TB/2019/025	Open Forum To consider questions from the public.	Chairman	V
TB/2019/026	 Board Performance and Reflection To consider the performance of the Trust Board, including asking: Has the Board focussed on the appropriate agenda items? Any item(s) missing or not given enough attention? Is the Board shaping a healthy culture for the Board and the organisation and holding to account? Are the Trust's strategies informed by the soft intelligence from local people's needs, trends and comparative information? Does the Board give enough priority to engagement with stakeholders and opinion formers within and beyond the organisation? 	Chairman	V
TB/2019/027	Date and Time of Next Meeting Wednesday 13 March 2019, 1.00pm, Seminar Room 6, Learning Centre, Royal Blackburn Hospital.	Chairman	V

East Lancashire Hospitals NHS Trust

TRUST BOARD REPORT

Item

4

9 January 2019 Purpose Information Approval Title Directors' Register of Interests Author Mrs A Bosnjak-Szekeres, Associate Director of Corporate Governance/Company Secretary

Summary: Section 5 of the Trust's Standing Orders describes the duties and obligations of Board Members in relation to declaring interests. The Register is available for public inspection and following a recommendation from the audit carried out by the Mersey Internal Audit Agency (MIAA) Anti-Fraud Specialist, it shall be presented 3 times a year to the Trust Board. The presented Directors' Register of Interest will be included in the Trust's Annual Report.

Recommendation: The Board is asked to note the presented Register of Directors' Interests and Board Members are invited to notify the Company Secretary of any changes to their interests within 28 days of the change occurring.

Report linkages

Related to key risks The Trust fails to earn significant autonomy and maintain a identified on assurance positive reputational standing as a result of failure to fulfil framework regulatory requirements

Impact

Legal	Yes	Financial	No
The Trust would be in breach of its own Standing Orders and its regulatory obligations should it omit to have proper arrangements in place for the Directors' declarations of interests.

working within the Company Secretariat.

TB/2018/109 OPEN FORUM

There were no questions or queries raised by members of the public.

TB/2018/110 APOLOGIES

Apologies were received as recorded above.

TB/2018/111 DECLARATIONS OF INTEREST

There were no declarations of interest reported.

TB/2018/112 MINUTES OF THE PREVIOUS MEETING

Directors having had the opportunity to review the minutes of the previous meeting approved them as a true and accurate record.

RESOLVED: The minutes of the meeting held on 12 September 2018 were approved as a true and accurate record

TB/2018/113 MATTERS ARISING

There were no matters arising from the minutes of the previous meeting.

TB/2018/114 ACTION MATRIX

All items on the action matrix were reported as complete or were to be presented as agenda items at this meeting or subsequent meetings.

TB/2018/080: Open Forum – Mr Bannister reported that the changes to the signage at the Burnley General Teaching Hospital site would take place upon completion of the current developments.

TB/2018/085: Action Matrix – Mrs Pearson confirmed that the Trust was currently in negotiations with the Nursing Directorate at UCLAN and NHS England to determine whether it is possible to include a cohort of nurses from Kosovo on the Global Learners' Programme or the Earn, Learn and Return programme. Directors noted that discussions will also need to be held with the Kosovan Government in order for them to agree to release the nurses.

TB/2018/094: Culture and Leadership – Mr Moynes confirmed that a slide deck has been developed and has been discussed with the Executive Team, the system leaders across the Integrated Care System (ICS) and a range of other internal forums.

 Page 13 of 240

TB/2018/106: Board Performance and Reflection – Mrs Pearson reported that there would be an open session of the Patient Panel on 12 December 2018 with a formal launch planned for January 2019.

RESOLVED: The position of the action matrix was noted. Mrs Pearson to provide an update on the Patient Panel open session and launch of the Panel.

TB/2018/115 CHAIRMAN'S REPORT

Professor Fairhurst reported that Professor Mike Thomas had been acknowledged as a leading light for compassionate leadership by the Women of the Future organisation. She went on to report that since the last meeting the Trust had held its Annual General Meeting, which culminated in the final NHS70 tea party.

Professor Fairhurst confirmed that she had taken the opportunity to visit one of the GP practices that the Trust runs as part of the PWE partnership. She commented that the visit was interesting and demonstrated the enthusiasm of the GP partners within the practice to work with us. Directors noted that since the partnership took over the running of the practice, the patient list size has grown.

Professor Fairhurst reported that the Board had recently taken part in an export readiness workshop by Healthcare UK, which is part of the Department of Trade. There was recognition that the NHS is a global brand and it has a significant role to play as an exporter of services.

Directors noted that Sir Keith Pearson, Chair of Health Education England had recently visited the Trust and was complimentary about the innovative work that is taking place within the Trust, particularly the work around developing a workforce of the future. One of the presentations given on the day of the visit focused on the fulfilment of corporate social responsibility and highlighted the stark health inequalities of the population. It showcased some of the work the Trust is undertaking with local schools and colleges, local Department of Work and Pensions, the Prince's Trust, and Lancashire County Council's services for looked after children.

Professor Fairhurst reported that Professor Iqbal Singh had recently organised an international conference of the Centre of Excellence for Safety for Older People, which was well attended and included a number of poster presentations from ELHT staff.

Directors noted that the Trust's inaugural Nursing and Allied Health Professionals (AHP) conference took place earlier in the month and provided a good indication of the joint

 -ABS and PEF.docx

working that the Trust is doing in this domain.

RESOLVED: Directors received and noted the update provided.

TB/2018/116 CHIEF EXECUTIVE'S REPORT

Mr McGee presented his report to Directors and highlighted the revised format of the report and the additional content included, particularly the media coverage report.

Mr McGee went on to provide an overview of some of the national items contained within the report, including the launch of the NHS Winter Campaign, information relating to the NHS from the Autumn Budget, and zero tolerance of abuse towards staff.

Directors noted the appointment of Mrs Michelle Brown to the role of Associate Director of Improvement for the Trust and the Integrated Care Partnership (ICP). Mr McGee reported that the Trust's Neonatal Intensive Care Unit had opened the 'Forget Me Not' suite for bereaved parents. The suite has been developed in partnership with the Trust and parents and families.

Dr Riley confirmed that the Respiratory Ambulatory Care Unit opened on 14 September 2018. He provided a brief overview of the way that the unit works and the benefits that it will have for the flow through the emergency care pathway.

Mr McGee confirmed that the Trust's stroke service had been rated as 'A' in its most recent Sentinel Stroke National Audit Programme (SSNAP) assessment. He went on to draw the Directors' attention to the new media update section which provided an overview of the work that has gone on since the last meeting. Directors noted that the vast majority of the media coverage relating to the Trust was positive in nature, despite the tendency of the press to focus on negative coverage.

RESOLVED: Directors received the report and noted its content.

TB/2018/117 PATIENT STORY

Mrs Pearson introduced Mrs Pollard and her husband and confirmed that Mrs Pollard would be sharing her experience of being a patient following a stroke earlier in the year.

Mrs Pollard confirmed that she and her husband had both spent in excess of 30 years as employees of the NHS. She reported that on 29 April 2018 following an intracranial haemorrhage she was admitted to the Emergency Department. Upon admission she was gravely ill and was taken into the resuscitation area to be stabilised. From there she went for a scan, where immediate feedback was given to her husband and care team regarding her condition. Mr Pollard reported that the nursing and medical staff were excellent in terms of

 -ABS and PEF.docx

the care provided to his wife and spent a great amount of time allaying his fears.

Mrs Pollard reported that following stabilisation she was moved to ward B2 for four days and from there she was transferred to Preston for surgery. Upon her return to the Trust to commence rehabilitation the care she received continued to be good and communication between the two organisations seemed to be effective and efficient. The only negative thing Mrs Pollard reported was that the rehabilitation bed she was admitted to did not feel like a rehabilitation bed, as there was no active physiotherapy input from the start of her admission. She was then transferred to Rakehead, where the rehabilitation was intense and of a high quality. Mrs Pollard spent a total of seven weeks in hospital and, upon discharge, was regularly seen by the community rehabilitation team.

Mrs Pearson commented that the Trust had recently had an improved SSNAP rating and that the Trust had made significant progress in recent months in relation to the stroke pathway. She thanked Mrs Pollard and her husband for sharing their story with the Board.

Mr McGee commented that it was pleasing to hear that the communication between the two Trusts was good.Mr Bannister stated that it is important for the Board to recognise how immediate the effects of stroke are and just how wide ranging the impact can be.

Mrs Pollard commented that the only negative experience her family had was when her son had been asked to leave the ward at visiting time when there were more than five people around her bed, which in itself is not an issue, but the manner in which he was asked to leave could have been improved. Mrs Pearson thanked Mrs Pollard for her feedback and assured her that it has been taken on board.

RESOLVED: Directors received the Patient Story and noted its contents.

TB/2018/118 CORPORATE RISK REGISTER

Dr Riley referred Directors to the previously circulated report and confirmed that the format of the report had been revised in line with the discussions held at the last meeting. He went on to confirm that the risks contained within the document had been revised and reworded, with the risk relating to constitutional standards being broken into three separate risks, namely, focusing on cancer targets, referral to treatment (RTT), and emergency flow/four hour standards. Directors noted that the risks had been aligned to the strategic risks contained within the Board Assurance Framework (BAF).

Professor Fairhurst suggested that the revised document enabled the Board to gain better and more informed assurance regarding the work being undertaken to mitigate and manage the risks.

 Page 16 of 240

Mr Hodgson reported that the Trust had received the quarter two performance information relating to the Hepatitis C CQUIN and the risk on the register would be reviewed again in light of this new information.

RESOLVED: Directors were assured by the data presented and approved the CRR in its revised format.

TB/2018/119 BOARD ASSURANCE FRAMEWORK

Dr Riley presented the report and highlighted the changes to the document since the last Board meeting in September (see pages 68 to 75 of the November 2018 Board papers).

Mr McGee commented that for the document to be useful to the Board it needed to become a truly live document and asked how often it was reviewed. Dr Riley confirmed that the document was reviewed by the Executive Directors on a monthly basis and also presented to the Quality Committee (at each meeting) and Finance and Performance Committee (alternate meetings) for review and discussion. Dr Riley went on to suggest that future iterations of the document include a differentiation between internal and external sources of assurance and also include the Vital Signs programme work that is taking place within the Trust.

RESOLVED: Directors received, discussed and approved the revised Board Assurance Framework. Future iterations of the document to include a differentiation between internal and external sources of assurance in addition to

the Vital Signs work that is taking place in the Trust

TB/2018/120 SERIOUS INCIDENTS REQUIRING INVESTIGATION REPORT

Dr Riley referred Directors to the previously circulated report, highlighting those incidents which had occurred and required reporting on the Strategic Executive Information System (StEIS) and those incidents occurring in the Trust which did not meet the criteria. The latter, however were of sufficient importance to trigger internal review processes. Directors noted that, unless otherwise stated all internal rapid reviews were undertaken within 48 hours of an incident being reported.

Dr Riley went on to highlight the focused work which the Trust has been undertaking in relation to falls. He confirmed that, over a three year period, the number of falls had reduced significantly, but, the number of patients suffering a fractured neck of femur as a result of a fall had not changed significantly.

 Personal
 Effective
 Page 7 of 14 Retain 30 years

 V:\Corporate Governance\Corporate Meetings\TRUST BOARD\2019\00 January\Part 1\(005) Trust Board PART 1 - 2018.11.14 -ABS and PEF.docx
 -ABS and PEF.docx

Dr Riley referred Directors to the final part of the report which gave an overview of an external Level 3 Investigation Report into the care and death of a patient in 2015. He confirmed that the Trust undertook an internal investigation following the incident. This took several months and made recommendations based on the findings. Following presentation of the internal investigation report and findings, the family remained aggrieved and sought an external investigation. He confirmed that the full external investigation report had now been received and the findings were summarised in the report. Directors noted that the majority of the findings in the report mirrored those contained within the internal investigation report and a task and finish group had been set up to ensure actions were implemented and embedded. The group will continue to meet over the coming year and progress will be reported through the Quality Committee.

RESOLVED: Directors received the report and noted its content.

TB/2018/121 FLU VACCINATIONS PROGRAMME 2018/19

Mr Moynes presented the report and highlighted the work being undertaken to vaccinate staff against flu. He confirmed that the Trust achieved the highest rate of flu vaccinations in the country in 2017 (92.3%) and good progress was already being seen in the 2018 campaign, with 60% of the workforce already having been vaccinated.

Miss Malik commented that the percentage of staff having received the vaccination in 2017 was impressive and asked whether there had been any work carried out to dispel any rumours about the side effects or the cultural/ethical reasons for refusing the vaccination. Dr Riley reported that there had been a number of staff who had refused the vaccination in the previous year, due to the vaccine being developed in egg embryos.

In response to Mr McGee's question, Mr Moynes confirmed that the uptake of the vaccination for healthcare workers was high, but there had not been any work carried out to correlate the staff who had received the vaccine with those members of staff who had been absent from work due to sickness. Sickness rates for the post vaccination period in 2017 were between 6% and 7%.

Professor Fairhurst suggested that the high uptake of the vaccination was evidence of the Health and Wellbeing Strategy working.

In response to Miss Malik's question, Dr Riley confirmed that the Trust had an obligation to ensure that patient-facing staff were immune to a range of diseases, such as measles, hepatitis and chicken pox.

RESOLVED: Directors received the report and noted its contents.

TB/2018/122 LANCASHIRE AND SOUTH CUMBRIA INTEGRATED CARE SYSTEM (ICS) MEMORANDUM OF UNDERSTANDING (MoU)

Mr McGee presented the document to Directors and confirmed that the Memorandum of Understanding (MoU) had been presented to all the Trusts/organisations that were part of the Integrated Care System (ICS). He provided a brief overview of the document and the obligations that it set out for partner organisations. Directors agreed to approve the MoU on the basis that the ICS works with the Trust/organisations to firm up the governance arrangements and that an agreement is reached regarding the allocation of capital across the area.

