and capacity and an external case management service to support the increased discharge to assess activity this needs to be further developed prior to autumn 2020 as a key priority to support winter preparedness.
- Implementation of Home First (Discharge to Assess) model which has been subsequently expanded
- Staff were redeployed from other service areas to ensure that our Home First Pathway remained our default discharge pathway.
- Given the implementation of the Rapid Discharge Guidance there has not been a need for the MADE events to review the trigger list though there continues to be close multi-agency monitoring of discharge pathways and potential delays.
- Redesign of clinical flow arrangements within the Trust, including Control Room/Co-ordination Centre established within the Trust.
- A programme of improvement has commenced looking to embed SAFER principles across the organisation. 2 rapid improvement events highlighted a number of improvement workstreams including the implementation of a live sitrep (situation report), revised bed meetings and improving utilisation of the discharge lounge. During the COVID pandemic the clinical flow team have embraced lean techniques in the use of visual management to oversee management of COVID bed occupancy and implemented virtual bed meetings to ensure social distancing.

Conclusion

107. In line with the guidance on the definition of the significant control issues I have no significant internal control issues to declare within this year's statement. The system of internal control has been in place in East Lancashire Hospitals NHS Trust for the year ended 31 March 2020 and up to the date of approval of the annual report and accounts.

108. My review confirms that East Lancashire Hospitals NHS Trust has a generally sound system of governance and stewardship that supports the achievement of its policies, aims and objectives.

Signed *(electronically)*:

Kevin McGee, Chief Executive
Date: 1 July 2020

iv. Directors' Report

As at 31 March 2020 The Trust Board comprises the Chairman, six Non-Executive Directors and five Executive Directors with voting rights as detailed in the Board profile below. In addition the Trust has four Associate Non-Executive Directors. The Director of Human Resources and Organisational Development, the three Directors of Operations, Director of Communications and Engagement and the Director of Corporate Governance/Company Secretary also attend the Trust Board to give advice within their professional remits. The Trust Board functions as a corporate decision-making body and Executive and Non-Executive Directors are full and equal members.

The Trust Board provides strategic leadership to the Trust and ensures that the Trust exercises its functions effectively, efficiently and economically. The Board monitors the arrangements to maintain the quality and safety of the Trust's services, including ensuring processes are in place for managing risks.

Non-Executive and Associate Non-Executive Directors have a particular role in scrutinising the performance of the Trust's management in meeting agreed objectives, and ensuring that robust systems of financial control and risk management are in place. The Non-Executive Directors of the Trust are appointed by NHS Improvement, acting on behalf of the Secretary of State for Health and Social Care. They are each appointed for a four-year term which may be renewed subject to satisfactory performance. Non-Executive Directors are not employees of the Trust and do not have responsibility for day-to-day management; this is the role of the Chief Executive and Executive Directors but as a 'unitary Board', Executive and Non-Executive Directors share equal responsibility for the Board's decisions, and all share responsibility for the direction and control of the organisation.

The Trust Board meets six times a year and meetings are open to the public except when confidential information is being discussed. Details of public Board meetings are available, including minutes and papers from previous meetings, on the Trust Board section of our website (www.elht.nhs.uk).

The Trust Board delegates its authority to take decisions about the Trust and its services in accordance with a Scheme of Delegation which is available on our website within the publication section in our Standing Orders and Standing Financial Instructions.

The Executive Directors are appointed by a Committee comprising the Chief Executive and Non-Executive Directors following a competitive interview process.

Information on personal data related incidents that have been formally reported to the Information Commissioner's Office (ICO) can be found in the Annual Governance Statement section of this report.

Voting Board Members

Professor Eileen Fairhurst, Chairman February 2014 to present

Experience

Eileen Fairhurst was appointed to East Lancashire Hospitals Trust in February, 2014. She is a highly experienced Chairman and has chaired a number of large, complex public and third sector organisations, including Acute, Specialised Mental Health and Primary Care Trusts. Within six months of being appointed, she led the Trust out of Special Measures and the Trust now has a CQC rating of 'Good' She established Salford PCT in 2001 which became one of the highest performing PCTs in the country. Subsequently, she was Chairman of NHS Greater Manchester, the largest PCT cluster in England.

She has a national profile for partnership working and the governance of organisations .Her partnership working in health has involved regeneration of localities. Her expertise in the practice of regeneration is mirrored in her academic profile with a number of publications and conference presentations.

Eileen has always ensured that perspectives of patients and communities contribute to service developments. She has championed a number of whole systems innovative service re-design programmes, including mental health, children's and women's health, urgent care and the Greater Manchester Healthier Together programme.

Over the years she has been a regular contributor to development programmes for NEDs and Aspirant Executive Directors and Chairs and to national conferences on Governance and leadership. Eileen has been awarded an MBE in recognition of her contribution to the NHS. A former Professor in Public Health at the University of Salford, she has an international research profile. She is a Founding Fellow of the British Society of Gerontology.

In December 2018 Eileen received an Honorary Doctorate to acknowledge the significant contribution she has made to the development of UCLan's School of Medicine and her academic achievements in the field of Health and Wellbeing. Currently, as a Visiting Professor at the University of Chester, she is developing programmes on governance in the public sector.

Qualifications

BA (Econ), PhD, DSc, Fellow of the Royal Society of Medicine

Mr Kevin McGee, Chief Executive, September 2014 to present

Experience

Kevin is a qualified accountant with over 34 years' experience working in healthcare, with 22 of those years being at executive level.

Prior to joining East Lancashire Hospitals NHS Trust, Kevin held a range of roles including Chief Executive at both George Eliot Hospital NHS Trust and Heart of Birmingham Primary Care Trust. He has also held a range of Director positions, including Director of Finance and Chief Operating Officer in large acute hospitals, and Director of Commissioning and Performance Management at a Teaching Primary Care Trust.

Kevin sits on the North West Leadership Academy Board and is a strong advocate of Compassionate Leadership. Kevin also sits on the Senior Leadership Forum for Pennine Lancashire and chairs the Lancashire and South Cumbria Chief Executives' Provider Forum. Recently Kevin has become a member of the ACCEA and sits on the National Guardian's Office Advisory Working Group.

Kevin received an Honorary Fellowship from UCLan to acknowledge the significant contribution made to the development of the University's School of Medicine through the instrumental strategic support he has provided to UCLan's partnership with ELHT.

Qualifications

BA (Hons), MSc, Member of the Chartered Institute of Public Finance and Accountancy

Mrs Patricia Anderson, Non-Executive Director, June 2018 to May 2019 and October 2019 to Present (Leave of absence taken May 2019 to October 2019)

Experience

Trish has over 30 years of experience working in health and social care services and has enjoyed roles across a wide range of settings, including executive Board appointments. She has proven ability in both the provision and the commissioning of services, strong negotiation and influencing skills, in addition to a strong working knowledge of the key challenges that the NHS is facing. In addition, Trish is skilled in identifying and managing risks within and across organisations. She is clear that the overall goal is to improve health outcomes for the local population and recognises that the Trust will be judged on that delivery.

Trish was the Accountable Officer for Wigan Borough CCG until her early retirement in mid-2018, contributing greatly to the development of a strategic commissioning function across the CCG and the Local Authority. She is keen to maintain her links to the NHS whilst championing quality patient services and is committed to working in a supportive capacity as a Non-Executive Director at the Trust, providing a constructive perspective as a member of the Board.

Qualifications

BA Joint Honours, CQSW/DipSW, ASW

Professor Graham Baldwin, Non-Executive Director, January 2020 to present

Experience

Graham is the Vice-Chancellor at the University of Central Lancashire (UCLan). As Vice-Chancellor, Graham is responsible for the leadership and management of the University within the principles laid down by the Board of Governors.

Graham is a member of Universities UK, a director of the University Alliance and Deputy Chair of the University and College Employers Association. He recently returned to UCLan after spending five years as the Vice-Chancellor of Solent University in Southampton, where he oversaw the development and opening of a number of complex and industry-leading programmes, including a new indoor sports complex and nursing and maritime simulation centres.

Graham’s previous roles have included the Deputy Vice-Chancellor at UCLan and Dean of Academic Development and Director for Cumbria. In addition to academic roles, Graham has been employed as the National Skills Research Director for the Nuclear Decommissioning Authority at Sellafield Limited.

Graham also worked closely with partner institutions, particularly in Hong Kong, China and the Middle East, and he received an Outstanding Foreign Expert Award from Hebei Province, China. He has previously been appointed as Honorary Professor at Hebei University in Baoding, and was appointed as a Visiting Professor by the National Academy for Education Administration, Beijing.

Qualifications

BA (Hons), PGCE, MSc, Ph.D

Mr Stephen Barnes, Non-Executive Director, January 2015 to present

Experience

Stephen Barnes was appointed to the Trust Board on 1 January 2015. He has been a local government chief executive in Lancashire for the past 22 years and prior to that was a director of finance in local government for six years. Stephen is an accountant by profession, a past President of the North West and North Wales region of the Chartered Institute of Public Finance and Accountancy and a past Examiner of the final part of the Professional Accountancy Examination.

During his time in Local Government, Stephen has gained broad experience in strategic leadership, partnership working and joint venture initiatives across the private sector, including economic development and regeneration services and community development and engagement.

Stephen is also currently chair of Nelson and Colne college and a board member of the Association of Colleges and chair of the Nelson Town Deal Regeneration Board. Stephen was reappointed for a further four years in January 2017.

Qualifications

Member of the Chartered Institute of Public Finance and Accountancy

Mrs Michelle Brown, Executive Director of Finance, August 2019 to present

Experience

Michelle joined the Trust in December 2006 from Calderstones NHS Trust, where she was Assistant Director of Finance. She was substantively appointed to the role of Executive Director of Finance for the Trust in September 2019, having ten years' experience in the Deputy Director position. She is a qualified accountant and member of the Chartered Institute of Public Finance and Accountancy (CIPFA). An alumni of the National Financial Management Training Scheme, Michelle has trained and worked in a number of NHS organisations across North Wales and Lancashire, including North Wales Health Authority, Glan Clwyd and Wrexham Maelor hospitals and Burnley Healthcare NHS Trust.

Qualifications

BA (Hons), Member of the Chartered Institute of Public Finance and Accountancy

Mr Martin Hodgson, Executive Director of Service Development and Deputy Chief Executive, November 2009 to present

Experience

Martin joined the Trust in November 2009, from Central Manchester University Hospitals NHS Foundation Trust, where he was Executive Director of Children's Services. He has considerable operational management experience and of implementing major strategic change, including the reconfiguration of children's services across Manchester.

Martin takes a lead role in the development of strategy, planning and working with partners to improve services both in the Lancashire and South Cumbria Integrated Care System (ICS) and the Pennine Lancashire Integrated Care Partnership (ICS).

Qualifications

BA (Hons), Postgraduate Diploma in Human Resource Management

Dr Jawad Husain, Executive Medical Director, February 2020 to Present

Experience

Jawad joined East Lancashire Hospitals NHS Trust as Executive Medical Director in February 2020. Jawad is a practicing urological surgeon with extensive general management experience. He also has a strong track record of achievements in change management, service improvement and innovation. He is a team player with a reputation for building successful partnerships, developing strategy and leading delivery within a complex environment. A visible leader, able to engage with colleagues on all levels with integrity and enthusiasm.

He started his career as a consultant urological surgeon at Wrightington, Wigan and Leigh NHS FT in 2002. He has been trained in the North West region and has a sub-speciality interest in management of stone diseases. Jawad established a fully comprehensive stone service at his organization and helped develop the urological department.

He takes a special interest in patient safety and clinical governance. Jawad strongly believes in value based leadership and helped in embedding a culture which empowered staff and engaged them in improving safety, quality and performance.

Jawad chaired the Surgical North West Sector for Healthier Together and has been instrumental in leading the group to design and deliver pathways for management of surgical patients. His collaborative working across organizational boundaries is reflective of his leadership skills in bringing people together to deliver the best in them.

Jawad takes a keen interest in teaching and training and has been the Surgical Tutor for the Royal College of Surgeons. He has been an examiner for the University of Manchester Medical School and mentor for the medical students, educational and clinical supervisor for urology and surgical trainees, and a panel member for National Selector for core surgical trainees.

He is a Clinical Advisor to the Parliamentary and Health Service Ombudsman, NCAS case manager and case investigator and Responsible Officer.

Qualifications

M.B,B.S, FRCS (I), FRCS (Urol), Membership of BAUS, MPS, BMA

Miss Naseem Malik, Non-Executive Director, September 2016 to present

Experience

Naseem started her public sector career in Local Government. She is a former Commissioner at the IPCC and has held NED roles at Blackburn with Darwen Primary Care Trust and Lancashire Care NHS Foundation Trust.

Naseem is also a qualified (non-practicing) solicitor.

Qualifications

BA (Hons)

Mrs Christine Pearson, Director of Nursing, January 2014 to present

Experience

Chris is a Registered Nurse with experience in a variety of clinical settings and has worked in acute hospitals, community and primary care. She has held management and leadership positions as well as roles within education and professional development. She commenced as Chief Nurse at East Lancashire Hospitals NHS Trust in January 2014, where she provides professional leadership to employed nurses, midwives and Allied Health Professionals.

Qualifications

BA (Hons), MSc

Mr Richard Smyth, Non-Executive Director, March 2017 to present

Experience

Richard is a solicitor with 40 years' experience of regulatory issues and criminal litigation. He has had a highly successful career as a criminal lawyer and held senior positions in well-known law firms representing a wide range of clients including global corporations and professional individuals. His work has included compliance, governance and risk management advice as well as conducting serious and complex cases mainly within the context of business and finance.

Richard is the Chair of the Audit Committee.

Qualifications

BA (Hons), Member of the Law Society

Mr David Wharfe, Non-Executive Director, May 2013 to 28 February 2020

Experience

David was appointed in May 2013. He has a wealth of public sector experience, having enjoyed a successful career in the NHS, holding a number of Board level posts across a range of organisations in the UK as a Finance Director.

David was educated in Burnley, and lives locally. He chairs the Finance and Performance Committee and is a member of the Audit Committee. He is also a Trustee of Pendleside Hospice and a lifelong supporter of Burnley Football Club.

Qualifications

BA (Hons), Member of the Chartered Institute of Management Accountants

Non-Voting Board Members

Harry Catherall, Associate Non-Executive Director

Experience

Harry began his career as an apprentice accountant at Tameside Borough Council aged 16. From there he moved into management at Stockport Metropolitan Borough Council, joining Blackburn with Darwen Council in 1997 as it prepared to be a unitary council. Harry has held a number of different positions at the local authority, starting as Deputy Director of Social Services and various Executive Director roles.

In 2012 was appointed Chief Executive, a post which he held until his retirement earlier this year. He has spent more than half of his working life employed within the area and as such holds East Lancashire close to his heart. He is keen to work with the Trust to develop effective partnership working across the Pennine Lancashire and Lancashire and South Cumbria areas.