RESOLVED: Directors discussed and approved the Memorandum of Understanding, on the basis that the ICS works with the Trust/organisations to firm up the governance arrangements and that agreement is reached regarding the allocation of capital across the area.

TB/2018/123 INTEGRATED PERFORMANCE REPORT

Mr McGee introduced the report to the Directors and confirmed that the report related to the period to the end of September, with the exception of the cancer standards which are reported to the end of August 2018. He commented that the Trust continued to perform well overall, particularly in relation to infection prevention and control indicators. Directors noted that the Trust continues to work towards improving performance in areas of pressure, particularly the emergency care pathway and the four hour standard.

a) Performance

Mr Bannister reported that of the 16,088 attendances at the Emergency Department in the month, 13,055 were seen within the required four hours. The month end performance was 81.2%. Directors noted that there had been 19 breaches of the 12 hour trolley wait, all of which were patients awaiting assessment of admission to mental health services. Mr Bannister reported that the average time for ambulance handovers to the Trust was 21 minutes against the standard time of 15 minutes. Work is taking place with North West Ambulance Service (NWAS) to improve the performance against this indicator. Mr Bannister went on to confirm that the referral to treatment (RTT) incomplete standard was 92.1% for the month and there were no patients who waited in excess of 52 weeks for surgery. There

 Page 19 of 240

were 73 operations cancelled on the day during the reporting month, with all being rebooked within the required 28 days.

Mr Bannister reported that the Trust had failed to achieve the cancer 62 day standard for the reporting month of August (82.4%). He also confirmed that the breast symptomatic two week standard was below target at 86.8%, but the GP 2 week and 31 day standards were achieved. Directors noted that there had been 4.5 breaches of the 104 day standard, which equated to seven patients.

Despite the previously reported improvements in relation to delayed transfers of care (DTOC), the position deteriorated in the month. The performance reported at the end of the reporting period was 3.9%, which is in excess of the 3.5% threshold and equated to 32 lost bed days in the month of September 2018.

In response to Mr Wedgeworth's question regarding the DTOC position against peers in the area and the North West as a whole, Mr McGee suggested that there were particular issues for the Lancashire Trusts, including mental health services, which impact on the transfers of care. He went on to confirm that there was a difference in the ways in which transfers of care are counted across Trusts, with this Trust taking a strict view of what is and is not classed as a delayed transfer of care.

RESOLVED: Directors noted the information provided under the Performance section of the Integrated Performance Report.

b) Quality

Dr Riley reported that there had been one case of Clostridium Difficile (C-Diff) identified in the reporting month which brings the Trust to two cases above the year to date trajectory. There were no cases of MRSA identified in the month and gram negative/Urinary Tract Infections remain at acceptable levels.

Directors noted that the Trust's performance against the hospital standardised mortality ratio (HSMR) and the Summary Hospital Mortality Indicator (SHMI) remain good.

Professor Fairhurst commented that it was worth noting that the Trust has come a long way in relation to the performance against the mortality indicators since the Keogh Review. The Board should recognise the work that has been carried out, particularly by Dr Stanley and the clinical and coding teams.

RESOLVED: Directors noted the information provided under the Quality section of the Integrated Performance Report.

c) Workforce

Mr Moynes reported that the response rate to the staff survey currently stood at 35%. The survey closes in three weeks' time. He confirmed that the appraisal rates for staff on Agenda for Change contracts are at 84%, which is below the expected threshold and 97% of staff have completed corporate induction. Directors noted that the only core skills module which was below the required compliance level was Information Governance at 93%, against a compliance threshold of 95%. Mr Moynes confirmed that the vacancy rate had reduced to 7.8%. The staff sickness rate had improved slightly and stands at 5.03%, although this remains higher than the percentage for the same period in 2017. The Health and Wellbeing team are undertaking a number of initiatives to support staff welfare and improve sickness rates.

RESOLVED: Directors noted the information provided under the Human Resources section of the Integrated Performance Report.

d) Safer Staffing

Mrs Pearson reported that nursing and midwifery staffing continued to be a significant challenge for the Trust during the month, although there had been a slight improvement in comparison with August 2018. There were two red flag incidents which occurred in the Outpatient department in the month and a further three in the Family Care Division, none of which were noted to have had a detrimental effect on patient care.

Directors noted the scores relating to the Friends and Family Test and that there had been an increase in the number of patients who would recommend the Trust as a place to receive treatment.

Mrs Pearson stated that the Trust received 37 complaints in September, which is the lowest number of complaints received since she commenced employment with the Trust in 2014. Professor Fairhurst acknowledged the work that has taken place to reduce the number of complaints received to such low levels.

RESOLVED: Directors noted the information provided under the Safer Staffing section of the Integrated Performance Report.

e) Finance

Mr Wood reported that the Trust remained on track to achieve the financial control total at the end of the 2018/19 financial year; however, a significant risk remained in relation to the financial position, which requires mitigation for the remainder of the year.

 V:\Corporate Governance\Corporate Meetings\TRUST BOARD\2019\00 January\Part 1\(005) Trust Board PART 1 - 2018.11.14 -ABS and PEF.docx
 -ABS and PEF.docx

Directors noted that the cash balance of the Trust was £9,000,000, which related to the drawdown of cash for the Phase Eight work at the Burnley General Teaching Hospital site. Mr Barnes commented that the Finance and Performance Committee had sought further assurance in relation to the risks to the financial position in the remaining half of the year.

RESOLVED: Directors noted the information provided under the Finance section of the Integrated Performance Report.

TB/2018/124 EMERGENCY PREPAREDNESS RESILIENCE REPORT (EPRP)

Mr Bannister reminded Directors of the discussions undertaken at the last meeting regarding the report and presented it for information. He confirmed that the certificate declaring full compliance had been submitted by the required deadline of 30 September. He referred Directors to appendix B: Annual EPRP Work Plan for the Trust 2018/2019, which will ensure that the Trust maintains full compliance in the coming year.

RESOLVED: Directors noted the information provided.

ELHT&ME UPDATE REPORT TB/2018/125

This item was considered with the Board acting as the Corporate Trustee for the ELHT&Me charitv.

Mrs Hughes referred Directors to the previously circulated document and provided a summary of the progress of the Charity since it was relaunched as ELHT&Me in 2016. She highlighted the three main strategic objectives, which were noted to be: make the charity more recognisable; make it easier for people to donate to the charity; and make it easier for people to fundraise for the charity. Directors noted that the objectives were being met and that a revised strategy would be developed in the coming year. It was anticipated that the strategy would be revised in March 2019. Mrs Hughes requested that the Board members, acting as the Corporate Trustee, note the progress made to date and continue to act as ambassadors for the charity.

Mr Barnes commented that as Chair of the Trust Charitable Funds Committee he had seen good progress being made in the last year, particularly given the limited resources available.

Miss Malik commented that it was impressive that the charity was almost half way to achieving its target of £1,000,000, since the appeal was launched in February 2018. She went on to ask what the next fundraising target would be for the charity following the achievement of the £1,000,000 goal. Mrs Hughes suggested that the time to take stock and set a new challenge would be around March 2019 and there was an interest in targeting

Page 12 of 14

commercial giving with local and national businesses.

Mr Wood welcomed the report and the enthusiasm that had been generated in relation to the charity.

Directors considered the recommendations within the report and approved them as the Corporate Trustee.

RESOLVED: Directors approved the recommendations in the report as the Corporate Trustee for the charity.

TB/2018/126 AUDIT COMMITTEE UPDATE REPORT

Mr Wharfe presented the report on behalf of Mr Smyth and confirmed that the Committee had received a number of internal audit reports. He went on to report that in advance of the main Audit Committee in October, the Committee members had met with a number of the Executive Directors to undertake a deep dive into BAF risk 2 (workforce) and 5 (constitutional standards), the discussion and decisions made were reflected in the report presented to the Board.

RESOLVED: Directors received the report and noted its contents.

TB/2018/117 FINANCE AND PERFORMANCE COMMITTEE UPDATE REPORT

Mr Wharfe presented the report and highlighted the discussions that had taken place at the meeting. He confirmed that the Committee had spent some time debating the financial control total and the likelihood of meeting it for the current financial year. The Committee also considered the medical staffing costs. Mr Wharfe highlighted the increased levels of income from the Commissioners based on the increased activity and case mix currently being experienced within the Trust. Directors noted that the Committee had received detailed financial presentations from the Family Care and the Surgical and Anaesthetic Services Divisions which had helped the Committee to gain greater understanding of their challenges and plans to meet the required Divisional financial out-turn positon at the end of the financial year.

RESOLVED: Directors received the report and noted its content.

TB/2018/128 QUALITY COMMITTEE UPDATE REPORT

Ms Malik presented the report on behalf of Mrs Anderson and commented that the majority of discussions undertaken throughout the course of today's meeting in relation to quality and safety had been discussed by the Quality Committee. She highlighted the summary of the

Safe Personal Effective Destroy in conjunction with National Archive Instructions V:\Corporate Governance\Corporate Meetings\TRUST BOARD\2019\00 January\Part 1\(005) Trust Board PART 1 - 2018.11.14 -ABS and PEF.docx Page 23 of 240

Director of Infection Prevention and Control Annual Report which had been discussed at a recent Quality Committee meeting.

RESOLVED: Directors received the report and noted its content.

TB/2018/129 REMUNERATION COMMITTEE INFORMATION REPORT

The report was presented to the Board for information.

TB/2018/130 TRUST BOARD PART TWO INFORMATION REPORT

The report was presented to the Board for information.

TB/2018/131 ANY OTHER BUSINESS

There were no matters of business raised under this item.

RESOLVED: Directors noted the information provided.

TB/2018/132 OPEN FORUM

There were no questions or comments from members of the public.

TB/2018/133 BOARD PERFORMANCE AND REFLECTION

Professor Fairhurst invited comments and observations about the meeting from the Directors. The Directors agreed that the agenda items that had been discussed covered a wide range of the activities undertaken by the Trust. Miss Malik commented that the Patient Story had been particularly touching. Mr Slater commented that the revised Chief Executive's Report was greatly improved; particularly the section pertaining to media reports and it went some way to demonstrating the reach of the Trust's message.

In relation to the Patient Story, Professor Thomas asked how the Board could check back to see if the actions highlighted in this and previous stories had been implemented. Mrs Pearson confirmed that the Trust produced a collection of patient stories on an annual basis, all of which were discussed through the various Divisions. Any resultant actions are fed back through the particular care pathway and on occasion through the Quality Committee.

RESOLVED: Directors noted the feedback provided.

TB/2018/134 DATE AND TIME OF NEXT MEETING

The next Trust Board meeting will take place on Wednesday 9 January 2019, 13:00, Seminar Room 6, Learning Centre, Royal Blackburn Teaching Hospital.

CEO Report January 2019

This report is divided into five sections. Section one details major national headlines, section two reports news from across Pennine Lancashire, and section three notes Trust news and initiatives which are aligned to the Trust's values. The fourth section shows the external communications and engagement interactions with the final section summarising the Chief Executive's diary.

One - National Headlines

Top news reports gathered from NHS England, NHS Providers and other reputable news sources.

Health Secretary launches prevention vision

Matt Hancock, Health Secretary, published is vision of transforming with the document <u>'Prevention is better than cure'</u>, which builds on the work already undertaken in areas such as childhood obesity and social prescribing. It shifts the focus to primary and community care services. Prevention will be at the heart of the NHS long-term plan. It will look at new technologies and shift the focus from treating single acute illnesses to promoting the health of the whole individual. The statement is to be followed by a green paper this year, setting out a first draft of the government's plans.

Funding announced for Primary and Community services

The government set out a major new investment in primary and community healthcare, worth £3.5bn a year in real terms by 2023/4, to build on the existing NHS budget for these services. It was announced that more patients will be cared for at home and in their community to avoid them going into or staying in hospital unnecessarily. This will be achieved through community-based 24/7 rapid response teams and dedicated support for care home residents. This pledge forms a key part of the long-term plan for the NHS which is the biggest ever cash boost for the health service.

NHS long-term plan

The delayed long-term plan, which was announced in March 2018, will now be published in January 2019.

Safe Personal Effective

Page 2 of 14 Retain 30 years Page 28 of 240

Universal electronic prescriptions ever closer

NHS Digital has launched a pilot that could see more than 95% of GP prescriptions processed electronically, saving the NHS precious time and money. Eight GP practices across England have been piloting Phase 4 of the <u>Electronic Prescription Services</u> during 2018, further practices will follow in 2019. If the pilot is successful, the new functionality will be made available to all GP practices in England.

New chair of Health Education England

Sir David Behan has been appointed as the new chair of Health Education England (HEE). The Department of Health and Social Care announced that the former chief executive of the CQC will chair HEE for three years, beginning 1 December 2018. Sir Behan stepped down from his role at the CQC in July after six years leading the regulator. Ian Trenholm has now taken up the position as its new chief executive.

Addendum to NHS Improvement subsidiaries guidance

NHS Improvement (NHSI) published an <u>addendum to the transactions guidance</u> outlining a new framework that changes the way subsidiaries are reported to and approved. The guidance will require all proposals to create subsidiary companies to be reported to NHS Improvement by Trusts. NHSI will then review those wholly owned subsidiary proposals which identify 'significant risk'. The guidance will require Trusts to prove that they have engaged with staff, put plans in place to comply with any consultation requirements and have a workforce strategy. If a Trust does not receive approval, it must delay establishing the subsidiary while it addresses the risks highlighted by NHSI.

Proposed changes to the English language test

The Nursing and Midwifery Council (NMC) have agreed for changes to the requirements for overseas nurses and midwives taking the <u>International English Language Test System</u> (IELTS). Following the change nurses and midwives will still be required to achieve a minimum overall level of 7 in the test. However, a level 6.5 in writing will be accepted alongside a level 7 in reading, listening and speaking. The changes, which came into effect on 5 December, are in line with the NMC's commitment to better, safer care and will ensure that only those nurses and midwives with the right skills, knowledge and command of English are able to work in the UK.

HSIB publish full investigation report

A full investigation, conducted by Healthcare Safety Investigation Branch (HSIB), has been published focusing on the provision of care to patients who present at emergency departments with mental health problems. This was instigated by the tragic death of a woman who, having presented to her GP, ambulance service and the emergency department of her local hospital, subsequently took her own life. The full report and summary, including recommendations can be read <u>here</u>.

Q2 figures show response to growing pressures

NHS Improvement (NHSI) has published its latest report on the <u>Performance of the NHS</u> <u>provider sector</u> covering June to September 2018, which reflects a very difficult summer for Trusts and their staff. The figures show that hospitals admitted nearly 1,000 more emergency patients a day and treated nearly 2,000 more a day within the four-hour target compared with the same time last year. Vacancies for doctors and nurses still stand at over 100,000. These statistics are against a backdrop of a forecasted deficit of £558 million by the end of March for the provider sector. NHSI argues that the long-term plan for the NHS will signal a reset on performance over the next five years.

Seven regional directors named by NHSE and NHSI

NHS Improvement (NHSI) has announced the joint directors of the new NHS England (NHSE) and Improvement regional teams. Three of the seven new directors are former NHS Trust chief executives. The new NHS executive group is set to hold its first meeting in January 2019, with the new national and regional directors expected to formally lead their integrated directorates by April 2019.

The regional directors have been named as follows:

- South West: Elizabeth O'Mahony, currently NHSI's chief financial officer.
- South East: Anne Eden, already joint NHSE and I regional director for the South East.
- **Midlands:** Dale Bywater, currently NHSI's regional director for the Midlands and East.
- **East of England**: Ann Radmore, currently Kingston Hospital Foundation Trust chief executive.
- North West: Bill McCarthy, currently deputy vice chancellor at Bradford University and chair of Bradford Teaching Hospital Foundation Trust and a former NHS England and Department of Health executive director.

- North East and Yorkshire: Richard Barker, currently NHSE's director for the North of England.
- London: Sir David Sloman, currently Royal Free London Foundation Trust.

Among the current NHSE and NHSI regional directors Paul Watson (NHSE in the Midlands and East), Jennifer Howells (both organisations in the South West), Steve Russell (NHSI in London) and Lyn Simpson (NHSI in the North) are leaving, while Jane Cummings (NHSE in London) is retiring.

Collaborative commissioning at system level

A joint report from NHS Providers and NHS Clinical Commissioners finds that although progress is at an early stage, the relationship between commissioners and providers is on the brink of significant change. Commissioners are beginning to take a more strategic approach, commissioning for outcomes across larger population footprints, with Trusts taking on or supporting activities previously undertaken by clinical commissioning groups (CCGs) such as developing pathways and service specifications.

Driving forward system working: a snapshot of early progress in collaborative commissioning is based on interviews with leaders from CCGs, NHS Trusts, national policy makers and think tanks and explores the changing relationship between commissioners and providers in the context of system working.

Plan to provide more support for veterans

A new dedicated crisis service will provide intensive support to scores of the most vulnerable former armed forces men and women battling alcohol, drugs and mental health problems. The £10 million of investment will provide specialist health support when needed to the 2.6 million veterans living in the UK.

Proposal to halve avoidable patient harm

Proposals have been revealed on how the NHS will safeguard it is the safest healthcare system in the word. The commitment includes a proposal for some of the most important types of avoidable harm to patients to be halved over the next five years in areas such as medication errors and Never Events. This would be alongside developing a 'just culture' for the NHS where

Page 5 of 14

frontline staff are supported to speak up when errors occur. The proposals have been set out as part of a <u>public consultation</u> in order to inform the development of an NHS-wide strategy. This will be delivered together with the NHS Long Term Plan during 2019.

Two - Pennine Lancashire Headlines

Important updates and information reflecting work being carried out by the integrated health and care partnership for Pennine Lancashire

Together a Healthier Future

Pennine Lancashire's 'Together a Healthier Future' is one of five Integrated Care Partnerships (ICP) which make up the Lancashire and South Cumbria Shadow Integrated Care System (formerly Sustainability and Transformation Partnership) area.

The key focus of Together a Healthier Future is the development and articulation of a New Model of Care and an Integrated Health and Care Partnership for Pennine Lancashire. A number of management portfolios for Pennine Lancashire ICP have been agreed, with the intention that existing staff within Pennine take up leadership of these portfolios alongside their substantive roles.

The development and establishment of this management and leadership capacity is intended to drive forward and realise the ambitions for Pennine and:

- Build sufficient management and leadership capacity to ensure the successful delivery of the agreed priorities for Pennine Lancashire
- Empower management colleagues to lead the continuing development of the Integrated Health and Care Partnership
- Mainstream the Pennine Way so that partnership working becomes 'the way we do things around here'
- Provide a level of stability for partner organisations to ensure the ability to continue to deliver the business in a time of change.

These leads are now confirmed as follows:

- Delivery EL Local Community Partnership: Alex Walker
- Delivery BwD Local Integrated Care Partnership: Roger Parr •

Page 6 of 14 Retain 30 years Destroy in conjunction with National Archive Instructions Page 32 2024000000

- Delivery Urgent, Acute and Planned Care: Tony McDonald
- Workforce and OD: Kevin Moynes .
- **Digital: Paul Fleming** •
- Nursing: Chris Pearson
- Quality and Safety: Kathryn Lord •
- Strategy, Planning and Performance: Martin Hodgson •
- **Communications: Christine Hughes** •
- Finance and Estates: Finance and Investment Group will be redeveloped to fulfil this role
- Prevention: To be confirmed
- Mental Health: To be confirmed

Mental Health stakeholder briefing

This year has seen a significant increase in the demand for mental health services across Lancashire and South Cumbria. A stakeholder briefing has been produced to explain how the NHS, local government and other organisations have partnered together to take action in addressing the situation.

National Record Locator Service

The National Record Locator Service will enable triage personnel such as mental health nurses and paramedics, who are called to patients in distress, to find out whether they have a mental health crisis plan in place. This will enable them to transport the patient to a more appropriate care setting as indicated in the crisis plan, rather than A&E. This will not only improve patient safety and mental health outcomes, but it will also reduce duplicate care costs (within A&E and mental health services) and improve staff safety.

The North West, North East, Yorkshire and London Ambulance Services are in the first phase. They will be working with their local mental health Trusts; Cumbria Partnership NHS FT, Humber NHS FT, South London and Maudsley NHS FT, Lancashire Care NHS FT and Cheshire and Wirral Partnership NHS FT. A wider roll out is planned throughout 2019.

NHS Careers - Explore the Roles

ELHT's Work Place Education Team held their second health and social care careers fair this year. Following on from the well-attended first event at Blackburn College at the start of the

year, Colne College was chosen as the second venue. The event was another great success, showcasing the variety of careers throughout the health and social care economy. Pupils from schools and colleges from across East Lancashire were invited to attend providing them with opportunities to chat with specialists and professionals representing different areas of health and social care. Pupils were also informed of alternatives to traditional university degree programmes, such as apprenticeships.

Home First Awards Nomination

The Trusts Home First service was shortlisted for the category 'Improved Partnerships between Health and Local Government' at the recent HSJ Awards ceremony. Working with Blackburn with Darwen Borough Council and Lancashire County Council, the service works with people to find the best way to support their healthcare needs and help them to be as independent as possible. The team ensure a person receives the right support for now and in the future. Although the team did not lift the winning trophy, the work they are undertaking is priceless for our patients and their families. A case study of the service can be read <u>here</u>.

Three - ELHT Headlines

Important news and information from around the Trust which supports our vision, values and objects.

Use of the Trust Seal

The Trust seal has been applied to the following documents since the last report to the Board:

• On 5 December 2018 the seal was applied to the Settlement and Variation Agreement between ELHT, Consort HealthCare Ltd and Engie Services Ltd. The Chief Executive and the Director of Finance were the signatories.

Winter escalation unit opens

The 24 bedded unit located on Ward 19 at the Burnley Teaching hospital site, was officially opened on 16 November by John Bannister, Director of Operations, followed by a patient tea party on 29 November hosted by Christine Pearson, Director of Nursing.

East Lancashire Hospitals NHS Trust

The unit will be operational throughout the winter months to assist with the challenges that the colder weather brings. Patients will benefit from being cared for in an environment that promotes independence and routine whilst being involved in the final arrangements for returning home. The environment has been specifically designed to enhance healing, promote independence, encourage rehabilitation and improve motivation for the next step in a person's recovery. Patients are encouraged to be dressed in their own clothes and fully participate in achieving their goals for that day. This could include using the dining areas as opposed to eating at the bedside. Television, music and a range of activities are available in the communal areas supported by the staff, volunteers and family members.

Award wins and nominations

There is no doubt that our success at the recent Health Service Journal Award event was down to a huge amount of hard work and determination by the whole Trust. Winning the category for 'Creating a Supportive Staff Culture' was proof positive that the Engage to Make a Difference project has achieved its goal - to create a culture where staff can communicate their worries without fear and to provide regular and consistent information about the direction of the organisation. This was further supported by the nomination of Director of HR&OD, Kevin Moynes, for HR Director of the Year in the Personnel Today Awards. Kevin was shortlisted in a strong field of private and public sector HR Directors.

Honorary Doctorate for Professor Fairhurst

It was with great pride that Professor Eileen Fairhurst MBE, Chair of ELHT, received an Honorary Doctorate. The tribute was to acknowledge the significant contribution Professor Fairhurst has made to the development of the University's School of Medicine and her academic achievements in the field of health and wellbeing.

Professor Fairhurst joined hundreds of undergraduates, postgraduates and doctorate students on the stage at Preston's Guild Hall on 11 December. Throughout the four winter graduation ceremonies, more than 1,600 students collected their awards in front of family and friends.

Progress visit for £15.5 million Burnley hospital development

VIPs from partnership organisations, MPs from Rossendale and Darwen, Burnley and Pendle were welcomed along with former Burnley MP Gordon Birtwistle, to spend time meeting staff and touring the Phase 8 construction site. The new development, which is half way through

construction, will boast a state of the art ophthalmology centre, outpatients department and maxillo facial facilities.

Christmas arrives at ELHT

It has been a very busy run up to Christmas this year. Special thanks go to members of the public, volunteers, staff and VIP visitors who have gone the extra mile to spread joy and happiness to our patients. The Trust played host to a range of activities to lift people's spirits. These include visits from the Mayor of Blackburn, Accrington Stanley, Blackburn Rovers and Burnley football clubs, a number of local primary schools, Blackburn Hawks ice hockey team, and many local businesses. We also held our first Christmas Market stalls, with local schools and voluntary groups providing choirs to sing Christmas carols.

Charity Christmas Raffle

This year also saw the very first ELHT&Me Christmas raffle. With three big prizes up for grabs: £1000 cash, £500 Love to Shop vouchers and a family Blackburn Rovers day, it really was worth being part of. The raffle was drawn on 19 December with three lucky winners being contacted on the day. The prizes were very kindly donated – Engie providing the £1000 cash – meaning every penny raised goes directly towards providing an enhanced patient experience.

SPEC Panels

Since the last Trust Board meeting in November 2018 there have been five SPEC Panels as part of the Nursing Assessment Performance Framework. All five wards were successful at the panel stage and have been put forward to the Board for silver ward status. The wards are:

- 1. Marsden Ward, Pendle Community Hospital
- 2. Coronary Care Unit, Royal Blackburn Teaching Hospital
- 3. Critical Care Unit, Royal Blackburn Teaching Hospital
- 4. Ward C5, Royal Blackburn Teaching Hospital

Four – Communications and Engagement

A summary of the external communications and engagement activity.

Communications and Engagement Monthly Media Update

During November ELHT has...

- Opened a new escalation unit, Ward 19
- Launched a multi-agency breastfeeding campaign
- Held a careers fair at Nelson College
- Launched the STAR Awards
- Held a Phase 8 progress tour for MPs
- Launched a new test for bowel cancer

Press and Media Relations

Five - Chief Executive's Meetings

Below are a summary of the meetings the Chief Executive has chaired or attended.

December 2018 Meetings

Date	Meeting	
3 December	Team Brief Accrington and Clitheroe	
3 December	NHSI Quarterly Review Meeting	
3 December	Hospital Christmas Carol Concert, Bridgewater Hall	
4 December	Trust Planning Day	
4 December	Engaging Managers Event	
4 December	Chairman/CEO introductory meeting with County Councillor Geoff Driver and CEO Angie Ridgewell	
5/7 December	HFMA Annual Conference	
10 December	Chairman/CEO introductory meeting with Chairman/CEO of Airdale	
10 December	Ward Clerk Development Programme, Burnley General	
12 December	Visit to the Darwen Integrated Neighbourhood Team	
12 December	Serve Staff Christmas Lunch	
12 December	Board Development Session	
13 December	Partnership Delivery Group/Practice Coaching Training	
13 December	Back to the floor Night visit to the Integrated Community Team	
14 December	Chairman/CEO meeting with Stephen Barnes and Dennis Medoros	
14 December	Prince's Trust Celebrations Event	
14 December	Presentation at Warrington and Halton Hospitals Trust Board	
18 December	Rainbows Christmas Party	
18 December	Chairman/CEO meeting	
19 December	Accountable Health and Care Partnership Leaders Forum	
20 December	Trust CEOs and CCG AOs Briefing Session in London	

January 2018 Meetings

Date	Meeting
4 January	Lancashire and South Cumbria Provider Board
7 January	Introductory meeting with David Blacklock, CEO of Healthwatch Lancashire
8 January	Chairman/CEO meeting
9 January	Trust Board
10 January	A&E Delivery Board
10 January	Partnership Deliver Board
11 January	Visit to the Integrated Neighbourhood Team BwD
11 January	Report Out Session
14 January	Vital Signs Programme Review
14 January	NHS Winter Plan meeting with NWAS
14 January	Meeting with Mick Cartledge CEO Burnley Borough Council
15 January	Chairman/CEO meeting
16 January	Integrated Care System Board
17/18 January	CEO Development Network
21 January	Vital Signs Transformation Guiding Board - London
22 January	Chairman/CEO meeting with Peter Mileham from the Rosemere Cancer Foundation
23 January	Partnership Leaders Forum
28 January	Finance and Performance Committee
29 January	Chairman/CEO meeting
29 January	Burnley Borough Council Policy Board
30 January	Operational Delivery Board
31 January	Diagnostic Project Group

TRUST BOARD REPORT

12

9 January 2019	Purpose	Information Monitoring
Title	Electronic Patient Referral System	

Author	Mrs S Elliston, Directorate Manager (Centralised
	Outpatients and Administration Services)

Executive sponsor Mr J Bannister, Director of Operations

Summary: This paper is to update the board on the completion of the project for the switch off to paper referrals for first consultant led appointments. It will identify changes the key processes, risks, benefits and current utilisation of the project.