Qualifications

FCCA, Qualified Accountant

Mrs Christine Hughes, Director of Communications and Engagement June 2016 to present

Experience

Christine has had a long and successful career in communications in the NHS including at commissioner, primary care, mental health and acute Trusts. Following a highly productive interim period here in ELHT, she became a permanent member of the team in June 2016. She has lately acted in an advisory capacity to a neighbouring Trust and provides executive communications support to Blackpool Teaching Hospitals Trust, both in addition to her substantive role here.

Qualifications

BA (Hons), MA

Mr Kevin Moynes, Director of HR & OD October 2013 to present

Experience

Kevin joined the Trust on 1st October 2013 as the Interim Director of HR and Organisational Development. He joined the NHS in 1978, qualifying as a Registered Nurse (RGN) in 1981 and later as a Registered Sick Children's Nurse (RSCN) in 1986. He obtained his Master's Degree in Nursing from the University of Bradford in 1993. In addition to his NHS experience, Kevin has worked in the USA and the Middle East and has held a Director of Nursing post within the hospice sector. Kevin leads the Trust's agenda relating to HR and OD with a key focus on Staff Engagement, Staff Health and Well-being, Recruitment and Retention, Learning and Development and Leadership and Talent Management.

In October 2018 Kevin commenced in the role of Joint Strategic Director of HR and OD role for the Trust and Blackpool Teaching Hospitals NHS Foundation Trust.

Qualifications

RGN, RSCN, MSc, MCIPD

Feroza Patel, Associate Non-Executive Director, July 2019 to present

Experience

Prior to being appointed as an Associate Non-Executive Director Feroza was one of the Trust's Shadow Public Governors for Blackburn with Darwen. During her time as a Shadow Governor Feroza had worked with the Trust to work with staff and other patient representatives to develop services and improve the overall patient experience.

She also has experience as a Governor for her local primary and secondary schools and worked as a volunteer for SureStart Blackburn West where she developed a parent forum and also sat on the Local Management Board.

She has previously worked as a teaching assistant within primary school education where she was the parental involvement leader, managed the parents committee and organised community health events.

Mr Khalil Rehman, Associate Non-Executive Director, January 2020 to present

Experience

With a passion for improving the lives and well-being of others, Khalil is a co-founder of Medisina Foundation, a UK and US based Non-Governmental Organisation delivering global health and social care in developing countries and currently leads on program delivery and strategy.

He was previously Chief Executive of Doctors Worldwide, an international health charity between 2011-18 and has delivered many innovative humanitarian and public health projects as well as managing local healthcare service delivery across Africa and S Asia. Prior to this he was Director of Finance & IT of a leading North West based social care charity working in Lancashire and Greater Manchester. Before moving into the NGO sector, he spent 10 years in mergers & acquisitions and corporate finance advisory roles followed by time in academia as a Research Fellow and post graduate teaching at one of the world's top universities. Khalil holds a first degree from UCL, an MSc from the Bartlett School, UCL and graduated from executive programs at Harvard Medical School and INSEAD Global Business School.

Khalil also has over 17 years' NED experience on boards and corporate governance roles in social housing and national charities and is currently a non-executive director at Salix Homes.

Qualifications

MSc, B.Eng. (Hons)

Mr Michael Wedgeworth MBE, Associate Non-Executive Director, April 2017 to present

Experience

Mike Wedgeworth MA, BSc, MBE joined the Trust in April 2017. Mr Wedgeworth, has been the Chairman of Healthwatch Lancashire, Chief Executive of Hyndburn Borough Council and Chair of Blackburn College, and has held senior executive positions both locally and nationally. He now serves as an assistant priest at Blackburn Cathedral. He is the Non-Executive Director representative for the Lancashire and South Cumbria Integrated Care Systems Board.

Mr Wedgeworth was awarded the MBE in 2010 for services to Further Education and the Community of Lancashire and is committed to the values of the NHS, and public services generally, and is very aware of the need to provide safe, personal and effective care to patients. Mike is a member of the Trust's Quality Committee and the NED champion for Maternity Services.

Qualifications

BSc, MA

Board members who have left the Trust/ stepped down from the Board during the financial year 2019-20

- Mr John Bannister, Director of Operations (Non-Voting) (December 2016 to May 2019) – Left the Trust
- Professor Mike Thomas, Associate Non-Executive Director (December 2018 to December 2019) – Left the Trust
- Dr Damian Riley, Executive Medical Director and Deputy Chief Executive (July 2015 to October 2019) – Stepped down from the Board
- Dr Ian Stanley, Acting Executive Medical Director (May 2019 to October 2019) – Stepped down from the Board.
- Mr Jonathan Wood, Executive Director of Finance and Deputy Chief Executive (2009 to July 2019) – Left the Trust

Directors' Statements and Register of Interests

So far as each Director is aware, there is no relevant audit information of which the Trust's auditor is unaware. Each Director has taken all the steps that they ought to have taken as a Director in order to make themselves aware of any relevant audit information and to establish that the Trust auditor is aware of that information, including making enquiries of his/her fellow directors and the auditor for that purpose, and has taken such other steps for that purpose as are required by his/ her duty as a director to exercise reasonable care, skill and diligence.

After making enquiries, the Directors have a reasonable expectation that the Trust has adequate resources to continue in operational existence for the foreseeable future. For this reason, they continue to adopt the going concern basis in preparing the accounts.

The accounting policies for pensions and other retirement benefits are set out in the notes to the accounts and details of senior employees' remuneration can be found in the remuneration report.

The Directors believe that the annual report and accounts taken as a whole are fair, balanced and understandable and provide the information necessary for patients, regulators and other stakeholders to assess the NHS Trust's performance, business model and strategy.

It is the Board's belief that each Director is a fit and proper person within the definitions in the Health and Social Care Act 2008 (Regulation of Regulated Activities) (Amendment) Regulations 2014.

Each Director is:

- of good character
- has the qualifications, skills and experience which are necessary for carrying on the regulated activity or (as the case may be) for the relevant office or position
- is capable by reason of their health, after reasonable adjustments are made, of properly performing tasks which are intrinsic to the carrying on of the regulated activity or (as the case may be) the office or position for which they are appointed or, in the case of an executive director, the work for which they are employed
- not responsible for, been privy to, contributed to or facilitated any misconduct or mismanagement (whether unlawful or not) in the course of carrying on a regulated activity, or discharging any functions relating to any office or employment with a service provider, and
- not prohibited from holding the relevant office or position, or in the case of an individual from carrying on the regulated activity, by or under any enactment.

There are no company directorships or other significant interests held by directors which may conflict with their management responsibilities other than those disclosed below:

David Wharfe Non-Executive Director	• Trustee of Pendleside Hospice (from June 2018)	01.04.2019

v. Shadow Governors' Report

Composition of the Shadow Governors

The organisation has Shadow Governors to represent the views of local people. This means discussing matters such as the Annual Report and Accounts. The Shadow Governors were elected by the public and Trust staff. Our Shadow Council of Governors is currently made up of 8 elected individuals, 6 Public Shadow Governors and 2 Staff Shadow Governors. A brief biography of our Shadow Council members can be found below.

Mrs Lee Barnes, Scientific, Therapeutic and Technical

Lee has over 10 years' experience as a Physiotherapist in the Trust. She is a former union representative and has championed staff views and campaigned for positive change. She believes that all staff have a significant contribution to make to the success of the Trust. Lee became a Governor so that she could ensure that the ideas, experiences and concerns of staff are communicated and considered. She is also interested in promoting the work which staff are doing to the Board and wider community.

Mrs Vicky Bates, Pendle

Vicky is a retired healthcare professional with over 20 years' experience working as a nurse, midwife and health visitor. In addition she has experience in teaching nurses and health visitors and has worked as a health development worker within the voluntary sector. Vicky is Chair of her local Parish Council where she represents the views of her local community. She believes that the role of Governor will provide a unique opportunity to be involved in the change and development of the Trust for the benefit of the patient.

Mr Karl Cockerill, Healthcare Assistants and Other Support Staff

Karl has worked as part of the NHS for 18 years; his current role within the Trust is as an Assistant Practitioner within the Community Services Division. He has experience of working on staff engagement and organisational change projects. Karl is also Mediation Co-ordinator for the Trust. His reasons for becoming a Governor include ensuring that the views of staff are represented at Trust Board level and promoting staff engagement throughout the Trust.

Mr Brian Parkinson, Rossendale

Having spent 46 years in the retail motor industry, Brian feels he can bring significant private sector experience to the role of Governor. Brian's reasons for becoming a Governor include the belief that public sector organisations must deliver best practice whilst managing the resource constraints of recent public sector funding reductions.

Mr Graham Parr, Pendle

Graham has a wealth of experience in senior positions within the NHS, including Executive and Non-Executive Director roles and more recently has served as the Chair of an NHS Foundation Trust. He is an Associate Member of two local mental health Trusts, which brings him into regular contact with service users and their families and is the Chairman of The Board of Trustees East Lancashire Hospice. Graham is also a Magistrate and a Trustee/Director of Coldwell Activity Centre. His reasons for becoming a Governor at ELHT are to provide a link in the community between the Trust Board and patients, to provide constructive challenge and scrutiny of the Trust and also to ensure that services provided to the local community are of the highest possible standard.

Mrs Marion Ramsbottom, Blackburn with Darwen

Marion is a former Non-Executive Director of ELHT and is a Trustee of Age UK Blackburn with Darwen Charity Board and also the Chair of Age UK Blackburn with Darwen Trading Board. Marion also works as an Associate Manager for Lancashire Care Foundation Trust, where she comes into regular contact with patients, their carers and family members. Marion's reasons for becoming a Governor include the desire to contribute the views of the population into future plans for the Trust, ensuring the delivery of high quality care to the local population.

Mrs Brenda Redhead, Ribble Valley

Brenda is a retired secondary school science teacher and until recently served as Vice-Chair of her local Parish Council. She has been the parish representative on the Parish Councils Liaison Committee and possesses skills in absorbing and evaluating information in preparation for action. Brenda has previously volunteered as a road safety trainer at her local primary school and has, until recently volunteered as a walks leader for Dales Rail. Her reasons for becoming a Governor include the belief that hospital services should be accountable to their users and consider the views of patients.

Mr David Whyte, Hyndburn

David is a retired manager, who previously worked in the theatre and music industry and is also a qualified English teacher. He has carried out voluntary work for the Trust and is concerned with ensuring that local communities have their views fed into the work of the Trust. His area of interest as a governor is in the monitoring and improvement of services for the benefit of patients.

David has always had an interest in writing and puts this to use by collating Patient Stories in advance of them being presented to Trust Board.

The Shadow Governors have been very active within the Trust and have been involved in a range of activities over the course of the past year. These include:

- CQC-style mini-inspections
- PLACE Assessment training and visits
- Dementia Strategy meetings
- Bereavement Strategy Group meetings
- STAR Award judging
- Patient Participation Panel
- Patient Engagement schemes
- Nutrition and Hydration Steering Group meetings
- End of Life Care Steering Group meetings
- Frailty Steering Group

b) Remuneration and Staff Report

The Trust's Remuneration Committee has overarching responsibility for the remuneration, arrangements for the appointment and agreement of termination packages for Executive Directors and senior managers. The members of the Committee are the Non-Executive Directors of the Trust.

The members are:

- Professor Eileen Fairhurst
- Mrs Patricia Anderson (Non-Executive Director from 1 July 2018 to 10 May 2019 and 3 October 2019 to date)
- Professor Graham Baldwin (Non-Executive Director from 1 January 2020)
- Mr Stephen Barnes
- Mr Harry Catherall (Non-voting Associate Non-Executive Director from 1 July 2019)
- Miss Naseem Malik
- Mrs Feroza Patel (Non-Voting Associate Non-Executive Director from 1 July 2019)
- Mr Khalil Rehman (Non-voting Associate Non-Executive Director from 1 January 2020)
- Mr Richard Smyth
- Mr Michael Wedgeworth (Non-voting Associate Non-Executive Director)
- Professor Mike Thomas (Associate Non-Executive Director to 31 December 2019)
- Mr David Wharfe (Non-Executive Director to 28 February 2020)

The Remuneration Committee is chaired by the Trust Chairman. Information on the term of office of each Non-Executive Director is provided in the Directors Report section of this Annual Report. The interests and details of the Trust Board are disclosed in the Directors' Register of Interests section earlier this Annual Report.

The Remuneration Policy of the Trust states that it does not make awards on performance criteria. Performance in the role of Directors is assessed separately by the Chief Executive Officer in relation to an Executive Director's role in leading the organisation and achieving performance objectives and by the Chairman of the Trust in relation to performance as a member of the Trust Board. The Trust will review its remuneration policy within the next three months to ensure that the policy covers the approach on the remuneration of directors for future years.

In assessing any pay awards during the course of the year, the members of the Committee have had due regard both for the average salary of the executive director in peer organisations and the changes in remuneration agreed as part of the Agenda for Change pay scheme. The Executive Directors have received changes in their remuneration only in cases that relate to changes in their executive and operational duties and in line with peer organisations.

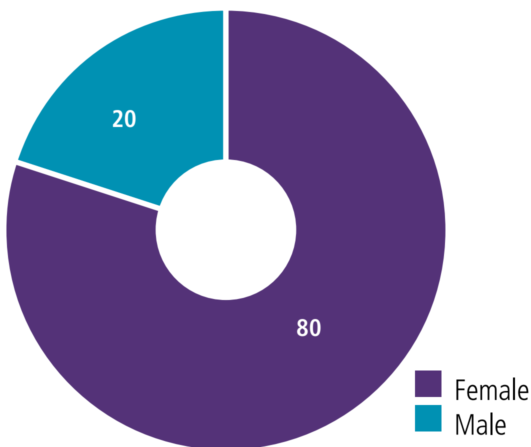
The employment contracts of Executive Directors are not limited in term and notice periods are six months. The only provision for early termination is in relation to gross misconduct.

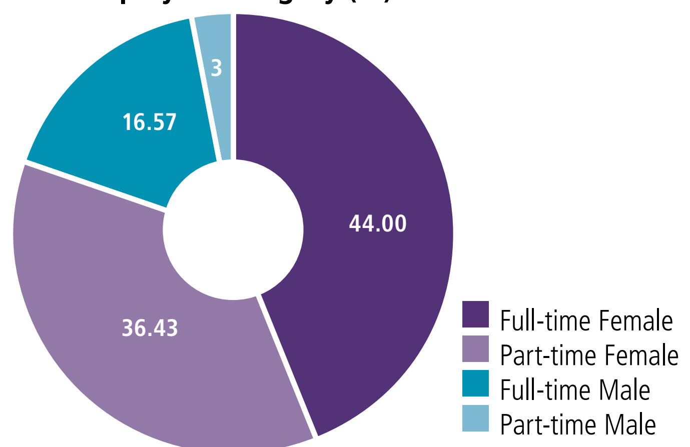
Financial information relating to remuneration can be found later in this document under the Financial Statements and Report section of this Annual Report.