Recommendation: To note the success and approve the closure of the project.

Executive Summary

- 1. Changes made to the 2018/19 NHS standard contract, means from the 1st October 2018, all GP referrals to first consultant led outpatient appointments have to be made through the Electronic Referral System (e-RS). Any referral not made through the e-RS system and not appropriately escalated to the relevant Clinical Commissioning Group (CCG's); the Trust will not be paid for the Out Patient activity.
- 2. Switch off was in 2 stages, 2 week waits (potential cancer referrals) switched on the 1st May and all other referrals on the 31st July 2018. Utilisation figures can be found in Appendix 1. Since the contractual change, 2 referrals have been received and accepted outside of e-RS. However, neither could have been electronically received and the relevant CCG has approved payment.
- The programme has now been successfully completed and the board is 3. recommended to note this success and approve the closure of the project.

Introduction

- 4. Changes made to the 2018/19 NHS standard contract, meant that from the 1st October 2018, all GP referrals to first consultant led outpatient appointments have to be made through the Electronic Referral System (e-RS). Any referral not made through the e-RS system, is not on the agreed exclusion list or has not been escalated to the relevant CCG; the Trust will not be paid for the Out Patient activity. E-RS allows the patient to make and agree their outpatient appointment directly with their GP or know what the next step in their care will be. The system offers a full audit trail of the referral, so GP's are able to see where patients are in the initial stages of their pathway.
- 5. Pennine Lancashire agreed a switch off date of the 31st July 2018. This allowed for a period of review of the systems and processes to ensure safe, personal and effective care. Collaborative working between ELHT and the CCG's since January '18 took place to prepare for this change and to ensure that we are fully paperless by the July deadline.

Changes to the 2018/19 NHS standard contract

"With effect from 1 October 2018, subject to the provisions of NHS e-Referral 6. Guidance:

Page 3 of 7

Retain 30 years

- a) 6.2A.1 the Provider need not accept (and will not be paid for any first outpatient attendance resulting from) Referrals by GPs to Consultant-led acute outpatient Services made other than through the NHS e-Referral Service;
- b) 6.2A.2 the Provider must implement a process through which the non-acceptance of a Referral under this Service Condition 6.2A will, in every case, be communicated without delay to the Service User's GP, so that the GP can take appropriate action; and
- c) 6.2A.3 each Commissioner must ensure that GPs within its area are made aware of this process".

Project Plan

- 7. A comprehensive project plan has been in place since January 2018 and has been overseen by the e-RS programme board. The board is a collaborative of Trust and CCG members and is chaired by John Bannister as the responsible officer.
- 8. The project plan implemented a number of key stages including a full review of the Trusts Directory of Services, distribution of smart cards and computer access, training of staff and joint communication strategy.
- At the latest programme board on the 17th October, a full review of the project plan 9. and utilisation was undertaken. The outcome from the board was that all possible actions had been successfully completed. However, there was 1 connecting project, the electronic transfer of the referral into the Trusts clinical patient portal, which would progress outside of the programme, and this is being over seen by the trusts e-Health board.
- 10. Utilisation of the e-RS system can be found in appendix 1, leading up to the contractual requirement. Since this, 2 referrals have been received and accepted outside of e-RS. However, neither could have been electronically received and the relevant CCG has approved payment.

Financial Impact

NHS Digital (NHSD) are developing an authentication report for the CCG's which will 11. check the unique booking reference number (UBRN) and will identify any anomalies. These can then be checked against the exclusion or escalation lists. If there are still anomalies then this would be queried with the Trust and payment for the outpatient activity withheld. In August 2018, there were 45 of the 6,718 referrals which were received by the Trust, however, they were subsequently redirected and submitted via

Page 4 of 7 Retain 30 years Destroy in conjunction with National Archive Instructions V:\Corporate Governance\Corporate Meetings\TRUST BOARD\2019\00 January\Part 1\(010) e-RS Programme Update and Closure

e-RS. In September, 6 out of 6,011 referrals were registered on the Trust administration system without being submitted via e-RS. This would amount to approx. £720 of income. In October we received 2 but due to the nature of the referral they could not have been made via e-RS and agreement was sought from the CCG for payment. There is now a daily report which highlights any breaches in compliance and are escalated and managed as required.

12. It is not envisaged that e-RS will have the financial impact on income as first anticipated.

Appropriate Slot Issue (ASI's)

13. The availability of adequate capacity for GP's to directly refer patients into the Trust continues to be challenging. To facilitate this, the forward planning of additional ad hoc clinics is vital to reducing the number of patients who leave their GP surgery without an appointment date. To support this operation teams have been requested to provide minimum notice periods for these clinics, 2 weeks for 2 week wait and 4 weeks for routine clinics. However, there continues to be a number of patients across the specialities where the patient has not got their outpatient appointment booked on leaving the GP's surgery.

Risks

- 14. To the Trust's 2WW cancer standard. Some patients will have the ability cancel and rebook their appointment independently and this could be in excess of the 14 day standard. To mitigate this risk, we continue to work with GP's to ensure that the urgency of their referral is communicated to patients and to encourage them to attend their appointment. Monitoring of cancelled 2WW appointments is also undertaken by the booking centre and contact made with them to rebook their appointment within the timescales.
- 15. Financial loss of income. Where referrals are not made through e-RS, the Trust will not be paid for this activity. During October there were 2 referrals where this could have applied. Therefore this is minimal.
- 16. Patient choice. Patients may choose to be treated at neighbouring Trusts if their waiting times are less, however conversely this might attract patients into the Trust.

Benefits

- 17. Patients will have a choice of appointment date and time and will be able to take control of their care. This should result in better patient experience and a fall in the "Did not attend" rates within the Trust, as the patient will have committed to their appointment date.
- 18. Having a digital transfer of the information will streamline the initial outpatient booking phase of patients' pathways, secure processing of clinical information and there will be an auditable trail of the referrals. This leads to a more cost efficient service.

The future

19. GP's have expressed a wish for all referrals to be made through e-RS and have provided a "wish list" of progression. Over the coming months, we will work towards moving all referrals where possible to e-RS. This will be governed by either the scheduled care board or the continuation of the e-RS programme board.

Conclusion

- 20. The project plan has been completed and the Trust declared to have switched off to paper referrals on the 31st July. Processes have been reviewed and tested to support the flow of patients to their first consultant appointment.
- 21. Any outstanding actions have been appropriately allocated to other review meetings to manage to completion.
- 22. The board is therefore recommended to note this success and approve the closure of the project.

Introduction

- 1. The Risk Assurance Meeting (RAM) has delegated responsibility for verifying, reviewing, scrutinising, monitoring and approving the Corporate Risk Register (CRR) as well as the Trust-wide Risk Register (TWRR). The changes recommended by the RAM and Patient Safety Risk Assurance Committee (PSRAC) to the CRR are set out in this report. Directors have also reviewed their risks to reflect any changes in the current risk profile. The main thrust of this report is to provide information and assurance that there are effective processes, systems, mechanisms and governance arrangements in place to robustly manage the Trust's Corporate and Trust-wide risk registers.
- 2. There are currently 11 live risks on the CRR which are shown in table 1.

Risk	Title	Current
		Score
7010	Aggregated Risk - Failure to meet internal & external financial targets in year will	20
	adversely impact the continuity of service Risk Rating	
7067	Aggregated Risk - Failure to obtain timely MH treatment impacts adversely on	15
	patient care, safety and quality	
1810	Failure to adequately manage the Emergency Capacity and Flow system.	15
5790	Aggregated risk – Failure to adequately recruit to substantive medical posts may	15
	adversely impact on patient care and finance.	
5791	Aggregated Risk - Failure to adequately recruit to substantive nursing &	15
	midwifery posts may adversely impact on patient care and finance.	
7513	Aggregated Risk - Radiology capacity issues would impact on inpatient flow,	15
	Referral to Treatment (RTT) and Patient Experience'.	
7583	Loss of facility for Level 3 Containment in pathology	15
7008	Failure to comply with the 62 day cancer waiting time.	15
7552	Risk that PACS downtime occurs and brings delay to patient pathways or delays	15
	in operating theatre activity.	
4353	Potential loss of images (OCT and FFA) if equipment should fail or be stolen	15

Risk	Title	Current Score
7330	Aggregated risk – Inability to identify, track & monitor the cohorts of women and	15
	newborns who require and have screening due to lack of an end-to-end IT	
	System for Maternity.	

3. The following new risks were discussed at the last RAM meeting on 7 December 2018 with the view of approving them for inclusion onto the CRR (table 2):

Table 2: New Risks added onto the CRR since last RAM meeting:

Risk	Title	Current Score
4353	Potential loss of images (OCT and FFA) if equipment should fail or be stolen	15
7330	Aggregated risk – Inability to identify, track & monitor the cohorts of women and newborns who require and have screening due to lack of an end-to-end IT System for Maternity.	15

Risks being presented for approval for closure:

4. No risk was presented and approved for closure.

Corporate Risk Register (Appendix 1):

5. Details of the current Corporate Risk Register could be found in appendix 1, whilst appendix 2 provides a one page representation of all risks on the CRR by showing their current score. Appendix 3 on the other hand, provides a summary of all the aggregated/linked risks on the CRR.

Conclusion

6. Members are asked to gain confidence and note the assurance provided in relation to the ongoing management of the risks on the Corporate Risk Register and to approve this report.

David Tita, Trust Risk Manager, East Lancashire Hospitals NHS Trust, December, 2018

What is the Hazard:	 Changes to air pressure to resolve the air pressure fault (risk 7342) have caused rips and bubbling of the vinyl wall covering from the wall. If the wall covering integrity is damaged beyond immediate repair the CL3 facility will be put out of use. The vinyl has split on many occasions and continues to be an ongoing hazard. 		What are the risks associated with the Hazard:	 If the vinyl wall covering is damaged, the containment properties of the facility are compromised and therefor it cannot be used. Crowthorn Ltd has reassessed the remedial action undertaken by Engie Raised concern about the ongoing viability of the repairs as vinyl has ripped repeatedly and been repaired multiple occasions and is likely to continue being breached until fully refurbished. 		
What controls are in place:	 The contractor, Atlas, has been appointed by Consort and plans will be finalised between all Consort, Atlas and the Trust next week commencing 15th Oct 2018. The plan then needs approval by HSE. All things being equal the contractor should be on site in November. The works programme will take up to 50 weeks. Board Assurance Framework (BAF)

Mrs A Bosnjak-Szekeres, Associate Director of Corporate Governance/Company Secretary

Executive sponsor Dr D Riley, Medical Director

Summary: The Executive Directors have revised the BAF and examined the controls and assurances, together with any gaps, to establish whether they have changed. Since the last report to the Board, the BAF risks have been cross-referenced with the risks on the Corporate Risk Register (CRR) and this is indicated in the CRR report to the Board.

The Audit Committee carried out an in-depth review of risks 2 and 5 as part of its annual review of the BAF. The Finance and Performance Committee received the BAF and revised the risks within its remit at its meeting held on 26 November 2018. The Quality Committee reviewed the BAF risks on 21 November 2018.

Recommendation: The Board is asked to discuss the revised BAF, including the controls, potential sources of assurance, gaps and actions to address and mitigate these and approve the document.

Report linkages

Related strategic aim and corporate objective	Put safety and quality at the heart of everything we do Invest in and develop our workforce									
	Work with key stakeholders to develop effective partnerships									
	Encourage innovation and pathway reform, and delive best practice									
Impact										
Legal	No	Financial	No							
Equality	No	Confidentiality	No							
Previously considered by: Quality Committee (November 20)18)									
Audit Committee, Executive Direc	ctors (Octo	ber 2018)								
Finance and Performance Comm	ittee (Nove	ember 2018)								
Operational Delivery Board (Nove	ember 201a	8)								

- 1. The Board Assurance Framework (BAF) brings together in one document all of the relevant information on the risks to the Trust's strategic objectives. By regularly reviewing it, the Trust is in a position to identify whether the BAF remains fit for purpose and whether it provides the Board with real confidence that it is having a thorough oversight of the strategic risks.
- 2. The effective application of assurance processes in producing and maintaining the BAF is enabling the Board to consider the process of securing the necessary assurance using formal procedures that promote good governance and accountability, whilst gaining a clear and comprehensive understanding of the risks faced by the Trust in pursuing its strategic objectives.
- 3. The BAF informs the Board about the types of assurance currently obtained, so consideration can be given whether they are effective and efficient and enables the Board to identify areas where the existing controls might be failing and the risks that are more likely to occur as a consequence. The BAF also gives the Board the ability to better focus the existing assurance resources.
- 4. As requested at the Trust Board meeting in November 2018 the potential sources of assurance sections of each risk have been updated to indicate whether the source of assurance is an internal or external source.
- 5. Following the last review, the Board is asked to discuss and approve the proposed changes to the BAF and the risk scores set out below:

Risk 1: Transformation schemes fail to deliver the clinical strategy, benefits and improvements (safe, efficient and sustainable care and services) and the organisation's corporate objectives.

- 6. There is a **proposed increase to the risk score**, from **16 to 20** based on the increased likelihood of the risk materialising (likelihood **5** x consequence **4**).
- 7. The following key controls have been included:
 - a) The Trust has developed an executive overview group as recommended which started during November 2018. This meeting will take place every two weeks with oversight being visible through an Executive Leadership Wall.
- 8. The Potential Sources of Assurance section has been updated to include the introduction of the Financial Assurance Board (FAB) which will strengthen governance and oversight.
- 9. The actions planned and updates have been revised to include:

- a) The transformation programme is working with the Pennine Lancashire Partnership Delivery Group to agree the strategic goals for the system to ensure that transformation plans are aligned to these in future and to ensure that ELHT business plans are also aligned. The business planning round for 2019/20 will be improved in respect of alignment and prioritisation. The first event was held on 4 December 2018. The outcomes of the planning day will inform the Value Stream Analysis (VSA) programme for 2019/20.
- b) There will be an increased systematic view of benchmarking information to support change.
- c) A Transformation and Improvement Practitioner is being appointed for Pennine Lancashire/ELHT. The associated training programme commenced.
- 10. The following action has now been completed and moved to the potential sources of assurance column:
 - a) Revised Performance Assurance Framework was presented to the Finance and Performance Committee on 29 October 2018 and to the Operational Delivery Board on 31 October. The final version was presented to the Finance and Performance Committee on 26 November 2018

Risk 2: Recruitment and workforce planning fail to deliver the Trust objectives

- 11. The **risk score remains 12** (likelihood 3 x consequence 4).
- 12. The potential sources of assurance have been updated to include:
 - a) Further scrutiny has been added to the Medical and Non-Medical Agency Group in relation to nursing staff.
 - b) Implementation of Allocate rostering and publication dates for rosters
- 13. Actions and updates have been updated as follows:
 - a) "The Culture and Leadership programme update report was presented at Trust Board in March and a Culture and Leadership Programme presentation took place at the Pennine Lancashire Workforce Group in April. The Culture and Leadership Change Team have met on a number of occasions and stage 1 (diagnostics) of the programme is due to close in September with a presentation to Board on the 12 September" has been removed and replaced with: Culture and Leadership Programme is now entering phase 2 (Design) and an update will be presented to the Trust Board on 9 January 2019.
 - b) "Work continues with Diversity by Design to pilot joint selection process. 2018/19 plan to review the Trust Equality and Diversity Strategy and to develop plans to

Page 3 of 6 Retain 30 years Destroy in conjunction with National Archive Instructions

address issues related to all protected characteristics. The national WRES lead is visiting the Trust on the 8th October and arrangements are being made for this equality and diversity event" has been replaced with: The national WRES lead attended the Trust in October 2018 and following this, a refreshed WRES action plan will be produced. A broader Workforce Transformation Group will be established from February 2019 to consider the wider diversity agenda.

- c) Funding has been secured from the NHS North West Leadership Academy (NWLA) to deliver a shadow Board programme aimed at improving opportunities to manage talent for greater diversity at sub-Board and Board level.
- d) Vital signs improvement programme is underway to improve employee experience from recruitment to leaving the organisation.

Risk 3: Lack of effective engagement within the partnership organisations of the Integrated Care System (ICS) for Lancashire and South Cumbria and the Integrated Care Partnership (ICP) for Pennine Lancashire results in a reduced ability to improve the health and wellbeing of our communities.

- 14. The **risk score remains 12** (likelihood 3 x consequence 4).
- 15. The key controls section has been updated to include:
 - a) ICS level Planning Group has been formed and met for the first time on 3 December 2018. The Director of Service Development attends to represent the ICP. The role of the group is around the 5 year plan which is due to be developed by summer 2019.
- 16. The potential sources of assurance have been reviewed and the following points have been included:
 - a) The Trust is producing an ELHT demand and capacity plan to be signed off by the Executive Team. The wider system demand and capacity plan will be signed off by the Partnership Delivery Group.
 - b) The Pennine Lancashire Partnership Delivery Group is the engine/delivery room for the ICP. The group has been given delegated authority from the Pennine Lancashire Leaders Forum. The planning process is driven through this group. The Pennine Lancashire system planning reports into the Partnership Delivery Group.
- 17. The actions planned and updates section had been reviewed and now includes the following updates:

- a) Meetings are ongoing regarding the acute programme and more focused work will take place on the four priority areas: Stroke; Vascular; Head and Neck; and Diagnostics.
- b) Ongoing progress is being made with more focus on the future model of care (not the current model of care). An update will be provided at the Finance and Performance Committee in January 2019.
- c) The model (stage 1) had been signed and providers are working on the detail (stage 2). A timetable has been produced, presented to local commissioners and approved by them (1 year plan). Milestones have been developed and a financial exercise has been undertaken to determine the resources required to implement the new model.
- d) A Planning Group has been formed and a demand and capacity exercise will be completed by 14 January 2019,

Risk 4: The Trust fails to achieve a sustainable financial position and appropriate financial risk rating in line with the Single Oversight Framework

- 18. The **risk score remains at 20** (likelihood 5 x consequence 4).
- 19. The potential sources of assurance section now includes:
 - a) The following item has been moved to the potential sources of assurance column:
 - Revised Performance Accountability Framework presented to the Finance and Performance Committee on 29 October 2018 and to the Operational Delivery Board on the 31 October 2018, with final approval by the Finance and Performance Committee at the end of November.
 - b) The introduction of the Financial Assurance Board (FAB) will strengthen governance and oversight.

Risk 5: The Trust fails to earn significant autonomy and maintain a positive reputational standing as a result of failure to fulfil regulatory requirements

- 20. The **risk score remains 16** (likelihood 4 x consequence 4.
- 21. Potential sources of assurance have been updated to include:
 - a) Internal Audit (MIAA) have carried out an emergency care risk assessment audit which gained an assurance rating of 'Significant Assurance' in November 2018.

- b) The Performance Assurance Framework Revised document presented to the Finance and Performance Committee and Operational Delivery Board at the end of October, with final approval at the end of November.
- 22. Gaps in control have been updated to include:
 - a) Insufficient bed capacity to ensure there are no delays from decision to point of admission.
 - b) The heating system failure at Accrington Victoria Community Hospital necessitated a temporary cessation of patients to Ward 2 results in a loss of 19 beds.
- 23. The gaps in assurance section has been updated to include:
 - a) Temporary funding secured for an additional member of staff enabling the Nursing Assessment Performance Framework (NAPF) team to carry out further assessments.
- 24. The actions have been updated to include the following:
 - a) The Patient Participation Panel held an open day on 13 December 2018. The launch of the panel will take place in January 2019 and will initially be made up of 15-20 people.
 - b) There have been updates to the section relating to the emergency care pathway, including:
 - i. Ambulatory Care Emergency Unit opened as planned on 14 September 2018. Fortnightly service reviews carried out to ensure service delivery as expected.
 - Business case approved by the Trust Board and submitted to NHSI in July 2018 for the extended acute medical facility. Still no formal response from NHSI received.
 - iii. Frailty Assessment Unit due to open on 7 January 2019.
 - c) The system wide action plan for mental health services has been agreed by the ICS in November.
 - d) Develop escalation facilities in Victoria wing at BGTH by October 2018, convert ward C3 to allow use as a decant ward in the next financial year (after Easter 2019). Escalation ward in Victoria wing in Burnley due to open on 15 November 2018. The 24 bed unit opened in November 2018.
 - e) Received the draft CQC report for factual accuracy checks in late November with the final report awaited.

Angela Bosnjak-Szekeres, Associate Director of Corporate Governance, 31 December 2018.

 Page 94 of 240

Our Strategic Objectives

- 1 Put safety at the heart of everything we do
- 2 Invest in and develop our workforce
- 3 Work with key stakeholders to develop effective partnerships
- 4 Encourage innovation and pathway reform and deliver best practice

Page 95 of 240

Responsible Director(s): Director of Finance and Medical Director

Aligned to Strategic Objectives: 1, 2, 3 and 4.

Strategic Risk: Transformation schemes fail to deliver their anticipated benefits, thereby impeding the Trust's ability to deliver safe personal and effective care.

Consequences of the Risk Materialising:

1. Ability to deliver against the constitutional standards and organisational delivery would be adversely affected

2. Mismatch between demand and capacity will result in inability to balance elective versus emergency care

3. Inability to provide financial assurance to the Board

4. Reduced ability to integrate primary and secondary care

5. Reduced ability to have the right workforce planning

Responsible Director(s): Chief Executive, Director of Finance, Director of Service Development and Medical Director

Aligned to Strategic Objectives: 3 and 4

Strategic Risk: Lack of effective engagement within the partnership organisations of the Integrated care System (ICS) for Lancashire and South Cumbria and the Integrated Care Partnership (ICP) for Pennine Lancashire results in a reduced ability to improve the health and wellbeing of our communities.

Consequences of the Risk Materialising: 1. Failure to engage leadership and wider stakeholder groups

2. Failure to secure key services for Pennine Lancashire.

Failure to maximise our potential as a provider of key specialist services (Stroke etc.) across the STP footprint.

A play in the speed of implementing integrated solutions and planning public engagement due to less effective partnerships.
 Capability and capacity to deliver their component of the partnership working and deliver their own statutory obligations could cause a transfer of risks from partners to the Trust.

Part 1: Overview of Serious Incidents Requiring Investigations (SIRI) reported since last Board report

Strategic executive information system (STEIS) – SIRIs reported in October and November 2018

1. There have been 19 serious incidents requiring investigation which have been reported through Strategic Executive Information System (STEIS). Each incident has had a rapid review undertaken and a copy has been sent to the commissioner and regulatory bodies. The Associate Director of Quality and Safety has commissioned a root cause analysis investigation for each incident and on completion these will be presented to the serious investigation requiring investigation (SIRI) panel. The table on the following pages provides details of these incidents:

	elR	Division	Incident reported	Reported to STEIS	Category/Allegation	Relevant to Duty of candour	Rapid Review received	Any immediate changes initiated	Level of harm	Next steps
1	1152 939	FC	01/10/18	09/10/18	Screening incident	N	11/10/18	The process has been mapped using information provided by the screening team midwife. Records and databases have been reviewed. Trust guidelines have been reviewed.	Low / Minor	RCA to SIRI

Nb: The incidents where there has been a delay in reporting to STEIS is either due to:

- 1. Awaiting rapid review to determine the level of harm
- 2. Incident not thought to be STEIS but then on presentation to DSIRG panel agreed for this to be escalated to STEIS.

Part 2: Overview of Divisional Serious Incident Reporting Groups (DSIRG) reported since last Board report

Non-strategic executive information system – serious incidents requiring investigations reported in October and November 2018:

2. There were 12 non-strategic executive information system incidents deemed to be serious incidents requiring investigation. A rapid review has been undertaken where further information was required and duty of candour completed on all moderate and above incidents in line with trust policy. A full root cause analysis investigations have been requested and once complete will be presented to each divisional serious investigation review group (DSIRG) panel.

Duty of Candour

- 3. Duty of candour is a legal and regulatory requirement following the visit from CQC and reviewed at its Well Led Framework. The Trust has put measures in place for the delivery of duty of candour and education has been delivered. A daily duty of candour report is sent out to divisional Quality and Safety Teams for assurance and to monitor compliance.
- 4. Of the above reported incidents Duty of candour has been delivered within the timescale apart from the below:-

Ref	Division	Incident date reported	Duty of candour commenced	Duty of candour completed	Breach mitigation
1154121	DCS/ICG	23/10/2018	24/10/2018	12/12/2018	Incident was reported when a complaint letter came through and investigation initiated. DoC letter sent and uploaded to Datix 12/12/2018 – 26 days breach Daily updates with DCS as to who is serving DoC due to confusion caused with the incident being cross divisional. Meeting held with DCS, Deputy Medical Director and Patient Safety Manager to discuss and agree a process when an incident is identified as cross divisional and who is to serve the duty of candour.
1153476	DCS/SAS	10/10/2018	16/10/2018	03/12/2018	Verbal apology given in clinic on 09/10/2018 this is not evident within the case notes, , letter sent 28/11/2018 and uploaded to Datix 03/12/2018, 24 days breach. Daily updates with DCS as to who is serving DoC due confusion caused with the incident being cross divisional. Meeting held with DCS, Deputy Medical Director and Patient Safety Manager to discuss and agree a process when an incident is cross divisional and who is to serve the duty of candour
1154088	ICG	22/10/2018	29/10/2018	13/11/2018	Consultant tried to contact next of kin to discuss to no avail, letter sent on 13/11/2018 - 1 day breach.

East Lancashire Hospitals

Executive summary

- 1. The purpose of this annual report is to provide assurance of compliance against a number of national standards and compliance frameworks for equality, diversity and inclusion (ED&I).
- 2. The report highlights areas of progress over the past year as well as acknowledging challenges for the future.