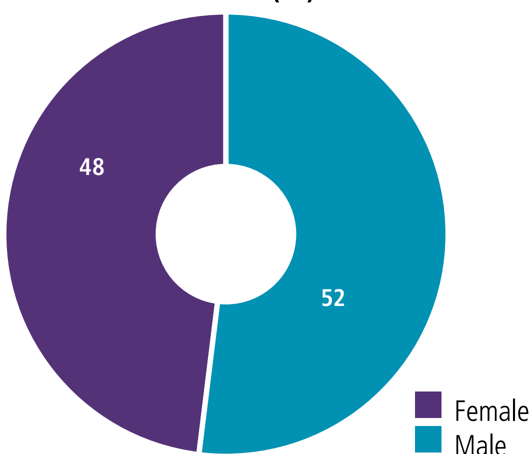
Staff numbers & composition

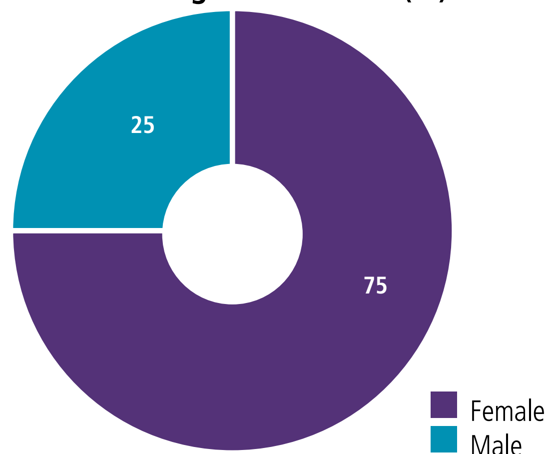
The Trust is a major local employer and we employ over 8,000 people. During the course of the year the Trust has worked hard to recruit and retain staff. The Trust now employs 428 WTE more than at the end of 2018-19. The Trust is fully committed to eliminating gender inequality and continues to monitor the gender profile of the workforce. The current profile is typical of other NHS organisations:

Staff Group	% Female	% Male
Add Prof Scientific and Technic	72%	28%
Additional Clinical Services	89%	11%
Administrative and Clerical	82%	18%
Allied Health Professionals	77%	23%
Estates and Ancillary	58%	42%
Healthcare Scientists	65%	35%
Medical and Dental	37%	63%
Nursing and Midwifery Registered	95%	5%
Students	100%	0%
Grand Total	**80%**	**20%**









Sickness

The Trust has implemented a number of initiatives to improve the health & wellbeing of its staff and to minimise absence due to sickness, these initiatives are starting to impact the absence figures. Overall the Trust sickness days lost have increased when compared with 2018-19 but the staff numbers have also increased in this time period. Duration of absence has decreased in 2019-20.

Staff sickness absence	2019-20	2018-19
Total days lost	**139,950**	132,721
Total no of episodes	**13,375**	11,733
Average working days lost per episode	**10.46**	11.31

The Trust monitors sickness absence rates on a monthly basis in the workforce scorecard element of the integrated performance report.

Staff policies

The Trust recognises that giving staff access to skills and development supports the delivery of safe, personal and effective care to our patients. The Trust has developed a full range of employment policies to support staff throughout their time working at the Trust. These policies are regularly reviewed in line with employment legislation and best practice. Policies are assessed to ensure that there is equal opportunity for all job applicants and staff, including those who provide services as volunteers. Specific policies have been developed to support people with disabilities during the recruitment process and whilst in their roles.

The Trust has employed a Staff Guardian since 2014 and has successfully introduced the 'If you see something say something' campaign which encourages all of our staff to speak out safely if they have any concerns. The guardian works independently alongside Trust leadership teams to support our organisation in becoming a more open and transparent place to work, where all staff are actively encouraged and enabled to speak up safely.

The Trust has policies in place to ensure that staff have access to appropriate training, qualifications and access to continuing professional development so that staff are supported to develop their skills and grow their experience.

The Trust recognises a number of trade unions, with whom we consult on workforce training and development issues. In 2019-2020 we continued our commitment to a systematic approach to engage and empower our employees in order to support our vision 'to be widely recognised for providing safe, personal and effective care'.

All our policies are consistent with our responsibilities under the Equality Act 2010 and are reviewed on a regular basis to ensure compliance and that they adhere to best practice

The Trust has a strong commitment to the delivery of education, training, and learning and development opportunities to ensure all our staff have the skills necessary to fulfil their role and contribute to excellent patient care. In addition to our ongoing mandatory training programmes, which are tailored for staff groups, we offer coaching and mentorship for personal and professional development.

Staff Engagement Indicators

The 2019 National Staff Survey demonstrated that ELHT has achieved its best ever scores for staff engagement with 9 of the 11 key themes better than average when compared with all Combined Acute and Community Trusts across the country. 90 questions can be compared historically between 2018 and 2019. ELHT demonstrated that 13 questions scored significantly better, 65 questions no significant difference and 12 questions significantly worse when compared with 2018.

The results showed that for the fifth year in a row, staff ratings have improved which has helped ELHT maintain its position in the top 20% of hospital Trusts for staff satisfaction and engagement. When compared nationally against all Combined Acute and Community Trusts ELHT ranked:

- 2nd nationally for staff health and wellbeing.
- 4th nationally for staff morale.
- 4th nationally for quality of appraisal.
- 4th nationally for quality of care.
- 4th nationally for team working.
- 6th nationally for safety culture.
- 6th nationally for staff engagement.
- 8th nationally for safe environment bullying and harassment.

The results show that as an organisation we continue to improve the support we provide for our most important asset, our staff. The results are also excellent news for patients as we know that high levels of employee engagement and satisfaction directly and indirectly influence the quality of patient care and customer satisfaction in our hospitals and clinics.

Likewise our quarterly Staff Friends and Family Test scores continue to demonstrate that staff would be happy to recommend the Trust for care and as a place to work and at Quarter four 83% of respondents recommended ELHT as a place for care/treatment and 77% recommended the Trust as a good place to work. It is a testimony that so many staff would recommend the Trust as a place for care/treatment and as a good place to work and as a Trust we will strive to further improve our staff engagement and satisfaction by continuing to embed our employee engagement strategy.

Off-payroll engagements

The Trust employs the services of some staff through invoicing arrangements, rather than through payroll. The numbers of these staff falling under the following criteria are shown below.

All off-payroll engagements as of 31 March 2020, for more than £245 per day and that last longer than six months are:

	Number
No. of existing engagements as of 31 March 2020	**5**
Of which...	
number that have existed for less than one year at time of reporting	0
number that have existed for between one & two years at time of reporting	0
number that have existed for between two and three years at time of reporting	0
number that have existed for between three and four years at time of reporting	2
number that have existed for four or more years at time of reporting	3

All staff paid through this arrangement are assessed for compliance with IR35.

All off-payroll engagements, or those that reached six months in duration, between 1 April 2019 and 31 March 2020, for more than £245 per day and that last for longer than six months:

	Number
No. of new engagements, or those that reached six months in duration, between 1 April 2019 and 31 March 2020	0
No. assessed as caught by IR35	0
No. assessed as not caught by IR35	0
No. engaged directly (via PSC contracted to department) and are on the departmental payroll	0
No. of engagements reassessed for consistency / assurance purposes during the year	0
No. of engagements that saw a change to IR35 status following the consistency review	0

Off-payroll engagements of board members, and/or, senior officials with significant financial responsibility, between 1 April 2019 and 31 March 2020

	Number
No. of off-payroll engagements of board members, and/or, senior officials with significant financial responsibility, during the financial year.	0
No. of individuals that have been deemed 'board members, and/or, senior officials with significant financial responsibility', during the financial year. This figure includes both off-payroll and on-payroll engagements.	11

No payments have been made during 2019-20 to former senior managers and no compensation on early retirement or loss of office or other exit packages have been made during this period.

Exit packages (subject to audit)

During 2019-20 there were no exit payments made to any member of staff.

CONSULTANT

c) Audit Report

Independent auditor's report to the Directors of East Lancashire Hospitals NHS Trust

Report on the Audit of the Financial Statements

Qualified opinion

We have audited the financial statements of East Lancashire Hospitals NHS Trust (the 'Trust') for the year ended 31 March 2020, which comprise the Statement of Comprehensive Income, the Statement of Financial Position, the Statement of Changes in Taxpayers Equity, the Statement of Cash Flows and notes to the financial statements, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the European Union, and as interpreted and adapted by the Department of Health and Social Care Group Accounting Manual 2019 to 2020.

In our opinion, except for the possible effects of the matter described in the basis for qualified opinion section of our report, the financial statements:

- give a true and fair view of the financial position of the Trust as at 31 March 2020 and of its expenditure and income for the year then ended; and
- have been properly prepared in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union, as interpreted and adapted by the Department of Health and Social Care Group Accounting Manual 2019 to 2020; and
- have been prepared in accordance with the requirements of the National Health Service Act 2006.

Basis for qualified opinion

Due to the national lockdown arising from the Covid-19 pandemic we did not observe the counting of physical inventories at the end of the year. We were unable to obtain sufficient appropriate audit evidence regarding the inventory quantities held as at 31 March 2020, which have a carrying amount in the Statement of Financial Position of £8.311 million, by performing other audit procedures. There may be an impact on the valuation of supplies and services expenditure for the same reason.

Consequently, we were unable to determine whether any adjustment to these amounts were necessary. In addition, were any adjustment to these amounts to be required, the Annual Report would also need to be amended.

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the 'Auditor's responsibilities for the audit of the financial statements' section of our report. We are independent of the Trust in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified opinion.

The impact of macro-economic uncertainties on our audit

Our audit of the financial statements requires us to obtain an understanding of all relevant uncertainties, including those arising as a consequence of the effects of macro-economic uncertainties such as Covid-19 and Brexit. All audits assess and challenge the reasonableness of estimates made by the Directors and the related disclosures and the appropriateness of the going concern basis of preparation of the financial statements. All of these depend on assessments of the future economic environment and the Trust's future operational arrangements.

Covid-19 and Brexit are amongst the most significant economic events currently faced by the UK, and at the date of this report their effects are subject to unprecedented levels of uncertainty, with the full range of possible outcomes and their impacts unknown. We applied a standardised firm-wide approach in response to these uncertainties when assessing the Trust's future operational arrangements. However, no audit should be expected to predict the unknowable factors or all possible future implications for an entity associated with these particular events.

Material uncertainty related to going concern

We draw attention to note 1.3 to the financial statements, which indicates that the Trust's draft 2020-21 financial plan prepared in March 2020 reported a £36.4 million deficit. As disclosed in note 1.3 to the financial statements, as a result of the COVID-19 pandemic, the financial plans have yet to be finalised and updated to take account of its impact. Current changes to national funding arrangements are expected to be extended for the remainder of the 2020-21 financial year and may continue into 2021-22, but in the event that they are discontinued the Trust expects that any shortfall in earned income over expenditure will be met in the form of revenue support from the Department of Health and Social Care. This additional support has not been confirmed.

These events or conditions, along with the other matters as set forth in note 1.3 indicate that a material uncertainty exists that may cast significant doubt about the Trust's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Emphasis of Matter – effects of Covid-19 on the valuation of land and buildings

We draw attention to Note 1.4 of the financial statements, which describes the effects of the Covid-19 pandemic on the valuation of land and buildings as at 31 March 2020. As, disclosed in Note 1.4 to the financial statements, a full valuation of land and buildings was carried out by the Trust's valuer as at 31 March 2020. The valuer declared a 'material valuation uncertainty' in the valuation report. This is on the basis of uncertainties in markets caused by COVID-19.

While the valuer declared this material valuation uncertainty, the valuer continued to exercise professional judgement in providing the valuation and so this remains the best information available to the Trust. Our opinion is not modified in respect of this matter.

Other information

The Directors are responsible for the other information. The other information comprises the information included in the Annual Report, other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

As described in the basis for qualified opinion section of our report, we were unable to obtain sufficient appropriate audit evidence regarding the inventory quantities, which have a carrying amount in the Statement of Financial Position of £8,311,000 at 31 March 2020, and related balances. Accordingly, we are unable to conclude whether or not the other information is materially misstated with respect to this matter.

Other information we are required to report on by exception under the Code of Audit Practice

Under the Code of Audit Practice published by the National Audit Office in April 2015 on behalf of the Comptroller and Auditor General (the Code of Audit Practice) we are required to consider whether the Annual Governance Statement does not comply with the guidance issued by NHS Improvement or is misleading or inconsistent with the information of which we are aware from our audit. We are not required to consider whether the Annual Governance Statement addresses all risks and controls or that risks are satisfactorily addressed by internal controls.

We have nothing to report in this regard.

Opinion on other matters required by the Code of Audit Practice

In our opinion:

- the parts of the Remuneration and Staff Report to be audited have been properly prepared in accordance with IFRSs as adopted by the European Union, as interpreted and adapted by the Department of Health and Social Care Group Accounting Manual 2019 to 2020 and the requirements of the National Health Service Act 2006; and
- except for the possible effects of the matter described in the basis for qualified opinion section of our report, based on the work undertaken in the course of the audit of the financial statements and our knowledge of the Trust gained through our work in relation to the Trust's arrangements for securing economy, efficiency and effectiveness in its use of resources, the other information published together with the financial statements in the Annual Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which we are required to report by exception

Under the Code of Audit Practice, we are required to report to you if:

- we issue a report in the public interest under Section 24 of the Local Audit and Accountability Act 2014 in the course of, or at the conclusion of the audit; or
- we refer a matter to the Secretary of State under Section 30 of the Local Audit and Accountability Act 2014 because we have reason to believe that the Trust, or an officer of the Trust, is about to make, or has made, a decision which involves or would involve the body incurring unlawful expenditure, or is about to take, or has begun to take a course of action which, if followed to its conclusion, would be unlawful and likely to cause a loss or deficiency; or
- we make a written recommendation to the Trust under Section 24 of the Local Audit and Accountability Act 2014 in the course of, or at the conclusion of the audit.

We have nothing to report in respect of the above matters.

Responsibilities of the Directors and Those Charged with Governance for the financial statements

The Directors are responsible for the preparation of the financial statements in the form and on the basis set out in the Accounts Directions, for being satisfied that they give a true and fair view, and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Trust's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless they have been informed by the relevant national body of the intention to dissolve the Trust without the transfer of its services to another public sector entity.

The Audit Committee is Those Charged with Governance. Those Charged with Governance are responsible for overseeing the Trust's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Report on other legal and regulatory requirements – Conclusion on the Trust's arrangements for securing economy, efficiency and effectiveness in its use of resources

Qualified conclusion

On the basis of our work, having regard to the guidance issued by the Comptroller and Auditor General in April 2020, except for the effects of the matters described in the basis for qualified conclusion section of our report we are satisfied that, in all significant respects, East Lancashire Hospitals NHS Trust put in place proper arrangements for securing economy, efficiency and effectiveness in its use of resources for the year ended 31 March 2020.

Basis for qualified conclusion

Our review of the Trust's arrangements for securing efficiency, economy and effectiveness in its use of resources, identified the following matters:

- In line with national guidance, the Trust submitted a draft operational plan to NHS Improvement for 2020/21 in March 2020, which forecast a deficit of £36 million.

The Trust's latest forecasts for 2020/21, based on current national funding arrangements, indicate that a deficit of between £11.9 million and £15.9 million is likely; and

- The Trust's pre-Covid-19 financial planning, which has been suspended nationally due to the Covid-19 national pandemic, identified a Waste Reduction Programme target for 2020/21 of £17 million. There are challenges in the Trust fully delivering this Waste Reduction Programme, which has since been revised to a target of £12.3 million due to an interim financial framework being in place across the NHS because of the Covid-19 pandemic.

These matters identify weaknesses in the Trust's arrangements for setting a sustainable budget with sufficient capacity to absorb emerging cost pressures.

They are evidence of weaknesses in proper arrangements for sustainable resource deployment in planning finances effectively to support the sustainable delivery of strategic priorities and maintain statutory functions.

Responsibilities of the Accountable Officer

The Accountable Officer is responsible for putting in place proper arrangements for securing economy, efficiency and effectiveness in the use of the Trust's resources.

Auditor's responsibilities for the review of the Trust's arrangements for securing economy, efficiency and effectiveness in its use of resources

We are required under Section 21(1)(c) and Schedule 13 paragraph 10(a) of the Local Audit and Accountability Act 2014 to be satisfied that the Trust has made proper arrangements for securing economy, efficiency and effectiveness in its use of resources and to report where we have not been able to satisfy ourselves that it has done so. We are not required to consider, nor have we considered, whether all aspects of the Trust's arrangements for securing economy, efficiency and effectiveness in its use of resources are operating effectively.

We have undertaken our review in accordance with the Code of Audit Practice, having regard to the guidance on the specified criterion issued by the Comptroller and Auditor General in April 2020, as to whether in all significant respects, the Trust had proper arrangements to ensure it took properly informed decisions and deployed resources to achieve planned and sustainable outcomes for taxpayers and local people. The Comptroller and Auditor General determined this criterion as that necessary for us to consider under the Code of Audit Practice in satisfying ourselves whether the Trust put in place proper arrangements for securing economy, efficiency and effectiveness in its use of resources for the year ended 31 March 2020, and to report by exception where we are not satisfied.

We planned our work in accordance with the Code of Audit Practice. Based on our risk assessment, we undertook such work as we considered necessary to be satisfied that the Trust has put in place proper arrangements for securing economy, efficiency and effectiveness in its use of resources.

Report on other legal and regulatory requirements – Certificate

We certify that we have completed the audit of the financial statements of East Lancashire Hospitals NHS Trust in accordance with the requirements of the Local Audit and Accountability Act 2014 and the Code of Audit Practice.

Use of our report

This report is made solely to the Directors of the Trust, as a body, in accordance with Part 5 of the Local Audit and Accountability Act 2014. Our audit work has been undertaken so that we might state to the Trust's Directors those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Trust and the Trust's Directors, as a body, for our audit work, for this report, or for the opinions we have formed.

Gareth Kelly

Finance Report

Financial review for the year ending 31 March 2020

Financial duties

The Trust reported a £5.1 million adjusted financial performance surplus for the 2019-20 financial year. The surplus includes a non-recurrent £12.6 million allocation from the Provider Sustainability Fund and Marginal rate emergency tariff (MRET), approved by the Department of Health and Social Care (DHSC) and HM Treasury. This is in line with the 2019-20 financial plan.

The Trust achieved this outturn whilst delivering a £16.4 million Waste Reduction Programme (WRP) improving the way it delivers services. In addition, the Trust achieved all its other financial duties as set out later in this report.

	2019-20	2018-19
Break-even duty	✓	✓
In year – the Trust must achieve an in-year revenue break-even position (before technical items)	✓	✓
Cumulative – the Trust must deliver a cumulative break-even position (before technical items)	✓	✓
Capital Resource Limit – the Trust must not exceed its resource limit	✓	✓
External Financing Limit – the Trust must not exceed its financing limit	✓	✓

Where our money comes from

In 2019-20, the Trust received income of £567.7 million compared with £512.7 million in the previous year, including £426.8 million for healthcare services provided to people living in East Lancashire and Blackburn with Darwen.

Most of the Trust's income comes from Clinical Commissioning Groups (CCGs) who purchase healthcare on behalf of their local populations. The Trust negotiates an annual contract with the local CCGs for the payment of services.

Where our money goes

From a total revenue spend of £601.1 million in 2019-20, £385.8 million or 64% was spent on staff costs. Throughout the year the Trust employed an average of 7,686 staff and contracted a further average 915 staff.

At £42.1 million, drugs costs were the next highest area of expenditure with the Trust spending a £33.7 million on other clinical supplies and services and a further £16.1 million on clinical negligence 'insurance' premiums.

Capital Expenditure

In total the Trust invested £22.9 million on new building works, improvements and equipment across all its sites.

The Trust has continued to invest in healthcare facilities on all sites including a further £5.0 million on the Fairhurst Building, the new Ophthalmology Department at Burnley General Teaching Hospital, which opened in October 2019 and was funded from Public Dividend Capital (PDC) received from DHSC. An additional £4.5 million of PDC funding has been spent on the new Emergency Care Village at the Royal Blackburn Teaching Hospital site, with further investment of £5.5 million planned in advance of the scheduled opening in December 2020, backed by a further £2.5 million of PDC funding.

In total the Trust invested £22.9 million on new building works, improvements and equipment across all its sites. A summary is provided below:

	£m
Estate infrastructure and environmental improvements	11.4
PFI lifecycle costs	2.4
Information technology equipment	3.5
Medical equipment	4.5
Other capital costs	1.1
Total	**22.9**

Revaluation of land and buildings

A full revaluation of the Trust estate has been carried out as at 31 March 2020, as well as a retrospective valuation as at 1 April 2019, resulting in a £48.0 million reduction in the value of these assets at the end of the financial year. £38.9 million of this valuation adjustment has been charged to operating expenses as a net impairment, although this is excluded from the adjusted financial performance of the Trust. Further detail is set out in note 12.1 to the annual accounts.

External Financing Limit

The External Financing Limit (EFL) is used by DHSC to measure how well the Trust manages its cash resources and is a threshold the Trust is not permitted to overshoot. In 2019-20, the Trust undershot its EFL by £5.9 million and therefore remained within the overall cash limit set by DHSC.

Capital Resource Limit

The Capital Resource Limit (CRL) is used by DHSC to measure how well the Trust controls its spending on capital schemes with the Trust permitted to spend up to its CRL. In 2019-20, the capital investment made by the Trust represented an underspend by less than £0.1 million against the CRL set by DHSC of £22.6 million.

Better Payment Practice code

Although it is not a financial duty, the Trust met the Better Payment Practice Code target by paying more than 95% of undisputed invoices within 30 days of receipt of the goods or invoice, whichever is the later.

Prompt Payments Code

The Trust continues to support the Department of Health and Social Care's prompt payment code which is an initiative developed by HM Treasury and the Institute of Credit Management (ICM). Details of this code can be found at www.promptpaymentcode.org.uk

Payments made to non-NHS organisations (value)

	2019-20	2018-19
Total invoices paid (£m)	299.3	225.7
Total invoices paid in target (£m)	294.0	216.6
Percentage achievement	98.2%	96.0%

Charges for information

The Trust does not make charges for information, save for those required in relation to medical records in line with the relevant legislation. The Trust has complied with HM Treasury's guidance on setting charges for information.

Finance income

The Trust receives income from the interest earned on the management of its cash balances. Finance income in 2019-20 amounted to £0.3 million, compared with £0.2 million earned in 2018-19.

Counter Fraud

The Trust is committed to maintaining high standards of honesty, openness and integrity within the organisation. With this it supports the work of the National Fraud Initiative. The Trust has a designated accredited local counter fraud specialist.

External audit

The Trust appointed Grant Thornton to carry out the external audit of the 2019-20 accounts at a cost of £67,920.

Financial Outlook for 2020-21

The financial outlook for the NHS is uncertain due to the Covid-19 pandemic. Prior to pandemic the Trust had submitted a draft annual financial plan of a £36.4 million deficit, which included a Waste Reduction Programme of £17 million. Since the submission of the draft financial plan the planning round has been suspended for the NHS, for the first four months of the financial year NHS England/Improvement have set block contracts with further guidance on the outlook for 2020-21 expected imminently.

In response to the global pandemic the full planning round was suspended including the financial plans. The Trust is to be monitored against a breakeven position for 1 April to 31 July 2020 after receipt of top up funding and is currently awaiting further guidance for the remainder of the financial year.

Annual Accounts

Restrictions on movement in the United Kingdom in March 2020, as a result of the Covid-19 pandemic, meant that the Trust's auditor, Grant Thornton UK LLP, was unable to attend year-end inventory counts to complete procedures required by auditing standards. For this reason only, the auditor has issued a qualified opinion. The qualification is a technical 'limitation of scope' and does not imply any criticism of the Trust or any weaknesses in the Trust's internal controls. We are aware that a number of NHS trusts in the country are affected by the same issue in 2019-20 and the Trust is satisfied that its inventory balance is presented fairly in all material respects.

The Trust has prepared the Annual Accounts 2019-20 on a going concern basis, but has disclosed a material uncertainty in respect of the financial outlook for 2020-21 as, at the time of preparing the accounts, the funding regime for the year had not been finalised. This is a direct result of the Covid-19 pandemic and the subsequent halt to the financial planning process

Remuneration Report

The remuneration report, which is subject to audit, sets out the amounts awarded to Trust Board members, as the Trust's senior managers, being those persons in senior positions having authority or responsibility for directing or controlling the major activities of the Trust. This means those who influence the decisions of the entity as a whole rather than the decisions of individual directorates or departments. Since Non-Executive Board members do not receive pensionable remuneration, there are no entries in respect of their pensions.

*Leave of absence from 10 May 2019 to 3 October 2019.

Since none of the members of the Trust Board included in the table above are members of stakeholder pension schemes, the Trust has not made any related contributions.

Fair Pay Disclosure (subject to audit)

No director received performance related pay or bonuses for their director related services. East Lancashire Hospitals NHS Trust is required to disclose the relationship between the remuneration of the highest-paid director in the organisation and the median remuneration of the organisation's workforce.

The banded remuneration of the highest paid director in the Trust in the financial year 2019-20 was £150,000-155,000 (2018-19: £205,000-£210,000). This was 5.9 times (2018-19 8.4 times) the median remuneration of the workforce, which was £26,018 (2018-19: £24,824). The median pay calculation does not include external agency staff costs. All agency staff are paid via invoices and may include commission charges to the agencies.

In 2019-20, 71 employees (2018-19: 2 employees) received remuneration in excess of the highest-paid director. This follows a change to the highest paid director as a result of the sharing arrangement with Blackpool Teaching Hospital NHS Foundation Trust in relation to the Chief Executive Officer. Remuneration ranged from £636 to £264,519 (2018-19: £379 to £247,582).

Total remuneration for the purposes of the highest paid director calculation includes salary, non-consolidated performance-related pay, benefits-in-kind, but not severance payments. It does not include employer pension contributions and the cash equivalent transfer value of pensions.

* For these members of the Trust Board, the accrued pension completed, lump sum and cash equivalent transfer values as at 31 March 2020, as well as the real increase shown in the table above and the pension related benefits in the table of Salaries and Allowances, do not take account of the 1.32% consolidated pay award and 0.77% non-consolidated cash award backdated to 1 April 2019 approved by the Trust's Remuneration Committee on 11 March 2020 in line with national guidance.

** For the Chief Executive Officer, Kevin McGee and the Executive Director of Human Resources & Organisational Development, Kevin Moynes, the real increases shown in the table above, as well as the pension related benefits in the table of Salaries and Allowances, have been adjusted to take account of the two and half days a week worked for Blackpool Teaching Hospitals NHS Foundation Trust.

*** The Executive Director of Nursing, Christine Pearson and the Executive Director of Operations, John Bannister, opted out of the NHS Pension Scheme on 1st April 2019.

**** There is no CETV value on reaching Normal Pension age (NPA).

Cash Equivalent Transfer Values

A Cash Equivalent Transfer Value (CETV) is the actuarially assessed capital value of the pension scheme benefits accrued by a member at a particular point in time. The benefits valued are the member's accrued benefits and any contingent spouse's pension payable from the scheme. A CETV is a payment made by a pension scheme or arrangement to secure pension benefits in another pension scheme or arrangement when the member leaves a scheme and chooses to transfer the benefits accrued in their former scheme. The pension figures shown relate to the benefits that the individual has accrued as a consequence of their total membership of the pension scheme, not just their service in a senior capacity to which disclosure applies. The CETV figures and the other pension details include the value of any pension benefits in another scheme or arrangement which the individual has transferred to the NHS pension scheme. They also include any additional pension benefit accrued to the member as a result of their purchasing additional years of pension service in the scheme at their own cost. CETVs are calculated within the guidelines and framework prescribed by the Institute and Faculty of Actuaries.

Real Increase in CETV

This reflects the increase in CETV effectively funded by the employer. It does not include the increase in accrued pension due to inflation, contributions paid by the employee (including the value of any benefits transferred from another scheme or arrangement) and uses common market valuation factors for the start and end of the period.

Further information on how pension liabilities are treated can be found in note 8.3 of the Trust annual accounts.

Quality Report

The Trust has published its Annual Quality Account in line with Department of Health and Social Care requirements and this is available on our website at www.elht.nhs.uk. This Annual Report should be read in conjunction with our Quality Account which provides further key information about the Trust and our performance against quality requirements. It also highlights our major successes in the financial year.

Information on reserves

Public dividend capital

Public dividend capital (PDC) is a type of public sector equity finance based on the excess of assets over liabilities. Additional PDC may also be issued to NHS trusts by the Department of Health and Social Care (DHSC). A charge, reflecting the cost of capital utilised by the Trust, is payable to the DHSC, as the annual PDC dividend, in two instalments, the second of which is payable in March based on the estimate dividend payable. Any difference to the actual dividend payable is settled in the following financial year.

Revaluation reserve

Increases in asset values arising from revaluations are recognised in the revaluation reserve, except where, and to the extent that, they reverse impairments previously recognised in operating expenses, in which case they are recognised in operating expenses. Subsequent downward movements in asset valuations are charged to the revaluation reserve to the extent that a previous gain was recognised unless the downward movement represents a clear consumption of economic benefit or a reduction in service potential.

Income and expenditure reserve

The balance of this reserve represents the accumulated surpluses and deficits of the Trust.

Statement of cash flows

Public dividend capital (PDC) received in 2019-20 has been used to fund specific capital projects with £4.5m received for the Phase 6 development on the Royal Blackburn Teaching Hospital site and £3.7m received for the Phase 8 development on the Burnley General Teaching Hospital site.

Notes to the accounts

1. Accounting policies and other information

1.1 Basis of preparation

The Department of Health and Social Care (DHSC) has directed that the financial statements of the Trust shall meet the accounting requirements of the DHSC Group Accounting Manual (GAM), which shall be agreed with HM Treasury. Consequently, the following financial statements have been prepared in accordance with the GAM 2019-20 issued by the DHSC. The accounting policies contained in the GAM follow International Financial Reporting Standards to the extent that they are meaningful and appropriate to the NHS, as determined by HM Treasury, which is advised by the Financial Reporting Advisory Board. Where the GAM permits a choice of accounting policy, the accounting policy that is judged to be most appropriate to the particular circumstances of the trust for the purpose of giving a true and fair view has been selected. The particular policies adopted are described below. These have been applied consistently in dealing with items considered material in relation to the accounts.