Background - Our legal duties

- The Trust is required to provide assurance of delivery against a number of national standards and compliance frameworks for equality, diversity and inclusion (ED&I). These include:
 - The Equality Act (2010)
 - The NHS Constitution
 - The Public Sector Equality Duty (PSED)
 - The NHS Equality Delivery System (EDS2)
 - The Workforce Race Equality Standard (WRES)
 - The Workforce Disability Equality Standard (WDES)
 - Sexual Orientation Monitoring Standard (SOMS)
 - The Accessible Information Standards (AIS)
- 4. The Equality Act 2010 has brought with it a new legal public sector equality duty (PSED) requiring public bodies to declare their compliance with the duty on an annual basis. This means that ELHT must show compliance with both the *general and specific duties* of the Public Sector Equality Duty. For the general duty showing how we have due regard to the need to:
 - Eliminate unlawful discrimination, harassment, victimisation and any other conduct prohibited by the Equality Act 2010
 - Advance equality of opportunity between people who share a protected characteristic and people who do not share it
 - Foster good relations between people who share a protected characteristic and people who do not share it.
- 5. Protected characteristics in the context of the Public Sector Equality Duty are defined as:
 - Age
 - Disability

 Safe
 Personal
 Effective

 East Lancashire Hospitals

- Gender Re-assignment / Transgender
- Marriage and civil partnership
- Pregnancy and maternity
- Race this includes ethnic or national origins, colour or nationality
- Religion or belief
- Sex (gender)
- Sexual orientation
- 6. For the specific duty ELHT must:
 - Publish information to demonstrate compliance with the general duty
 - Publish data on the make-up of the workforce
 - Publish data on those affected by ELHT policies and procedures
 - Publish one or more equality objectives

Introduction

- 7. Since 2015 all NHS organisations have been required to demonstrate how they are addressing race equality issues in a range of staffing areas through the *Workforce Race Equality Standard (WRES)*.
- 8. Recent research has demonstrated that the treatment and experience of Black Minority Ethnic staff (BME) within the NHS is significantly worse, on average, than that of NHS white staff. The publication of the *Snowy White Peaks of the NHS (2014)* indicated that Black Minority Ethnic staff (BME) staff were absent from leadership or senior positions of many organisations even where the workforce had substantial numbers of Black Minority Ethnic staff (BME) staff and where the organisation provided services to communities with large number of Black Minority Ethnic (BME) patients. The report also summarised research over recent years showing BAME staff were treated less favourably by every measure, including promotion, grading, discipline, bullying, and access to non-mandatory training.
- 9. We know from research West et al (2001) that: "The experience of black and minority ethnic NHS staff is a good barometer of the climate of respect and care for all within the NHS. Put simply, if black and minority ethnic staff feel engaged, motivated, valued and part of a team with a sense of belonging, patients were more likely to be satisfied with the service they received".

- 10. The Equality Delivery System (EDS2) is a toolkit which aims to help organisations improve the services they provide for their local communities and provide better working environments for all groups. There are four goals within the EDS2
 - Goal 1 Better Health Outcomes
 - Goal 2 Improved Patient Access and Experience •
 - Goal 3 A Representative & Supported Workforce •
 - Goal 4 Inclusive Leadership •
- 11. The EDS goals are divided into eighteen outcomes. For most of these outcomes, the key question is "How well do people from protected groups fare, compared with people overall?"
- 12. The EDS2 has four grading options:
 - Red Under-developed (i.e. no evidence of activity for protected groups)
 - Amber Developing (i.e. evidence of activity (often good) but not for all • protected groups)
 - Green Developed (i.e. good evidence of activity for most protected groups)
 - Purple Excelling (i.e. good evidence of activity for all protected groups).
- 13. The Accessible Information Standard (AIS) was introduced by the government in 2016 to make sure that people with a disability or sensory loss are given information in a way they can understand.

Overview/narrative to eliminate unlawful discrimination

- 14. The Trust has continued to embed its values in the organisation. All staff receive an annual values based appraisal to ensure staffs reflect on their behaviours, identifying areas for improvement in themselves and others. The past year has seen 92% of values based appraisals completed. The Trust has focused on more promotion of the values, through promotional engagement campaigns. One of these was around the Compassionate & Collective Culture and Leadership Programme and staffs from across our geographical areas were part of the Trust wide initiative which included staff who are members of Workforce Race Equality Standard (WRES) group.
- 15. The Trust launched an Anti-Bullying and Harassment Pledge in October 2016. On reflection of staff survey results, including NHS and internal surveys around bullying and harassment, the pledge has had some impact but evidence suggests this is not breaking down systemic barriers within the organisation as had been hoped. To support this, the Trust has now introduced a Resolution Policy which integrates both

Safe Effective Personal

Page 5 of 42

Retain 30 years

Page 130 of 240

the bullying and grievance policies. The policy provides a framework of informal resolution including mediation.

- 16. The Trust actively encourages raising concerns and whistleblowing via the freedom to speak up guardian and open sessions have been offered encouraging staff to talk about their experiences.
- 17. All the Trust's formal policies and procedures go through an Impact assessment.
- 18. The Trust has implemented a Workforce Race Equality Standard action plan focusing on identifying and addressing the inequalities within the Trust. The WRES data can be found on the public website at http://www.elht.nhs.uk and at Appendix 2.
- 19. The 2018 WRES data showed a significant improvement on 4 indicators between BME and non-BME staff in relation to recruitment and targeted work, narrowing the gap in relation to staff appointed following shortlisting. The Trust is now performing above the national average. Work will be needed to recognise the barriers around the 3 staff survey WRES indicators, as this is an area identified for the Trust for further improvement.
- 20. There remains some challenge for the Trust with the Workforce Race Equality Standard which has resulted in refreshing its annual action-plan to ensure that this is focused on making measurable improvements. The Trust's Workforce Race Equality Standard data and action plan can be found at Appendix 1.
- 21. The Trust has communicated the requirements of the Accessible Information Standard (AIS) widely within its services, and has provided reminders about how staff should act to consistently work with the requirements of the standard. Feedback from clients and relatives is used to improve services. Good practice is in place across Trust services thanks to input from specialists including physios, speech and language therapists and outpatients. An AIS review was carried out during April 2017 to test the effectiveness of services response to AIS to date, and to seek further best practice examples to share. Through the AIS work the Trust is working with Health Communications to send out information in alternative formats including text reminder for appointments, emails, large print, etc.
- 22. Reviewing the Equality Impact Assessment process to be more inclusive of staff, carers and service users. Identifying the positive and negative implications to changing service provision and developing a stronger quality.

Personal Effective Safe Destroy in conjunction with National Archive Instructions V:\Corporate Governance\Corporate Meetings\TRUST BOARD\2019\00 January\Part 1\Word Versions\(015) Equality Diversity Annual Report 2018 KQ.docx

23. We recognise that unconscious bias plays a part in recruitment, so through training we ensure managers and employees understand their responsibilities under the Equality Act 2010 and that fair and non-discriminatory practices are followed.

Overview/narrative to advancing equality of opportunity

- 24. The Trust's beliefs and approach to equality and diversity are described in its Equality & Diversity Strategy 2015 – 2019. The strategy can be found at www.elht.nhs.uk
- 25. The Workforce Race Equality Standard Group has been developed to support with improving the WRES metrics.
- 26. Implementation of Sexual Orientation and Gender Identity guides. This piece of work focused on disseminating new guidance for clinicians in relation to sexual orientation and gender identity.
- 27. The Trust published its gender pay gap calculations showing how large the pay gap is between their male and female employees. ELHT is committed to being an inclusive employer and to addressing inequalities in all aspects of employment. We therefore have taken positive steps via an action plan to tackle the gender pay gap.
- 28. The Trust has implemented the Accessible Information Standards.
- 29. The Trust has recently completed a data validation exercise for disabled staff with the aim of improving the completeness and robustness of monitoring data.
- 30. The Trust utilises the inclusive recruitment toolkit and matrix developed by Diversity by Design Consultancy. Its designed to support local managers reduce the inequalities experienced by staff from protected characteristics in regards to recruitment and career progression. The matrix has been identified as having a significant impact on the inequalities that minority groups can experience around career progression and recruitment.

Overview/narrative to foster good relations

- 31. Bias and prejudice are covered in unconscious bias training events for recruitment and equality and diversity.
- 32. The Trust frequently uses its communications channels to make staff aware of festivals, news or events related to protected characteristics.
- 33. In October 2018, the Trust hosted its local WRES annual workforce conference with special guest speaker Dr Habib Nagvi from NHS England. The focus was on

East Lancashire Hospitals NHS Trust

'Diversity & Leadership - and emphasised the ways the Trust can improve its approach to race equality and the retention and promotion of BME staff. The event was well attended with a number of Senior and Executive Directors who pledged to undertake more work around the WRES in their areas.

34. As part of Trust's commitment to equality and diversity, a reverse mentoring scheme has been established.

Equality Delivery System (EDS2) – grading of activity

- 35. The Trust chose to re-grade 3 outcomes graded as either 'developing' or 'excelling' in the previous grading exercise. In determining our EDS2 objectives, we reviewed local and national data, patient feedback, complaints analysis, staff survey results and aspects for service delivery that present a local challenge. It was noted that our initial proposed EDS2 objectives were very broad; they were not outcome focused from the analysis of the experience of particular protected groups and were not specifically measurable. The following EDS2 objectives are proposed for 2018/19:
 - Goal 1.3: Transitions from one service to another are made smoothly with everyone well informed
 - Goal 2.4: People's complaints about services are handled respectfully and efficiently
 - Goal 3.5: Flexible working options are available to all staff consistent with the needs of the service and the way people lead their lives
 - Goal 4.3; Middle managers and other line managers support and motivate their staff to work in culturally competent ways within a work environment free from discrimination.
- 36. Appendix 7 shows the results of those EDS2 objectives that were regraded.

Challenges & Opportunities for the coming year

37. The WRES has presented some challenges in the past year. Whilst an improvement in 4 indicators is noted, the same cannot be said for the remaining 5 indicators i.e. Board representation, staff bullying, disciplinary, discrimination and being treated fairly. For 2018, there will be further analytical work to build robust evidence around this to ensure the Trust can make the changes needed to make the process fairer and promote equality of opportunity.

Page 7 of 42 Retain 30 years Destroy in conjunction with National Archive Instructions Annual Report 2018 KQ.docx Page 132 of 240

- 38. April 2018 will see the reporting of the Sexual Orientation Information Standard and Workforce Disability Equality Standard. In addition, the publication of reporting on any Gender Pay Gap. In relation to these we need to look at effective work plans to implement and delivery targets on the above with being aware of the limitations to resources.
- 39. In relation to service provision our ongoing challenge is around monitoring of demographic data. The Trust sees significant gaps in data regarding sexual orientation, religion/belief and disability. Therefore this is an area of focus over the coming year. We also see this for employment data and actions will be set to address this.
- 40. The Trust will strengthen our governance structures by forming an Inclusion Group. This will build shared responsibility and accountability for achieving improvements by explicitly embedding equality, diversity and inclusion into the performance management of divisions.
- 41. Goal Alignment - The Trust will optimise our efforts by linking our equality, diversity and inclusion strategy to our corporate objectives. Equality, diversity and inclusion will be clearly defined as an integral part of our Trusts vision, firmly embedded and fundamental to its success. A standalone or silo approach to equality, diversity and inclusion will not be enough to create change or visible progress. We will align all of our interventions directly with the objectives of the organisation and to help us prioritise effort and show impact.
- 42. Inclusive Leadership - To make sustained diversity and inclusion progress it is imperative that we have the right level of leadership commitment and accountability at all levels within the organisation. Diversity and inclusion is 'everybody's business' and everyone in the Trust is therefore expected to take an active part. Our Board of Directors will lead by example in relation to inclusive practice and our senior leadership team will focus on operational embedding of equality, diversity and inclusion to stimulate action and commitment to behaviour change.
- 43. Awareness and Education - To foster a diverse and inclusive workplace we need to create the right levels of equality, diversity and inclusion awareness and education, focusing on *unconscious bias*. This will be a central component to engage the hearts and minds of all our staff, inspire team actions and accountability for change.
- 44. Data Driven Decision Making - We need to monitor what good looks like to ensure our interventions have an impact and report regularly to the Board of Directors.

Safe Effective Personal

Page 8 of 42 Retain 30 years Destroy in conjunction with National Archive Instructions V:\Corporate Governance\Corporate Meetings\TRUST BOARD\2019\00 January\Part 1\Word Versions\(015) Equality Diversity Annual Report 2018 KQ.docx Page 133 of 240

A data-driven approach will enable us to dispel any myths regarding our baseline (where are we now?) and track progress. We will identify a small number of metrics we feel are the most critical to ensure success and use quality improvement (QI) methodology to experiment with new ideas and interventions.

45. The Trust will use the learning from the national "Breaking Though Programme" to develop an in-house leadership development programme for minority staff in agenda for change bands 4 -7. This will support the development of a diverse talent pipeline to senior leader roles via sponsorship, mentoring and coaching.

Development of a Shadow Board

- 46. An opportunity has arisen for the Trust to take part in a strategic leadership development programme designed and funded by the Northwest Leadership Academy
- 47. The aim of the programme is to create a diverse pool of potential strategic leaders across the Trust who are able to work with the Board to shape and deliver the Trust's strategic objectives.
- 48. The programme involves the identification of potential future talent, the delivery of three one day modules and the formation of a 'Shadow Board'. Participants are also offered the opportunity to be mentored
- 49. The Shadow Board, which runs outside of the Trust's governance structures, will be chaired by the Trust chair or Non-Executive Director and discuss papers to be presented to the Trust Board.
- 50. In order to get maximum value from this development commitment is required from the Board as outlined in the paper. It is also envisaged that participants would be asked to lead/co-lead future strategic projects across the Trust.
- 51. Refer to Appendix 1 for the full Shadow Board briefing paper

Conclusion

- 52. This report has provided progress against a number of national standards and compliance frameworks whilst recognising areas for development and challenges for the organisation.
- 53. Whilst there have been a number of areas of good practice to celebrate, there remains an improvement needed around some of the more simple structures of the organisation in relation to equality monitoring, initial recruitment and also retention as

Effective Safe Personal

Page 9 of 42 Retain 30 years Destroy in conjunction with National Archive Instructions V:\Corporate Governance\Corporate Meetings\TRUST BOARD\2019\00 January\Part 1\Word Versions\(015) Equality Diversity Annual Report 2018 KQ.docx Page 134 of 240

well as increasing understanding of lived experiences and voices of staff, service users and carers in relation to different protected groups.