1.2 Accounting convention

These accounts have been prepared under the historical cost convention modified to account for the revaluation of certain property, plant and equipment, inventories and certain financial assets and financial liabilities.

1.3 Going concern

Management has assessed the ability of the Trust to continue as a going concern, considering events and conditions that may cast significant doubt upon its ability to do so. Since it is unaware of any prospect of dissolution within the next twelve months and so anticipates the continuation of the provision of services in the foreseeable future from its existing hospital sites, these accounts have been prepared on a going concern basis.

As well as performance against its statutory and other financial duties, the events and conditions considered by Management include reliance on non-recurrent items, the need for significant improvements to the Trust's estate, excessive reliance on borrowing, significant concerns raised about finances or the quality of services raised by the Care Quality Commission or an inability to pay suppliers on time.

The Trust has reported an adjusted financial performance surplus of £5.1 million for 2019-20 and has met the control total set by NHS England and NHS Improvement for 2019-20, subject to an allowance made for the impact of the change in discount rate applied to the calculation of post-employment benefit provisions.

Following changes to national funding arrangements for NHS Trusts in response to the COVID-19 pandemic, the 2020-21 draft financial plan prepared in March 2020, which reported a £36.4 million deficit, is yet to be finalised and updated to take account of its impact, with the Trust due to report an adjusted financial performance break-even position to July 2020.

Current arrangements are expected to be extended for the remainder of the 2020-21 financial year and may continue into 2021-22, although in the event that current arrangements are discontinued, the Trust expects that any shortfall in earned income over expenditure for the remainder of the year will be met in the form of revenue support from the Department of Health and Social Care.

However, since this additional support has not been confirmed, these current conditions at this exact time are considered to represent a material uncertainty that may cast significant doubt about the Trust's ability to continue as a going concern.

1.4 Sources of estimation uncertainty

The following are assumptions about the future and other major sources of estimation uncertainty that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year:

Non-current asset valuations

Valuation services are provided to the Trust by Cushman & Wakefield, a property services firm whose valuers are registered with the Royal Institute of Chartered Surveyors (RICS), the regulatory body for the valuation services industry. A full valuation of land and buildings has been carried out as at 31 March 2020 to ensure that the carrying amount of these assets does not differ materially from their fair value, reflecting the current economic conditions and the location factor for the North West of England.

However, in applying the RICS Valuation Global Standards current at the valuation date, the valuer has declared a 'material valuation uncertainty' in the valuation report. This is on the basis of uncertainties in markets caused by COVID-19. While the valuer has declared this material valuation uncertainty, the valuer has continued to exercise professional judgement in providing the valuation and so this remains the best information available to the Trust.

The valuations for PFI buildings exclude VAT on the basis that the replacement of these assets would be carried out under a special purchase vehicle where VAT would be recoverable.

Private Finance Initiative (PFI) – unitary payment

PFI annual contract payments are split between three elements, the payment for services, payment for property (comprising repayment of the liability, finance cost and contingent rental) and lifecycle replacement. The Trust has adopted the national PFI accounting guidance to determine the split between these elements.

Clinical negligence liabilities

The provisions of NHS Resolution in respect of clinical negligence liabilities relating to the Trust, as disclosed in the provisions note, are estimated by NHS Resolution on a case by case basis.

1.5 Critical judgements in applying accounting policies

The following are the judgements, apart from those involving estimations (see below) that management has made in the process of applying the Trust accounting policies and that have the most significant effect on the amounts recognised in the financial statements:

PFI liabilities

PFI liabilities, which are accounted for as finance leases, are rebased on an annual basis using the most current applicable RPI indices. On this basis, the Trust does not consider the fair value of these liabilities to differ materially from the reported carrying value.

Segmental reporting

The Trust has one material segment, being the provision of healthcare, primarily to NHS patients. Divisions within the Trust all have similar economic characteristics with healthcare activity being undertaken via ward-based hospital care and through a range of primary care and community services. Segmental reporting is not considered necessary for private patient activity on materiality grounds.

Non-current asset valuations

Since 2017-18 the Trust has adopted an alternative site valuation model, whereby the valuation of its estate is based on the value of the modern equivalent asset required to deliver the services the Trust currently provides without taking account of the existing estate and its current utilisation.

1.6 Revenue from contracts with customers

Where income is derived from contracts with customers, it is accounted for under IFRS 15. The GAM expands the definition of a contract to include legislation and regulations which enables an entity to receive cash or another financial asset that is not classified as a tax by the Office of National Statistics (ONS).

Revenue in respect of goods/services provided is recognised when (or as) performance obligations are satisfied by transferring promised goods/services to the customer and is measured at the amount of the transaction price allocated to those performance obligations. At the end of the financial year, the Trust accrues income relating to performance obligations satisfied in that year. Where the Trust's entitlement to consideration for those goods or services is unconditional a contract receivable will be recognised. Where entitlement to consideration is conditional on a further factor other than the passage of time, a contract asset will be recognised. Where consideration received or receivable relates to a performance obligation that is to be satisfied in a future period, the income is deferred and recognised as a contract liability.

Revenue from NHS contracts

The main source of income for the Trust is contracts with commissioners for health care services. A performance obligation relating to delivery of a spell of health care is generally satisfied over time as healthcare is received and consumed simultaneously by the customer as the Trust performs it. The customer in such a contract is the commissioner, but the customer benefits as services are provided to their patient. Even where a contract could be broken down into separate performance obligations, healthcare generally aligns with paragraph 22(b) of the Standard entailing a delivery of a series of goods or services that are substantially the same and have a similar pattern of transfer. At the end of the financial year, the Trust accrues income relating to activity delivered in that year, where a patient care spell is incomplete. This accrual is disclosed as a contract receivable as entitlement to payment for work completed is usually only dependent on the passage of time.

Provider sustainability fund (PSF)

The PSF enable providers to earn income linked to the achievement of financial controls. Income earned from the funds is accounted for as variable consideration.

1.7 Expenditure on employee benefits

Short-term employee benefits

Salaries, wages and employment-related payments such as social security costs and the apprenticeship levy are recognised in the period in which the service is received from employees.

Pension costs

Past and present employees are covered by the provisions of the two NHS Pension Schemes. Both schemes are unfunded, defined benefit schemes that cover NHS employer, general practices and other bodies, allowed under the direction of Secretary of State for Health and Social Care in England and Wales. The schemes are not designed in a way that would enable employers to identify their share of the underlying scheme assets and liabilities. Therefore, the schemes are accounted for as though they are defined contribution schemes: the cost to the Trust is taken as equal to the employer's pension contributions payable to the scheme for the accounting period. These contributions are charged to operating expenses as they become due.

Additional pension liabilities arising from early retirements are not funded by the scheme except where the retirement is due to ill-health. The full amount of the liability for the additional costs is charged to the operating expenses at the time the Trust commits itself to the retirement, regardless of the method of payment.

1.8 Expenditure on goods and services

Expenditure on goods and services is recognised when, and to the extent that they have been received, regardless of whether payment has been made, and is measured at the fair value of those goods and services. Expenditure is recognised in operating expenses except where it results in the creation of a non-current asset such as property, plant and equipment.

1.9 Property, plant and equipment

Recognition

Property, plant and equipment is capitalised where:

- it is held for use in delivering services or for administrative purposes
- it is probable that future economic benefits will flow to, or service potential be provided to, the Trust
- it is expected to be used for more than one financial year
- the cost of the item can be measured reliably
- the item has cost of at least £5,000
- collectively, a number of items have a cost of at least £5,000 and individually have cost of more than £250, where the assets are functionally interdependent, had broadly simultaneous purchase dates, are anticipated to have similar disposal dates and are under single managerial control, or
- items form part of the initial equipping and setting-up cost of a new building, ward or unit, irrespective of their individual or collective cost.

Subsequent expenditure

Subsequent expenditure relating to an item of property, plant and equipment is recognised as an increase in the carrying amount of the asset when it is probable that additional future economic benefits or service potential deriving from the cost incurred to replace a component of such item will flow to the enterprise and the cost of the item can be determined reliably. Other expenditure that does not generate additional future economic benefits or service potential, such as repairs and maintenance is charged to the Statement of Comprehensive Income in the period in which it is incurred.

Measurement

Valuation

All property, plant and equipment assets are measured initially at cost, representing the costs directly attributable to acquiring or constructing the asset and bringing it to the location and condition necessary for it to be capable of operating in the manner intended by management.

Assets are measured subsequently at valuation. Assets which are held for their service potential and are in use (ie operational assets used to deliver either front line services or back office functions) are measured at their current value in existing use. Assets that were most recently held for their service potential but are surplus with no plan to bring them back into use are measured at fair value where there are no restrictions on sale at the reporting date and where they do not meet the definitions of investment properties or assets held for sale.

Revaluations of property, plant and equipment are performed with sufficient regularity to ensure that carrying values are not materially different from those that would be determined at the end of the reporting period. Current values in existing use are determined as follows:

- Land and non-specialised buildings – market value for existing use.
- Specialised buildings – depreciated replacement cost on a modern equivalent asset basis.

For specialised assets, current value in existing use is interpreted as the present value of the asset's remaining service potential, which is assumed to be at least equal to the cost of replacing that service potential. Specialised assets are therefore valued at their depreciated replacement cost (DRC) on a modern equivalent asset (MEA) basis. An MEA basis assumes that the asset will be replaced with a modern asset of equivalent capacity and location requirements of the services being provided. Assets held at depreciated replacement cost have been valued on an alternative site basis where this would meet the location requirements.

Valuation guidance issued by the Royal Institute of Chartered Surveyors states that valuations are performed net of VAT where the VAT is recoverable by the entity. This basis has been applied to the Trust's Private Finance Initiative (PFI) scheme where the construction is completed by a special purpose vehicle and the costs have recoverable VAT for the Trust.

Properties in the course of construction for service or administration purposes are carried at cost, less any impairment loss, but are revalued when brought into use. Cost includes professional fees.

IT equipment, transport equipment, furniture and fittings, and plant and machinery that are held for operational use are valued at depreciated historic cost where these assets have short useful lives or low values or both, as this is not considered to be materially different from current value in existing use.

Properties in the course of construction for service or administration purposes are carried at cost, less any impairment loss, but are revalued when brought into use.

Cost includes professional fees.

IT equipment, transport equipment, furniture and fittings, and plant and machinery that are held for operational use are valued at depreciated historic cost where these assets have short useful lives or low values or both, as this is not considered to be materially different from current value in existing use.

Depreciation

Items of property, plant and equipment are depreciated over their remaining useful lives in a manner consistent with the consumption of economic or service delivery benefits. Freehold land is considered to have an infinite life and is not depreciated. Assets in the course of construction are not depreciated until the asset is brought into use.

Revaluation gains and losses

Revaluation gains are recognised in the revaluation reserve, except where, and to the extent that, they reverse a revaluation decrease that has previously been recognised in operating expenses, in which case they are recognised in operating expenditure.

Revaluation losses are charged to the revaluation reserve to the extent that there is an available balance for the asset concerned, and thereafter are charged to operating expenses.

Gains and losses recognised in the revaluation reserve are reported in the Statement of Comprehensive Income as an item of 'other comprehensive income'.

Impairments

In accordance with the GAM, impairments that arise from a clear consumption of economic benefits or of service potential in the asset are charged to operating expenses. A compensating transfer is made from the revaluation reserve to the income and expenditure reserve of an amount equal to the lower of the impairment charged to operating expenses and the balance in the revaluation reserve attributable to that asset before the impairment.

An impairment that arises from a clear consumption of economic benefit or of service potential is reversed when, and to the extent that, the circumstances that gave rise to the loss is reversed. Reversals are recognised in operating expenditure to the extent that the asset is restored to the carrying amount it would have had if the impairment had never been recognised.

Any remaining reversal is recognised in the revaluation reserve. Where, at the time of the original impairment, a transfer was made from the revaluation reserve to the income and expenditure reserve, an amount is transferred back to the revaluation reserve when the impairment reversal is recognised.

Other impairments are treated as revaluation losses. Reversals of 'other impairments' are treated as revaluation gains.

Private Finance Initiative (PFI) transactions

PFI transactions which meet the IFRIC 12 definition of a service concession, as interpreted in HM Treasury's FReM, are accounted for as 'on-Statement of Financial Position' by the Trust. In accordance with HM Treasury's FReM, the underlying assets are recognised as property, plant and equipment, together with an equivalent liability. Subsequently, the assets are accounted for as property, plant and equipment.

The annual contract payments are apportioned between the repayment of the liability, a finance cost, the charges for services and lifecycle replacement of asset components, which are capitalised where they meet the Trust's criteria for capital expenditure. The element of the annual unitary payment increase due to cumulative indexation is treated as contingent rent and is expensed as incurred.

The service charge is recognised in operating expenses and the finance cost is charged to finance costs in the Statement of Comprehensive Income.

Useful economic lives of property, plant and equipment

Useful lives reflect the total life of an asset and not the remaining life of an asset. The range of useful lives are shown in the table below:

	Min life Years	Max life Years
Buildings	60	90
Plant & machinery	3	25
Information technology	5	10
Other property, plant and equipment	5	26

1.10 Inventories

Inventories are valued at current cost. This is considered to be a reasonable approximation to determine fair value due to the high turnover of stocks.

1.11 Cash and cash equivalents

Cash is cash in hand and deposits with any financial institution repayable without penalty on notice of not more than 24 hours. Cash equivalents are investments that mature in three months or less from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in value.

In the Statement of Cash Flows, cash and cash equivalents are shown net of bank overdrafts that are repayable on demand and that form an integral part of the Trust's cash management. Cash, bank and overdraft balances are recorded at current values.

1.12 Financial assets and financial liabilities

Recognition

Financial assets and financial liabilities arise where the Trust is party to the contractual provisions of a financial instrument, and as a result has a legal right to receive or a legal obligation to pay cash or another financial instrument. The GAM expands the definition of a contract to include legislation and regulations which give rise to arrangements that in all other respects would be a financial instrument and do not give rise to transactions classified as a tax by ONS.

This includes the purchase or sale of non-financial items (such as goods or services), which are entered into in accordance with the Trust's normal purchase, sale or usage requirements and are recognised when, and to the extent which, performance occurs, ie, when receipt or delivery of the goods or services is made.

Classification and measurement

Financial assets and financial liabilities are initially measured at fair value plus or minus directly attributable transaction costs except where the asset or liability is not measured at fair value through income and expenditure. Fair value is taken as the transaction price, or otherwise determined by reference to quoted market prices or valuation techniques.

Financial assets and financial liabilities at amortised cost are those held with the objective of collecting contractual cash flows and where cash flows are solely payments of principal and interest. This includes cash equivalents, contract and other receivables, trade and other payables, rights and obligations under PFI arrangements and loans payable. All of the Trust's financial assets and financial liabilities are classified on this basis.

After initial recognition, these financial assets and financial liabilities are measured at amortised cost using the effective interest method less any impairment (for financial assets). The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset or to the amortised cost of a financial liability.

Interest revenue or expense is calculated by applying the effective interest rate to the gross carrying amount of a financial asset or amortised cost of a financial liability and recognised in the Statement of Comprehensive Income and a financing income or expense. In the case of DHSC loans held, the effective interest rate is the nominal rate of interest charged on the loan.

They are included in current liabilities except for amounts payable more than 12 months after the Statement of Financial Position date, which are classified as long-term liabilities.

De-recognition

Financial assets are de-recognised when the contractual rights to receive cash flows from the assets have expired or the Trust has transferred substantially all the risks and rewards of ownership.

Financial liabilities are de-recognised when the obligation is discharged, cancelled or expires.

1.13 Leases

Leases are classified as finance leases when substantially all the risks and rewards of ownership are transferred to the lessee. All other leases are classified as operating leases. All Trust leases are operating leases.

The Trust as lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. Lease incentives are recognised initially in other liabilities on the statement of financial position and subsequently as a reduction of rentals on a straight-line basis over the lease term.

Contingent rentals are recognised as an expense in the period in which they are incurred.

Where a lease is for land and buildings, the land component is separated from the building component and the classification for each is assessed separately.

The Trust as lessor

Rental income from operating leases is recognised on a straight-line basis over the term of the lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised as an expense on a straight-line basis over the lease term.

1.14 Provisions

The Trust recognises a provision where it has a present legal or constructive obligation of uncertain timing or amount; for which it is probable that there will be a future outflow of cash or other resources; and a reliable estimate can be made of the amount. The amount recognised in the Statement of Financial Position is the best estimate of the resources required to settle the obligation. Where the effect of the time value of money is significant, the estimated risk-adjusted cash flows are discounted using HM Treasury's discount rates. Early retirement provisions and injury benefit provisions both use the HM Treasury's pension discount rate of minus 0.5% in real terms.

Clinical negligence costs

NHS Resolution operates a risk pooling scheme under which the Trust pays an annual contribution to NHS Resolution, which, in return, settles all clinical negligence claims. Although NHS Resolution is administratively responsible for all

clinical negligence cases, the legal liability remains with the Trust. The total value of clinical negligence provisions carried by NHS Resolution on behalf of the Trust is disclosed in the provisions note but is not recognised in the Trust's accounts.

Non-clinical risk pooling

The Trust participates in the Property Expenses Scheme and the Liabilities to Third Parties Scheme. Both are risk pooling schemes under which the Trust pays an annual contribution to NHS Resolution and in return receives assistance with the costs of claims arising. The annual membership contributions, and any 'excesses' payable in respect of particular claims are charged to operating expenses when the liability arises.

1.15 Public dividend capital

Public dividend capital (PDC) is a type of public sector equity finance based on the excess of assets over liabilities at the time of establishment of the predecessor NHS organisation. HM Treasury has determined that PDC is not a financial instrument within the meaning of IAS 32.

The Secretary of State can issue new PDC to, and require repayments of PDC from, the Trust. PDC is recorded at the value received.

A charge, reflecting the cost of capital utilised by the Trust, is payable as public dividend capital dividend. The charge is calculated at the rate set by HM Treasury (currently 3.5%) on the average relevant net assets of the Trust during the financial year. Relevant net assets are calculated as the value of all assets less the value of all liabilities, except for:

(i) donated assets,

(ii) average daily cash balances held with the Government Banking Services (GBS) and National Loans Fund (NLF) deposits, excluding cash balances held in GBS accounts that relate to a short-term working capital facility, and

(iii) the receivable associated with the PSF incentive and PSF bonus, and

(iv) for 2019-20, the net book value of assets purchased in response to COVID 19.

In accordance with the requirements laid down by the DHSC (as the issuer of PDC), the dividend for the year is calculated on the actual average relevant net assets as set out in the 'pre-audit' version of the annual accounts. The dividend thus calculated is not revised should any adjustment to net assets occur as a result the audit of the annual accounts.

1.16 Value added tax

Most of the activities of the Trust are outside the scope of VAT and, in general, output tax does not apply and input tax on purchases is not recoverable. Irrecoverable VAT is charged to the relevant expenditure category or included in the capitalised purchase cost of non-current assets. Where output tax is charged or input VAT is recoverable, the amounts are stated net of VAT.

1.17 Losses and special payments

Losses and special payments are items that Parliament would not have contemplated when it agreed funds for the health service or passed legislation. By their nature they are items that ideally should not arise. They are therefore subject to special control procedures compared with the generality of payments. They are divided into different categories, which govern the way that individual cases are handled. Losses and special payments are charged to the relevant functional headings in expenditure on an accruals basis.

The losses and special payments note is compiled directly from the losses and compensations register which reports on an accrual basis with the exception of provisions for future losses.

1.18 Charitable funds

Under the provisions of IAS27 'Consolidated and Separate Financial Statements', those Charitable Funds that fall under common control with NHS bodies are consolidated within the entity's financial statements. The Trust has not consolidated the accounts of the ELHT&Me, the charity for which the Trust is the corporate trustee, on the basis of immateriality.

1.19 Intangible assets

Recognition

Intangible assets are non-monetary assets without physical substance which are capable of being sold separately from the rest of the trust's business or which arise from contractual or other legal rights. They are recognised only where it is probable that future economic benefits will flow to, or service potential be provided to, the trust and where the cost of the asset can be measured reliably.

Software

Software which is integral to the operation of hardware is capitalised as part of the relevant item of property, plant and equipment. Software which is not integral to the operation of hardware is capitalised as an intangible asset.

Measurement

Intangible assets are recognised initially at cost, comprising all directly attributable costs needed to create, produce and prepare the asset to the point that it is capable of operating in the manner intended by management. Subsequently intangible assets are measured at depreciated historic cost which is considered to be a reasonable approximation to determine fair value due to their low useful asset lives.

Amortisation

Intangible assets are amortised over their expected useful lives in a manner consistent with the consumption of economic or service delivery benefits.

Useful lives of intangible assets

Useful lives reflect the total life of an asset and not the remaining life of an asset, which range from 1 to 10 years.

1.20 Early adoption of standards, amendments and interpretations

No new accounting standards or revisions to existing standards have been adopted early in 2019-20.

1.21 Standards, amendments and interpretations in issue but not yet effective or adopted

IFRS 16 Leases

IFRS 16 Leases will replace IAS 17 Leases, IFRIC 4 Determining whether an arrangement contains a lease and other interpretations and is applicable in the public sector for periods beginning 1 April 2021. The standard provides a single accounting model for lessees, recognising a right of use asset and obligation in the statement of financial position for most leases: some leases are exempt through application of practical expedients explained below. For those recognised in the statement of financial position the standard also requires the remeasurement of lease liabilities in specific circumstances after the commencement of the lease term. For lessors, the distinction between operating and finance leases will remain and the accounting will be largely unchanged.

IFRS 16 changes the definition of a lease compared to IAS 17 and IFRIC 4. The Trust will apply this definition to new leases only and will grandfather its assessments made under the old standards of whether existing contracts contain a lease.

On transition to IFRS 16 on 1 April 2021, the Trust will apply the standard retrospectively with the cumulative effect of initially applying the standard recognised in the income and expenditure reserve at that date. For existing operating leases with a remaining lease term of more than 12 months and an underlying asset value of at least £5,000, a lease liability will be recognised equal to the value of remaining lease payments discounted on transition at the Trust's incremental borrowing rate. The Trust's incremental borrowing rate will be a rate defined by HM Treasury. Currently this rate is 1.27% but this may change between now and adoption of the standard. The related right of use asset will be measured equal to the lease liability adjusted for any prepaid or accrued lease payments. No adjustments will be made on 1 April 2021 for existing finance leases.

For leases commencing in 2021-22, the Trust will not recognise a right of use asset or lease liability for short term leases (less than or equal to 12 months) or for leases of low value assets (less than £5,000). Right of use assets will be subsequently measured on a basis consistent with owned assets and depreciated over the length of the lease term.

HM Treasury revised the implementation date for IFRS 16 in the UK public sector to 1 April 2021 on 19 March 2020. Due to the need to reassess lease calculations, together with uncertainty on expected leasing activity in from April 2021 and beyond, a quantification of the expected impact of applying the standard in 2021-22 is currently impracticable.

2. Income from patient care activities

2.1 Income from patient care activities (by nature)

	2019-20 £000s	Restated 2018-19 £000s
Acute services		
Elective income	**63,302**	61,019
Non-elective income	**142,066**	121,063
First outpatient income	**40,041**	45,168
Follow up outpatient income	**29,608**	21,075
A&E income	**25,139**	21,645
High cost drugs income from Commissioners*	**29,538**	30,053
Other NHS clinical income	**108,003**	106,813
Community services		
Income from Clinical Commissioning Groups and NHS England	**43,181**	41,560
All trusts		
AfC pay award central funding**	**0**	5,102
Additional pension contribution central funding ***	**14,668**	0
Other clinical income	**22,404**	14,972
Total income from patient care activities	**517,950**	468,470

* Comparatives have been restated to separately identify high cost drugs income from Commissioners, previously included within other NHS clinical income.

** Additional costs of the Agenda for Change pay reform in 2018-19 received central funding. From 2019-20 this funding is incorporated into the National tariff.

*** The employer contribution rate for NHS pensions increased from 14.3% to 20.6% (excluding administration charge) from 1 April 2019. For 2019-20, the Trust continued to pay over contributions at the former rate with the additional amount being paid over by NHS England on providers' behalf. The full cost and related funding have been recognised in these accounts.

2.2 Income from patient care activities (by source)

	2019-20 £000s	Restated 2018-19 £000s
NHS England	**73,661**	48,627
Clinical Commissioning Groups	**438,568**	409,821
Department of Health and Social Care	**0**	5,102
Other NHS bodies	**1,111**	1,195
Injury costs recovery	**2,259**	1,970
Other	**2,351**	1,755
Total income from patient care activities	**517,950**	468,470

Other income from patient care activities includes £0.7m from local authorities (2018-19: £0.7m), which was previously separately disclosed, £0.2m from private patients (2018-19: £0.2m) and £0.4m from overseas visitors (2018-19: £0.3m).

All income from patient care activities relates to contract income.

3. Other operating income

	2019-20 £000s	2018-19 £000s
Other operating income from contracts with customers:		
Research and development	**4,076**	1,481
Education and training	**16,692**	13,854
Non-patient care services to other bodies	**10,095**	10,848
Provider sustainability fund / Marginal rate emergency tariff income (PSF/MRET)	**12,632**	11,911
Other contract operating income	**4,772**	5,000
Other non-contract operating income	**1,239**	875
Total other operating income	**49,506**	43,969
Total operating income	**567,456**	512,439

PSF/MRET income includes a core allocation of £12.6m (2018-19: £5.6m) and a nil incentive allocation (2018-19: £6.3m) for achieving the annual financial control total set by NHS England and NHS Improvement.

Revenue is almost totally from the supply of services. Revenue from the sale of goods is immaterial.

4. Operating expenses

	2019-20 £000s	2018-19 £000s
Purchase of healthcare from non-NHS and non-DHSC bodies	**4,478**	4,436
Staff and executive directors costs – refer to note 8.1 for further detail	**385,787**	345,429
Supplies and services – clinical	**33,717**	34,227
Supplies and services – general	**7,484**	7,472
Drugs costs	**42,093**	40,183
Establishment	**6,899**	6,505
Business rates paid to local authorities	**2,453**	3,066
Premises – other	**12,331**	11,960
Depreciation on property, plant and equipment	**9,476**	8,906
Amortisation on intangible assets	**1,649**	1,528
Net impairments	**38,866**	(1,682)
Clinical negligence premium	**16,097**	17,838
Education and training	**2,822**	950
Rentals under operating leases	**9,239**	8,197
PFI charges to operating expenditure	**8,918**	8,046
Other operating expenses	**7,080**	4,776
Total operating expenses	**589,389**	501,837

Other operating expenses include £1.0m for outsourced financial services (2018-19: £1.0m) and £1.0m for transport services (2018-19: £1.0m).

5. External audit

Audit fees payable to the external auditor for the Trust's statutory audit were £67,920, inclusive of VAT (2018-19: £57,120). Other auditor remuneration in 2019-20 was nil (2018-19: £18,942).

The limitation on the auditor's liability for external audit work is £1.0m (2018-19: £1.0m).

6. Impairment of assets

	2019-20 £000s	2018-19 £000s
Net impairments charged to operating surplus / deficit resulting from:		
Changes in market price	**38,866**	(1,682)
Other	**0**	0
Total net impairments charged to operating surplus / deficit	**38,866**	(1,682)
Impairments charged to the revaluation reserve	**9,891**	364
Total net impairments	**48,757**	(1,318)

For 2019-20, net impairments predominantly relate to the valuations of land and buildings provided by Cushman & Wakefield, the Trust's external valuer. Net impairments of £27.2m were charged to operating expenses for the valuation as at the start of the financial year, with £9.4m of impairments charged to the revaluation reserve.

To ensure the carrying amount of land and buildings does not differ materially from its fair value at 31 March 2020, a further £11.7m of net impairments was charged to operating expenses and a further £0.5m of impairments charged to the revaluation reserve to reflect the year end valuation.

7. Operating leases

Trust as lessee

	Property £000s	Other £000s	2019-20 Total £000s	2018-19 Total £000s
Operating lease expense				
Minimum lease payments	**5,570**	**3,669**	**9,239**	8,197
Total	**5,570**	**3,669**	**9,239**	8,197
Future minimum lease payments due:				
– not later than one year	**0**	**2,436**	**2,436**	2,300
– later than one year and not later than five years	**0**	**6,076**	**6,076**	6,436
– later than five years	**0**	**0**	**0**	352
Total	**0**	**8,512**	**8,512**	9,088

Property related lease arrangements predominantly relate to the occupation of properties by the Trust's community based services, where there is no future commitment. Total future minimum lease payments include £4.4m relating to two managed equipment contracts for Pathology services.

Trust as lessor

	2019-20 £000s	2018-19 £000s
Operating lease revenue		
Minimum lease receipts	**244**	306
Total	**244**	306
Future minimum lease receipts due:		
– not later than one year	**238**	238
– later than one year and not later than five years	**956**	955
– later than five years	**26,242**	26,482
Total	**27,436**	27,675

Future minimum lease receipts relates to the long term arrangement with Lancashire Care NHS Foundation Trust for their use of property on the Royal Blackburn Teaching Hospital site.

8. Employee benefits

8.1 Employee benefits

	2019-20 £000s	2018-19 £000s
Salaries and wages	**293,513**	271,648
Social security costs	**30,157**	28,053
Apprenticeship levy	**1,477**	1,426
Employer contributions to NHS Pensions	**33,687**	31,668
Employer contributions to NHS Pensions paid by NHSE on behalf of Trust	**14,668**	0
Other costs	**83**	84
Temporary agency staff	**12,886**	13,196
Total staff costs	**386,471**	346,075
Employee costs capitalised	**684**	646
Total staff costs excluding capitalised costs	**385,787**	345,429

8.2 Retirements due to ill-health

During 2019-20 there were 2 early retirements from the Trust agreed on the grounds of ill-health (2018-19: 5 early retirements). The estimated additional pension liabilities of these ill-health retirements is £0.2m (2018-19: £0.1m).