- 54. The EDS2 re-grading has shown that there is still action to be taken in order to get more traction in areas of service accessibility, transition from services and complaints.
- 55. In relation to staffing it is expected that programmes of work such as the NHS Equality Standards will begin to see a positive change in the experiences of staff from protected groups.
- 56. In producing this report, and the activities detailed within, it is felt there are no substantial areas where the Trust is failing in its duty to comply within the Equality Act 2010, whilst acknowledging that there are areas for improvement in raising the standard of equity for some protected groups. In July 2018 the Trust will publish a new Equality, Diversity & Inclusion Strategy for the next four years.

Recommendations

- 57. The Committee is asked to;
 - Note the areas of progress and challenges for the coming year
 - Sign off the report for publication as per legal requirement •

Appendices

- 58. Appendix 1 - shadow Board briefing for trust board

Page 10 of 42

Appendix 1 - SHADOW BOARD BRIEFING FOR TRUST BOARD

An exciting opportunity has arisen for staff in senior positions within the Trust to participate in a leadership development programme - Shadow Board, which is being funded by NHS North West Leadership Academy. The purpose of this programme is to help the Trust identify and develop its future leaders, to create a more diverse leadership pool and to provide additional input and insight into existing Trust Board issues.

Your role as Executive Director is crucial to ensuring that this development activity adds maximum value to the Trust.

Shadow Board consists of a number of elements.

- 1) Participation in three one-day modules
 - Is intended to ensure participants understand the roles of the trust board • directors, in terms of strategy, finance and statutory financial responsibilities, corporate governance in order to provide assurance and culture of the organisation ...
- 2) Attendance at and time to prepare for monthly shadow board meetings throughout the year.
- 3) Mentoring.
- 4) Contribution to projects of strategic interest/importance at a strategic level.

Maximising the investment

In order to achieve maximum return on expectation Executive Directors are asked to:

- **Identify** a number of candidates within their Directorate, typically working at Band 8b • or above who would provide diversity of thought and experience (both clinical and non-clinical) and who would benefit from the programme. Who aspire to a Board level position or equivalent in the future (it is expected that participants wouldn't just be identified through the current organisation structure).
- Fully support the development of participants from their area. This may involve • discussions around what needs to be done to enable participants to fully attend (i.e. having discussions to identify alternative arrangements to cover workload), setting expectations in terms of full commitment to attend etc.
- Support participants by having on-going and follow up discussions about their • learning
- Identify a number of strategic projects for participants to work on/lead •
- Support participants by enabling them to get involved in strategic projects identified by the Board
- Participating in the programme evaluation process

Identifying participants:

We are encouraging more applications than places as we need to encourage a diverse range of staff to participate in the programme. By diverse we don't just mean protected

characteristics but also diversity of thought and experience. So when you are thinking about the potential talent within your area please think beyond your structure and look for those who you have identified as having potential, and are (or have experience of) working at Band 8b or equivalent. We also encourage you to think about the balance in representation between clinical and non-clinical areas within your remit.

Depending on how the programme evaluates further programmes may or may not be run in the future.

Application process

Applications are by signed expression of interest and individuals are expected to evidence that they have been identified as having potential.

Benefits

- The objectives of the Shadow Board programme are: .
- To identify the top end of the talent pool within the Trust and more broadly within the • NHS.
- To support the integration of more diversity of thought and perspective into Trust • boards.
- Delivering future value to the NHS. •
- To create a pool of potential strategic leaders across the Trust who are able to work • with the board to shape and deliver the Trust's strategic objectives.
- To provide an insight into executive responsibilities and develop strategic leadership • thinking for future potential leaders.

To date a number of Trusts within the NHS have participated in this programme including; Lancashire Care NHS FT, South West Yorkshire Partnership Foundation Trust, Mid-York's NHS Foundation Trust, Harrogate and District NHS Trust and North Lincolnshire and Goole NHS Trusts. Other Trusts who are currently working on implementing this programme include Leeds and Rotherham.

Design

- The programme involves: •
- An introductory 1.5 hour event (11th April) •
- Three one day modules spread out over a number of months delivered by an • external consultant. (19th May, 22nd June and 13th July)
- The formation of a 'shadow board' which runs in parallel with the Trust Board over a • year. Members of the board are programme participants. It is chaired by either the Chair or Vice-Chair of the Trust. Terms of reference are created by participants on the programme. It considers past and/or future agenda items from Trust Board meetings.
- Mentoring opportunities for participants by non-executive directors.

It is proposed that for the first cohort potential participants are identified directly by Trust Executive Directors. 15 places are available, it is expected that more than 15 potential

Safe Effective Personal

Page 12 of 42 Retain 30 years Destroy in conjunction with National Archive Instructions V:\Corporate Governance\Corporate Meetings\TRUST BOARD\2019\00 January\Part 1\Word Versions\(015) Equality Diversity Annual Report 2018 KQ.docx Page 137 of 240

participants are identified. These individuals are then invited to an introductory session AND asked to complete an application form. The cohort is then created from those who've applied in order to maximise its diversity.

Costs of the programme:

The funding for the delivery of the three modules has come through the NHS NW Leadership Academy. There are other costs associated with the programme that the Trust will need to be aware of. These include: The cost of the time involved for each of the participants. This includes attendance at the three day modules, preparation for and participation in each of the shadow board meetings. The admin cost of setting up and running the shadow board meetings. This includes a member of admin staff attending to write the minutes.

Ensuring return on expectation:

In order to gain maximum return on expectation this programme needs the full support of the Trust Board. This support includes:

- Time and commitment of the Chair in; preparing for and running the Shadow • Boards (it is anticipated that this Board would run for at least a year). The role of the Chair of the Shadow Board is to identify each Board agenda, provide feedback to the members of the Shadow Board on the quality of the conversations as well as feeding discussions back into the Trust Board. This includes attending at least 3 Shadow Board meetings over a 12 month period.
- Time and commitment of all Non-Executive Directors to provide mentoring to • participants where required. The amount of time required would be negotiated on an individual by individual basis, but could be in the region of 3 meetings of approx. 1.5 hours over a 12 month period.
- Commitment from the Executive Directors to fully support the development of participants from their area. This may involve discussions around what needs to be done to enable participants to fully attend (i.e. having discussions to identify alternative arrangements to cover workload), setting expectations in terms of full commitment to attend etc.
- **Commitment from the Executive Directors** to identify a number of candidates (at least 15) who would provide diversity of thought and experience and who would benefit from the programme (it is expected that participants wouldn't just be identified through the current organisation structure).
- **Commitment from the Executive Directors** to identify a number of strategic • projects for participants to work on/lead – by March 2019 in the first instance.
- Commitment and involvement of the Board/Company Secretary to ensure smooth exchange of board papers to the shadow board members and briefing of 'trust board etiquette' of the trust board. Identify 'admin support' to work with provider to ensure rooms set up with PowerPoint etc. and catering organized.

Providing lasting value – learning transfer:

Page 13 of 42 Retain 30 years Destroy in conjunction with National Archive Instructions Annual Report 2018 KQ.docx Page 138 of 240

As with all development programme formats it is the process of transferring learning into the workplace that lasting value can be harnessed.

It is suggested that in order to provide lasting value to the Trust a number of strategic projects are identified which members of the shadow board would be expected to take a strategic lead on either in partnership with a member of the Trust Executive or independently.

It is also suggested that participants are strongly encouraged to create action learning sets/learning exchanges outside of the formal learning programme

WHAT YOU NEED TO DO NEXT:

	fy potential staff in your directorate – Band 8b or higher – using the 9 rid (see e/mail attachment)	Notes
Hold a to:	a discussion individually with each identified staff member BEFORE	
a)	Let them know they've been identified as having potential;	
b)	Clarify whether it's a development opportunity they are interested in;	
c)	Inform them of the commitments required (including the dates – see below);	
d)	Ask them to sign and return the expression of interest form (see below) by the deadline of 8 th March 2019 to <u>nazir.makda@elht.nhs.uk</u>	
e)	Ask them to attend the introductory event & assessment (see below)	
-	uture dates for 1:1 discussions with the individuals over the duration programme

Goal		Outcome	Grade
1	1.1	Services are commissioned, procured, designed and delivered to meet the health needs of local communities	Developing
1	1.2	Individual people's health needs are assessed and met in appropriate and effective ways	Achieving
1	1.3	Transitions from one service to another are made smoothly with everyone well informed	Developing
1	1.4	When people use services their safety is prioritised and they are free from mistakes, mistreatment and abuse	Achieving
1	1.5	Screening, vaccination and other health promotion services reach and benefit all local communities	Achieving
2	2.1	People, carers and communities can readily access hospital, community health or primary care services and should not be denied access on unreasonable grounds	Excelling
2	2.2	People are informed and supported to be as involved as they wish to be in decisions about their care	Achieving
2	2.3	People report positive experiences of the NHS	Achieving
2	2.4	People's complaints about services are handled respectfully and efficiently	Developing
3	3.1	Fair NHS recruitment and selection processes lead to a more representative workforce at all levels	Achieving
3	3.2	The NHS is committed to equal pay for work of equal value and expects employers to use equal pay audits to help fulfil their legal obligations	Undeveloped
3	3.3	Training and development opportunities are taken up and positively evaluated by all staff	Achieving
3	3.4	When at work, staff are free from abuse, harassment, bullying and violence from any source	Achieving
3	3.5	Flexible working options are available to all staff consistent with the needs of the service and the way people lead their lives	Undeveloped
3	3.6	Staff report positive experiences of their membership of the workforce	Achieving
4	4.1	Boards and senior leaders routinely demonstrate their commitment to promoting equality within and beyond their organisations.	Achieving
4	4.2	Papers that come before the Board and other major Committees identify equality-related impacts including risks, and say how these risks are to be managed.	Undeveloped
4	4.3	Middle managers and other line managers support and motivate their staff to work in culturally competent ways within a work environment free from discrimination.	Developing

Culture and Leadership Programme

Item 18

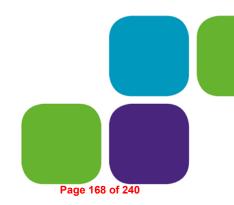

Our Culture and Leadership Programme

Phase 2- Update and Design Principle Approval

Emma Schofield, Deputy Director of HR&OD

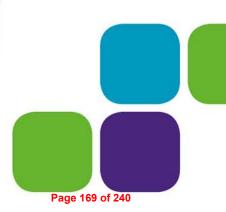

Trust Board

9 January 2019

Year 1 Focus

Leadership behaviours		Cultural elements
Facilitating shared agreement about direction, priorities and objectives	Encouraging pride, positivity and identity in the team / organisation	Vision and values Constant commitment to quality of care
Ensuring effective performance	Ensuring necessary resources are available and used well	Goals and performance Effective, efficient, high quality performance
Modelling support & compassion	Valuing diversity and fairness	Support and compassion Support, compassion & inclusion for all patients and staff
Enabling learning and innovation	Helping people to grow and lead	Learning and innovation Continuous learning, quality improvement and innovation
Building cohesive and effective team working	Building partnerships between teams, departments, and organisations	Team work Enthusiastic cooperation, team working & support within & across orgs

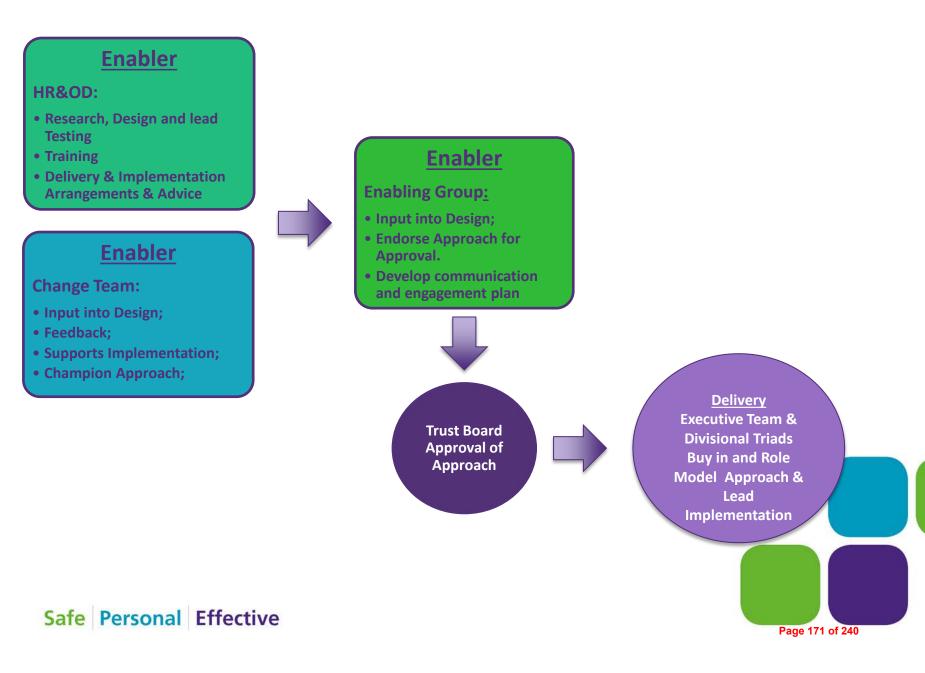

Our People Vision

- We deliver a safe, personal and effective care because we own, understand and embody our values and behaviours
- We all work together to deliver a service we are proud of each and every day to be the best we can be
- We understand what ELHT wants to achieve. We know what is expected of us because we have clear objectives and get authentic, regular feedback on our performance
- We invest in and train our managers and leaders to ensure they have the skills to lead, engage and create high performing teams.
- We are empowered individually and as teams to deliver our services and we build on our strengths and address our areas for development
- We engage with our colleagues, patients, carers and the public because we care about their experience, so that we can listen, respond and improve
- We take personal responsibility for our learning, innovation, behaviours and our decisions