The cost of these ill-health retirements will be borne by NHS Pensions.

8.3 Pension costs

Past and present employees are covered by the provisions of the two NHS Pension Schemes. Details of the benefits payable and rules of the Schemes can be found on the NHS Pensions website at www.nhsbsa.nhs.uk/pensions. Both are unfunded defined benefit schemes that cover NHS employers, GP practices and other bodies, allowed under the direction of the Secretary of State for Health and Social Care in England and Wales. They are not designed to be run in a way that would enable NHS bodies to identify their share of the underlying scheme assets and liabilities. Therefore, each scheme is accounted for as if it were a defined contribution scheme: the cost to the NHS body of participating in each scheme is taken as equal to the contributions payable to that scheme for the accounting period.

In order that the defined benefit obligations recognised in the financial statements do not differ materially from those that

would be determined at the reporting date by a formal actuarial valuation, the FReM requires that 'the period between formal valuations shall be four years, with approximate assessments in intervening years'. An outline of these follows:

a) Accounting valuation

A valuation of scheme liability is carried out annually by the scheme actuary (currently the Government Actuary's Department) as at the end of the reporting period. This utilises an actuarial assessment for the previous accounting period in conjunction with updated membership and financial data for the current reporting period, and is accepted as providing suitably robust figures for financial reporting purposes. The valuation of the scheme liability as at 31 March 2020, is based on valuation data as at 31 March 2019, updated to 31 March 2020 with summary global member and accounting data. In undertaking this actuarial assessment, the methodology prescribed in IAS 19, relevant FReM interpretations, and the discount rate prescribed by HM Treasury have also been used.

The latest assessment of the liabilities of the scheme is contained in the report of the scheme actuary, which forms part of the annual NHS Pension Scheme Accounts. These accounts can be viewed on the NHS Pensions website and are published annually. Copies can also be obtained from The Stationery Office.

b) Full actuarial (funding) valuation

The purpose of this valuation is to assess the level of liability in respect of the benefits due under the schemes (taking into account recent demographic experience), and to recommend contribution rates payable by employees and employers.

The latest actuarial valuation undertaken for the NHS Pension Scheme was completed as at 31 March 2016. The results of this valuation set the employer contribution rate payable from April 2019 to 20.6%, and the Scheme Regulations were amended accordingly.

The 2016 funding valuation was also expected to test the cost of the Scheme relative to the employer cost cap set following the 2012 valuation. Following a judgment from the Court of Appeal in December 2018 Government announced a pause to that part of the valuation process pending conclusion of the continuing legal process.

9. Finance expenses

	2019-20 £000s	2018-19 £000s
Interest expenses		
Loans from the Department of Health and Social Care	**141**	44
Main finance costs on PFI obligations	**4,057**	4,231
Contingent finance costs on PFI obligations	**4,643**	4,788
Total interest expenses	**8,841**	9,063
Provisions – unwinding of discount	**10**	9
Total finance expenses	**8,851**	9,072

10. Better Payment Practice code

	2019-20		2018-19	
	Number	**£000s**	Number	£000s
Non-NHS payables				
Total non-NHS trade invoices paid in the year	**96,394**	**299,344**	97,918	225,709
Total non-NHS trade invoices paid within target	**94,812**	**293,960**	94,148	216,635
Percentage of non-NHS invoices paid within target	**98.4%**	**98.2%**	96.1%	96.0%
NHS payables				
Total NHS trade invoices paid in the year	**2,693**	**27,676**	2,760	26,367
Total NHS trade invoices paid within target	**2,597**	**27,412**	2,631	25,693
Percentage of NHS invoices paid within target	**96.4%**	**99.0%**	95.3%	97.4%

The 'Better payment practice code' requires the NHS body to aim to pay all valid invoices by the due date or within 30 days of receipt of a valid invoice, whichever is later.

11. Intangible assets

All intangible assets are purchased software licences.

12. Property, plant and equipment

12.1 Property, plant and equipment valuation information

For 2019-20, Cushman & Wakefield, the Trust's external valuer, have provided a full valuation of land and buildings as at 31 March 2020 on an alternative site valuation basis, as well as an updated valuation as at 1 April 2019, both of which are reflected in the financial statements. The value of these assets as at the start of the year, which has been used as the basis for calculating their depreciation charge, fell by 16.6% with net impairments of £27.2m charged to operating expenses and £8.7m of net revaluation losses charged to the revaluation reserve.

To ensure the carrying amount of land and buildings does not differ materially from its fair value at 31 March 2020, a further £11.7m of net impairments was charged to operating expenses and a further £0.5m of net revaluations losses charged to the revaluation reserve to reflect the year end valuation. These revaluation adjustments further reduced the value of these assets by 6.3%.

12.2 Property, plant and equipment

2019-20	Land £000s	Buildings £000s	Assets under construction £000s	Plant & machinery £000s	Information technolgy £000s	Other property, plant and equipment £000s	Total £000s

Total at 31 March 2019	**6,248**	**209,798**	**18,896**	**12,010**	**6,360**	**2,030**	**255,342**

13. Inventories

	31 March 2020 £000s	31 March 2019 £000s
Drugs	**2,391**	2,078
Consumables	**5,728**	3,135
Energy	**192**	207
Total	**8,311**	5,420

Inventories recognised in expenses for the year were £79.3m (2018-19: £76.8m).

Restrictions on movement in the United Kingdom in March 2020 meant that the Trust's auditor, Grant Thornton UK LLP, was unable to attend year end inventory counts to complete procedures required by auditing standards. While the auditor has issued a qualified opinion, as a result, we are aware that a number of trusts in the country are affected by the same issue in 2019-20 and the Trust is satisfied that its inventory balance is presented fairly in all material respects.

14. Receivables

	31 March 2020 £000s	Restated 31 March 2019 £000s
Contract receivables	**27,706**	22,671
Allowance for impaired contract receivables	**(940)**	(818)
Prepayments	**2,391**	6,978
VAT receivable	**1,376**	1,507
PDC dividend receivable	**1,396**	83
Other receivables	**569**	534
Total – current	**32,498**	30,955

Comparatives have been restated to separately disclose the PDC dividend receivable.

In total, £21.9m of current receivables are receivable from NHS and DHSC group bodies (31 March 2019: £17.6m)

Non-current receivables include £6.2m of PFI lifecycle prepayments, which were previously misclassified as current receivables (31 March 2019: £4.3m). Comparatives have not been restated on materiality grounds.

15. Cash and cash equivalents

As at 31 March 2020, cash and cash equivalents of £8.5m (31 March 2019: £12.1m) were almost entirely represented by cash deposited with the Governing Banking Service with the balance of less than £0.1m represented by cash in hand (31 March 2019: less than £0.1m).

16. Trade and other payables – current

	31 March 2020 £000s	31 March 2019 £000s
Trade payables	**3,845**	3,585
Capital payables	**7,200**	4,524
Accruals	**18,679**	15,739
Social security costs	**4,232**	3,842
Other taxes payable	**3,166**	2,937
NHS Pension contributions payable	**4,730**	4,285
Other payables	**1,893**	4,356
Total	**43,745**	39,268

In total, £5.3m of current trade and other payables are payable to NHS and DHSC group bodies (31 March 2019 £4.2m).

17. Borrowings

	Current		Non-current	
	31 March 2020 £000s	31 March 2019 £000s	31 March 2020 £000s	31 March 2019 £000s

Not later than one year	268	290	558
Later than one year but not later than five years	1,071	0	1,071
Later than five years	1,986	0	1,986
Balance at 31 March 2019	3,325	290	3,615

18.2 Clinical negligence liabilities

At 31 March 2020, £349.3m was included in provisions of NHS Resolution in respect of clinical negligence liabilities relating to the Trust (31 March 2019 £310.0m).

19. Private Finance Initiative (PFI) schemes

The Trust has two separate PFI schemes in operation on each of its main sites as detailed below:

Royal Blackburn Hospital – Single Site

This scheme has provided a single hospital site within the Blackburn locality and has been operational since July 2006. The contract term is 35 years.

Burnley General Hospital – Phase 5

The phase 5 unit on the Burnley General site has been in operation since May 2006 and accommodates hospital facilities including elective care, radiology, outpatients and renal services. The contract term is 30 years.

The contracts in place for these schemes are for the construction and provision of healthcare facilities. At the end of the agreement term the sites will revert back to the ownership of the Trust without the need for further payments. Both contracts include options for early termination where there has been a event of default by the Project Company. During the term of the contracts there is provision for planned replacement at regular intervals of components included in these facilities. This ensures that the assets are maintained in the required condition throughout the life of the contract. The Trust is charged for these lifecycle costs through the unitary payments although the charges remain fixed irrespective of the actual pattern of lifecycle costs incurred by the operators. Both contracts include provision for performance and availability deductions against the unitary charge. Unitary charges are subject to an annual inflation uplift which is linked to the published retail price index.

Under IFRIC 12, the assets are treated as assets of the Trust; the substance of the contracts is that the Trust has a finance lease and the payments made comprise two elements – imputed finance lease charges and service charges. As well as provision of the infrastructure assets, the contract for the Blackburn PFI also includes facilities management provision both for the PFI asset and parts of the wider estate, and managed equipment services. The contract for the Burnley PFI scheme also includes facilities management but just for the PFI asset.

19.1 Imputed 'finance lease' obligations

The Trust has the following obligations in respect of the finance lease element of on-Statement of Financial Position (SOFP) PFI schemes:

	31 March 2020 £000s	31 March 2019 £000s
Gross PFI obligations of which are due	**149,383**	156,726
– not later than one year	**7,728**	7,286
– later than one year and not later than five years	**30,478**	29,946
– later than five years	**111,177**	119,494
Finance charges allocated to future periods	**(47,954)**	(52,069)
Net PFI obligations of which are due	**101,429**	104,657
– not later than one year	**3,786**	3,228
– later than one year and not later than five years	**16,047**	14,931
– later than five years	**81,596**	86,498

19.2 Total on-SoFP PFI arrangement commitments

The Trust's total future obligations under these on-SoFP PFI schemes are as follows:

	31 March 2020 £000s	31 March 2019 £000s
Total future payments committed in respect of PFI arrangements	**621,159**	645,569
– not later than one year	**24,740**	24,147
– later than one year and not later than five years	**105,301**	102,777
– later than five years	**491,118**	518,645

19.3 Analysis of amounts payable to PFI operator

The Trust's total future obligations under these on-SoFP PFI schemes are as follows:

	2019-20 £000s	2018-19 £000s
Unitary payment payable to PFI operator	**24,147**	23,594
Consisting of:		
– Interest charge	**4,057**	4,231
– Repayment of finance lease liability	**3,228**	3,788
– Service element and other charges to operating expenditure	**6,978**	6,789
– Lifecycle costs	**5,241**	3,998
– Contingent rent	**4,643**	4,788
Other amounts paid to operator due to a commitment under the service concession contract but not part of the unitary payment	**943**	657
Total amount paid to service concession operator	**25,090**	24,251

20. External financing

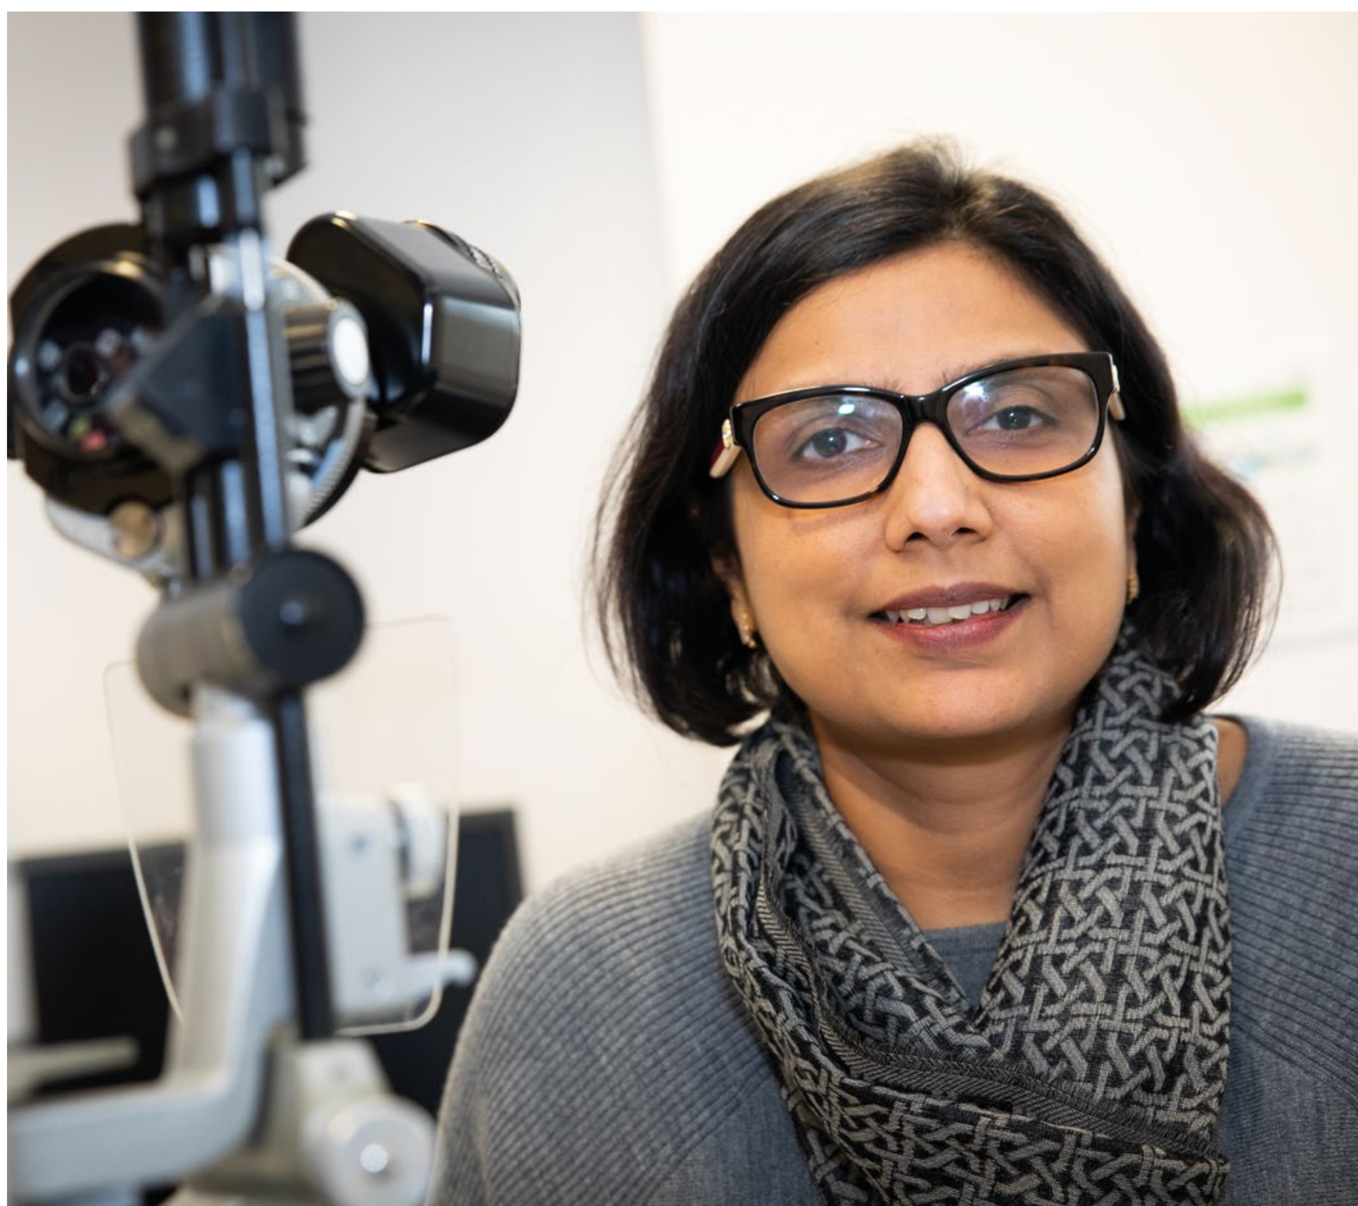
	2019-20 £000s	2018-19 £000s
Cash flow financing (from SOCF)	**12,234**	13,484
External financing requirement	**12,234**	13,484
External Financing Limit	**18,170**	23,390
Underspend against the External Financing Limit	**5,936**	9,906

The Trust is given an external financing limit against which it is permitted to underspend.

21. Capital Resource Limit

	2019-20 £000s	2018-19 £000s
Gross capital expenditure		
Property, plant and equipment	**19,567**	16,259
Intangible assets	**3,359**	2,895
Total gross capital expenditure	**22,926**	19,154
Less: disposals of property, plant and equipment	**0**	(240)
Less: donated capital additions	**(325)**	(371)
Charge against the Capital Resource Limit	**22,601**	18,543
Capital Resource Limit	**24,605**	21,118
Underspend against the Capital Resource Limit	**2,004**	2,575

The Trust is given a Capital Resource Limit which it is not permitted to exceed.



22. Breakeven duty

22.1 Breakeven duty – financial performance

	2019-20 £000s	2018-19 £000s
Adjusted financial performance surplus / (deficit) (control total basis)	**5,111**	(3,887)
Add back income for impact of 2018-19 post-accounts PSF reallocation	**369**	0
Breakeven duty financial performance surplus / (deficit)	**5,480**	(3,887)

22.2 Breakeven duty – rolling assessment

	Total (2003-04-2008-09)	2009-10	2010-11	2011-12	2012-13	2013-14
	£000s	£000s	£000s	£000s	£000s	£000s
Breakeven duty in-year financial performance	380	287	723	3,025	8,011	6,600
Breakeven duty cumulative position	380	667	1,390	4,415	12,426	19,026
Operating income	1,677,587	336,952	342,027	389,797	404,986	420,579
Cumulative breakeven position as a percentage of operating income		0.20%	0.41%	1.13%	3.07%	4.52%

	2014-15	2015-16	2016-17	2017-18	2018-19	**2019-20**
	£000s	£000s	£000s	£000s	£000s	**£000s**
Breakeven duty in-year financial performance	1,342	7,887	3,068	3,402	(3,887)	5,480
Breakeven duty cumulative position	20,368	28,255	31,323	34,725	30,838	36,318
Operating income	435,107	466,767	477,519	495,471	512,439	567,456
Cumulative breakeven position as a percentage of operating income	4.68%	6.05%	6.56%	7.01%	6.02%	6.40%

The application of breakeven duty means that if a cumulative surplus or deficit is reported (greater than a materiality threshold of 0.5% of operating income), it should be recovered within the subsequent two financial years. NHS England and NHS Improvement (NHSEI) has provided guidance that the first year for consideration for the breakeven duty should be 2009-10.

While the cumulative breakeven position of 6.4% is above the 0.5% threshold, NHSEI uses annual financial control totals for NHS Trusts as the primary mechanism for financial control. For 2019-20, the Trust was set a control total of a £7.0m deficit, excluding its Provider Sustainability Fund allocation, which has been met, subject to an allowance made for the impact of the change in discount rate applied to the calculation of post-employment benefit provisions.

23. Financial instruments

23.1 Financial instruments – financial risk management

Financial reporting standard IFRS7 requires disclosure of the role that financial instruments have had during the period in creating or changing the risks a body faces in undertaking its activities. Because of the continuing service provider relationship that the Trust has with Clinical Commissioning Groups (CCGs) and the way those CCGs are financed, the Trust is not exposed to the degree of financial risk faced by business entities. Financial instruments also play a much more limited role in creating or changing risk than would be typical of listed companies. As an NHS Trust, the Trust has limited powers to borrow or invest surplus funds and financial assets and liabilities are generated by day-to-day operational activities rather than being held to change the risks facing the Trust in undertaking its activities.

Treasury management operations are carried out by the Finance Department, within parameters defined formally within the Trust's standing financial instructions and policies agreed by the Trust Board. Treasury activity is subject to review by the Trust's internal auditors.

23.1 Financial instruments – financial risk management (continued)

Currency risk

The Trust is principally a domestic organisation with no overseas operations. As a consequence, the great majority of transactions, assets and liabilities are UK and sterling based meaning the Trust has low exposure to currency rate fluctuations.

Interest rate risk

The Trust borrows from government for capital expenditure, subject to affordability as confirmed by NHS England and NHS Improvement (NHSEI). Borrowings are typically made for up to 25 years, in line with the life of the associated assets, with interest fixed for the life of the loan at the National Loans Fund rate. The Trust also borrowed from Government in 2019-20 to ensure it can continue to meet its financial obligations while maintaining the minimum cash balance set by NHSEI of £2.5 million. This borrowing is repayable in three years with interest fixed at 1.5%. The Trust therefore has low exposure to interest rate fluctuations.

Credit risk

Since the majority of income comes from contracts with other public sector bodies, the Trust has low exposure to credit risk. The maximum exposures are in receivables from customers, as disclosed in the trade and other receivables note.

Liquidity risk

Operating costs are incurred under contracts with CCGs financed from resources voted annually by Parliament. The Trust also finances its capital expenditure from funds obtained within its capital resource limit. As a result, the Trust is not exposed to significant liquidity risks.

23.2 Financial instruments – carrying value

	31 March 2020 £000s	31 March 2019 £000s
Financial assets held at amortised cost		
Trade and other receivables excluding non financial assets	**28,200**	23,880
Cash and cash equivalents	**8,490**	12,082
Total	**36,690**	35,962

	31 March 2020 £000s	31 March 2019 £000s
Financial liabilities held at amortised cost		
Trade and other payables excluding non financial liabilities	**36,347**	29,647
Obligations under PFI contracts	**101,429**	104,657
Other borrowings	**8,765**	10,520
Total	**146,541**	144,824

The fair value of financial instruments is not considered to differ from their carrying values.

23.3 Maturity of financial liabilities

	31 March 2020 £000s	31 March 2019 £000s
In one year or less	**48,098**	34,647
In more than one year but not more than two years	**3,003**	3,985
In more than two years but not more than five years	**13,844**	19,494
In more than five years	**81,596**	86,698
Total	**146,541**	144,824

24. Related party transactions

During the year none of the Trust Board members or members of the key management staff, or parties related to any of them, has undertaken any material transactions with East Lancashire Hospitals NHS Trust.

The Department of Health and Social Care is regarded as a related party. During the year East Lancashire Hospitals NHS Trust has had a significant number of material transactions with the Department and with other entities for which the Department is regarded as the parent department. Those entities where the value of transactions exceeds £5.0m, ordered alphabetically, are:

- Community Health Partnerships
- Health Education England
- Lancashire Teaching Hospitals NHS Foundation Trust
- NHS Blackburn with Darwen Clinical Commissioning Group
- NHS East Lancashire Clinical Commissioning Group
- NHS England
- NHS Resolution

In addition, the Trust has had a number of notable transactions with other government departments and other central government bodies. Most of these transactions have been with Her Majesty's Revenue & Customs (HMRC) and the National Health Service Pension Scheme.

The Trust has also received revenue and capital payments from ELHT&ME, the charity for which the Trust is the corporate trustee. The financial statements of the Charity have not been consolidated within the financial statements of the Trust on the basis of immateriality, but the latest set of audited accounts of the Charity, relate to the year ended 31 March 2019 and are available on request from Trust Headquarters or via the Charity Comission website (https://www.gov.uk/government/organisations/charity-commission).

The Trust provides financial and administrative support to the Charity for which it is reimbursed. In 2019-20 this reimbursement amounted to £0.1m (2018-19 £0.1m).

25. Capital commitments

As at 31 March 2020, the Trust had £7.8m of contractual capital commitments (31 March 2019: £5.3m), £5.0m of which relates to the Phase 6 development on the Royal Blackburn Teaching Hospital site.

26. Losses and special payments

	2019-20		2018-19	
	Total value of cases £000s	**Total number of cases**	Total value of cases £000s	Total number of cases
Losses	**17**	**303**	114	59
Special payments	**68**	**53**	103	75
Total losses and special payments	**85**	**356**	217	134

27. Events after the end of the reporting period

On 2 April 2020, the Department of Health and Social Care (DHSC) and NHS England and NHS Improvement announced reforms to the NHS cash regime for the 2020-21 financial year. During 2020-21, existing DHSC interim revenue and capital loans as at 31 March 2020 will be extinguished and replaced with the issue of Public Dividend Capital (PDC) to allow the repayment. Given this relates to liabilities that existed at 31 March 2020, DHSC has updated its Group Accounting Manual to advise this is considered an adjusting event after the reporting period for providers. Outstanding interim loans totalling £7.7m as at 31 March 2020 in these financial statements have been classified as current as they will be repayable within 12 months.

Glossary

Accruals basis
Under the accruals concept, expenses are recognised when incurred, not when the cash is actually paid out, and income is recognised when it is earned, not when the cash is actually received.

AGM
Annual General Meeting

Annual Governance Statement
A statement about the controls the NHS Trust has in place to manage risk.

Amortisation
The term used for depreciation of intangible assets – an example is the annual charge in respect of some computer software.

Annual accounts
Documents prepared by the NHS Trust to show its financial position. Detailed requirements for the annual accounts are set out in the Group Accounting Manual, published by the Department of Health and Social Care.

Annual report
A document produced by the NHS Trust, which summarises the NHS Trust's performance during the year and includes the annual accounts.

Asset
Something the NHS Trust owns – for example a building, some cash, or an amount of money owed to it.

Audit Opinion
The auditor's opinion on whether the NHS Trust's accounts show a true and fair view of its financial affairs. If the auditors are satisfied with the accounts, they will issue an unqualified audit opinion.

Board Assurance Framework/ BAF
The main document that details the strategic risks of the Trust.

Breakeven
An NHS Trust has achieved breakeven if its income is greater than or equal to its expenditure.

Capital Resource Limit
An expenditure limit set by the Department of Health and Social Care for each NHS organisation, limiting the amount that may be spent on capital items.

Cash and cash equivalents
Cash includes cash in hand (petty cash) and cash at the bank. Cash equivalents are any other deposits that can be converted to cash straightaway.

Clinical Commissioning Group
The body responsible for commissioning all types of healthcare services across a specific locality.

Code of Audit Practice
A document issued by the National Audit Office and approved by parliament, which sets out how audits for the NHS Trust must be conducted.

Contingent asset or liability
An asset or liability which is too uncertain to be included in the accounts.

DTOC
Delayed Transfer of Care

EPRR
Emergency Preparedness, Resilience and Response. The Civil Contingencies Act (2004) required NHS organisations to show that they can deal with such incidents whilst maintaining services.

Group Accounting Manual
An annual publication from the Department of Health and Social Care which sets out the detailed requirements for the NHS Trust accounts.

Intangible asset
An asset that is without substance, for example, computer software.

International Financial Reporting Standards
The accounting standards that the NHS has adopted from April 2009.

International Standards on Auditing (United Kingdom and Ireland)
The professional standards external auditors must comply with when carrying out audit.

Inventories
Stock, such as clinical supplies.

IR35
IR35 legislation, also known as 'intermediaries legislation' is a set of rules that aid in the determination of the tax and national insurance that a candidate working through an intermediary should pay, based on the substance of that working arrangement.

Non-current asset or liability
An asset or liability the NHS Trust expects to hold for more than one year.

Non-Executive Director
Non-executive directors are members of the NHS Trust Board but do not have any involvement in day-to-day management of the NHS Trust. They provide the board with independent challenge and scrutiny.

Operating lease
An arrangement whereby the party releasing the asset is paying for the provision of a service (the use of the asset) rather than exclusive use of the asset.

Payables
Amounts the NHS Trust owes.

Primary Statements
The four main statements that make up the accounts: Statement of Comprehensive Income, Statement of Financial Position, Statement of Changes in Taxpayers' Equity and Statement of Cash Flows.

Private Finance Initiative/PFI
A way of funding a major capital investment, without immediate recourse to the public purse. Private consortia, usually involving large construction firms, are contracted to design, build, and in some cases manage new projects. Contracts typically last for 30 years, during which time the building is leased by the NHS Trust.

Public Dividend Capital
Taxpayers equity or the tax payers stake in the NHS Trust, arising from the Government's original investment in NHS trusts, when they were first created.

Receivables
Amount owed to the NHS Trust.

Remuneration Report
The part of the annual report that discloses senior officers' salary and pensions information.

Reserves
Reserves represent the increase in overall value of the NHS Trust since it was first created.

SAFER
A patient flow bundle from NHS Improvement which is based around five principles, they are: Senior review, All patients, Flow, Early discharge and Review.

Senior Information Risk Owner/SIRO
The establishment of the role of a SIRO within NHS organisations is one of several NHS Information Governance (IG) measures needed to strengthen information assurance controls for NHS information assets.

Sentinal Stroke Audit Programme/SSNAP
The Sentinal Stroke Audit Programme is the single source of stroke data in England, Wales and Northern Ireland.

Statement of Cash Flows
This shows cash flows in and out of the NHS Trust during the period.

Statement of Changes in Taxpayers' Equity
One of the primary statements – it shows the changes in reserves and public dividend capital in the period.

Statement of Comprehensive Income
The income and expenditure account, and the public sector equivalent of the profit and loss account. It shows what income has been earned in the year, what expenditure has been incurred and hence the surplus or deficit for the year.

Statement of Financial Position
Year-end statement prepared by all public and private sector organisations, which shows the net assets controlled by the organisation and how these have been funded. It is also known as the balance sheet.

Those Charged with Governance
Auditors terminology for those people who are responsible for the governance of the NHS Trust, usually the Audit Committee.

True and fair
It is the aim of the accounts to show a true and fair view of the NHS Trust financial position. In other words, they should faithfully represent what has happened in practice.

Vital Signs
An NHSI improvement programme.

This document is available in a variety of formats and languages.