Page 170 of 240

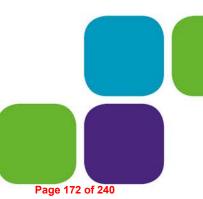

• We work together to provide safe, personal and effective care

Development of our Approaches - Approval & Implementation

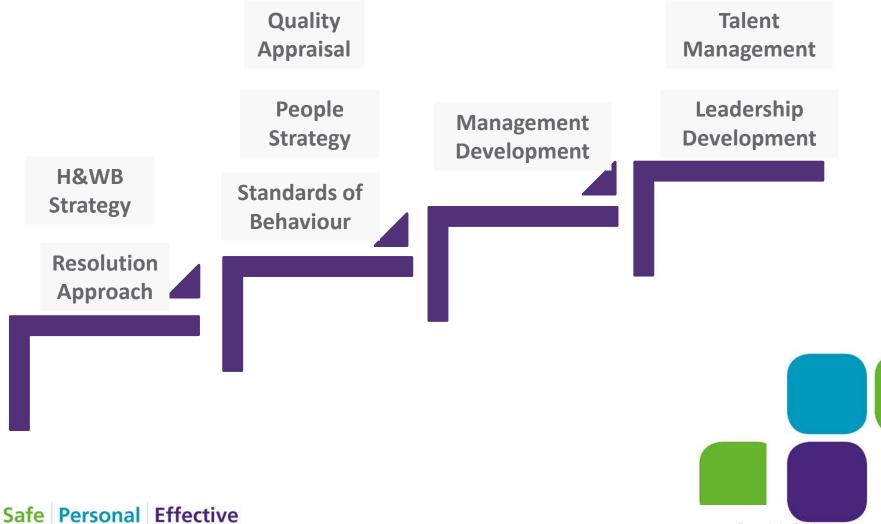

There are 8 priority areas that have emerged from the design phase for action over the next 12 months

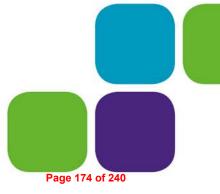

Timeline for implementation over the next 12 months

Page 173 of 240

Any Questions...

Programme Design Principles

- These principles will guide the design of our ELHT approaches (i.e. our approach to talent management):
- The C&L programme is a priority transformation programme and is part of the Executive visibility wall (A3). The CEO is sponsor to the programme. We use our continuous improvement methodology.
- Our bespoke ELHT approaches are designed to meet our needs and underpinned by research evidence and staff feedback.
- The HR &OD Team are responsible for the design of the approach, delivery of training and provision of advice to support implementation
- The Executive Team and Divisional triads are accountable for delivery, implementation and gaining buy in to the approach
- The 'Enabling Group' (chaired by the Director of Operations) is responsible for shaping and endorsing the approach. Approval will be sought via the Quality Committee and Trust Board
- The 'Change Team' and 'Engaging Managers Programme Alumni' play an important role in shaping the design, providing feedback and supporting implementation of our approaches
- The communications and engagement team support the Enabling Group to design and implement the communications plan.
- Design principles are developed for each approach (by the HR&OD Team) and endorsed by the enabling group, to describe our ELHT requirements and expected outcomes. Our approach to change will be based on an incremental progression
- Approaches are underpinned by the principles of compassionate, collective and inclusive leadership and our diagnostic findings. Our Standards of Behaviour will be integrated into our employment life cycle.
- Approaches will be designed based on customer feedback and Trust requirements and are fully documented to support consistent and lasting implementation.

TRUST BOARD REPOR	T Item	19		
9 January 2019	Purpose	Information Assurance		
Title	Integrated Performance Report (April - No	ovember 2018)		
Author	Mr M Johnson, Associate Director of Performatics	ormance and		
Executive sponsor	Mr J Bannister, Executive Director of Ope	erations		

Summary: This paper presents the corporate performance data at November 2018

Recommendation: Members of Finance are Performance Committee are requested to note the attached report for assurance.

Report linkages

Related strategic aim and corporate objective	Put safety and quality at the heart of everything we do Invest in and develop our workforce Work with key stakeholders to develop effective partnerships Encourage innovation and pathway reform, and deliver best practice
Related to key risks identified on assurance framework	Transformation schemes fail to deliver their anticipated benefits, thereby impeding the Trust's ability to deliver safe personal and effective care.
	Recruitment and workforce planning fail to deliver the Trust objectives
	Lack of effective engagement within the partnership organisations of the Integrated care System (ICS) for Lancashire and South Cumbria and the Integrated Care Partnership (ICP) for Pennine Lancashire results in a reduced ability to improve the health and wellbeing of our communities.
	The Trust fails to achieve a sustainable financial position and appropriate financial risk rating in line with the Single Oversight Framework.
	The Trust fails to earn significant autonomy and maintain a positive reputational standing as a result of failure to fulfil regulatory requirements.

Board of Directors, Update

Corporate Report

Executive Overview Summary

No never events were reported during November 2018. A total of nine incidents were reported to StEIS during the period.

Two clostridium difficile infections were detected during November, which is on trajectory for the month. Cumulative position is 21 against trust target of 27 for the year. No MRSA during November.

Nursing and midwifery staffing in November 2018 continued to be a challenge, although of note is a slight improvement in month, with 9 areas falling below an 80% average fill rate for registered nurses on day shifts as opposed to 14 areas in October.

HSMR remains 'better than expected' and the SHMI is 'as expected'.

The Emergency Care 4 hour standard remains below the 95% threshold at 80.7% (Pennine A&E Delivery Board).

The proportion of delayed discharges has improved to 3.4% which is below the 3.5% threshold. This equates to 28 beds lost per day.

The number of ambulance handovers over 30 minutes decreased during November. The HAS compliance remained above the threshold and the average handover time has decreased in November to 17:41 minutes from 19:16 minutes in October.

There were 22 mental health breaches of the 12 hour trolley wait standard in November, all as a result of waits for mental health beds within Lancashire Care Foundation Trust.

The 6wk diagnostic target was met in November at 0.3%

The number of operations cancelled on the day decreased in November and there were no breaches of the 28 day standard.

The Referral to Treatment (RTT) target was again achieved at 92.6% above the 92% standard.

There were no breaches of the 52wk standard at the end of November.

The cancer 62 day target was not met during October at 81.0%, however the GP 2 week and 31 day standards were achieved.

Sickness rates are above threshold (5.1%) and remain higher than last year (4.7%)

The vacancy rate increased to 7.8% in November and remains above threshold and

above last year (6.8%).

Compliance against the Information Governance Toolkit remains below threshold as well as Trust appraisal rates (AFC staff). All other areas of core skills training are above threshold.

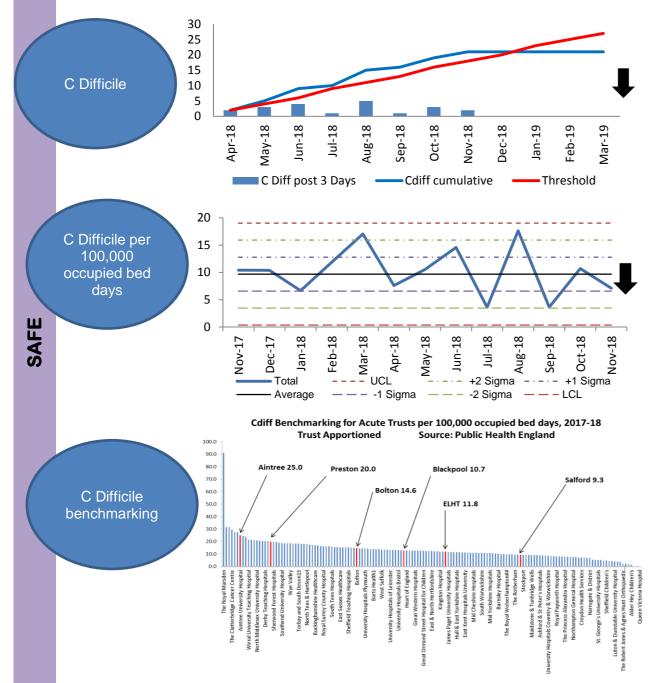

While the revised 2018-19 underlying control total for the Trust of a £15.798 million deficit has been met for the first eight months of 2018-19, with a deficit of £10.879 million reported, the current 'likely' forecast indicates a financial pressure of £3.629 million against the Trust's plan for the year as a whole. This pressure is a combination of pay pressures (agency and locum costs) and likely slippage in the release of efficiency schemes in the final two quarters. The Trust will need to mitigate this pressure in order to deliver its financial plan.

Introduction

This report presents an update on the performance for April - November 2018 and follows the NHS Improvement Single Oversight Framework. The narrative provides details on specific indicators under the five areas; Safe, Caring, Effective, Responsive, Well Led.

Page 4 of 4 Retain 30 years Destroy in conjunction with National Archive Instructions V:\Corporate Governance\Corporate Meetings\TRUST BOARD\2019\00 January\Part 1\(017) 1 IPR Front Sheet - November 18 F&P.docx Page 179 of 240

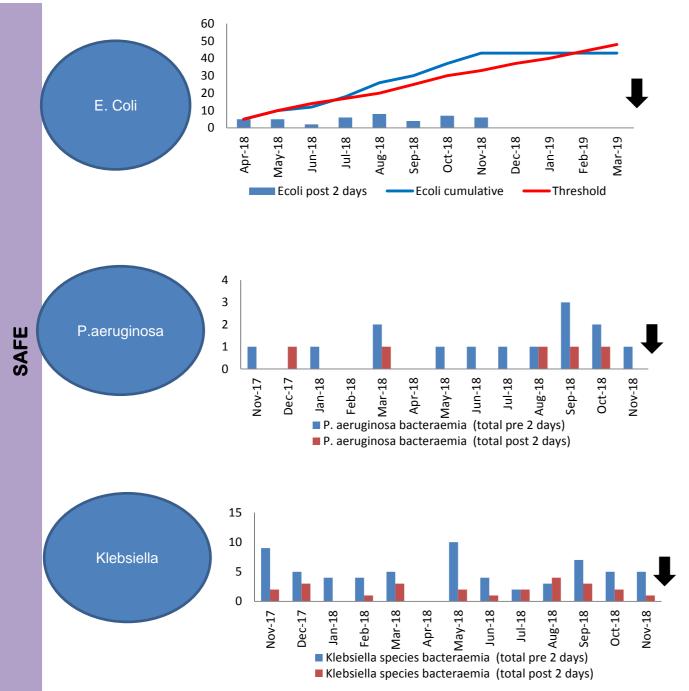

There were no post 2 day MRSA infections reported in November. Year to date there has been 1 case attributed to ELHT.

There were two Clostridium difficile toxin positive isolates identified in the laboratory in October which were post 3 days of admission.

The year to date cumulative figure is 21 against the trust target of 27. The detailed infection control report will be reviewed through the Quality Committee.

The rate of infection per 100,000 bed days decreased in November to 7.1, below average.

ELHT ranked 71st out of 151 trusts in 2017-18 with 11.8 clostridium infections per 100,000 bed days. The best performing trust had 0 and the worst performer had 91 infections per 100,000 bed days.

In response to Lord O'Neill's challenge to strengthen Infection Prevention and Control (IPC), the Secretary of State for Health has launched an important ambition to reduce Gram-negative Blood stream infections (BSIs) by 50% by 2021.

One of the first priorities is reducing E.coli BSI which account for 55% of all BSI nationally. In 2017/18, the Trust achieved the target 10% reduction.

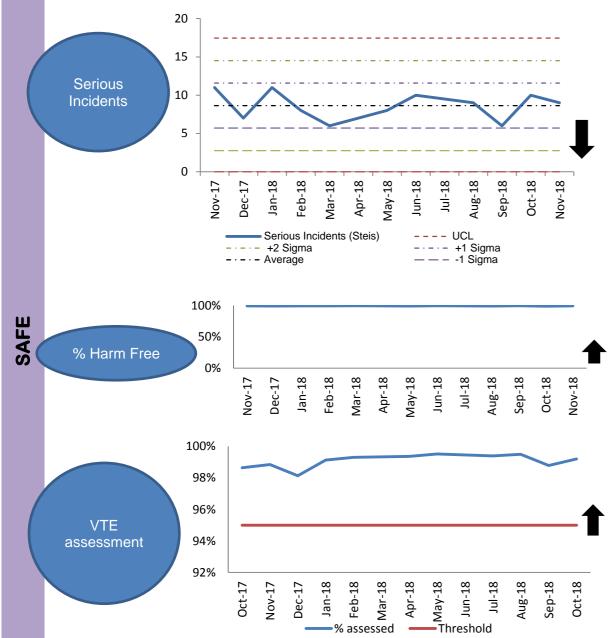

This year we should have no more than 48 E. coli bacteraemia.

There were six E.coli bacteraemia detected in November, which is above the monthly threshold.

From April 2017, NHS Trusts must report cases of bloodstream infections due to *Klebsiella species* and *Pseudomonas aeruginosa* to Public Health England.

Surveillance will be undertaken in line with current requirements (e.g. E. coli bacteraemia). This surveillance will be carried out by the Infection Prevention and Control Team.

The work on catheter care, prevention of line infections, sepsis and improving hydration will help prevent healthcare associated bloodstream infections

There were no never events reported in November.

The Trust unverified position for incidents reported to the Strategic Executive Information System (StEIS) in November was nine incidents. These incidents were categorised as follows:

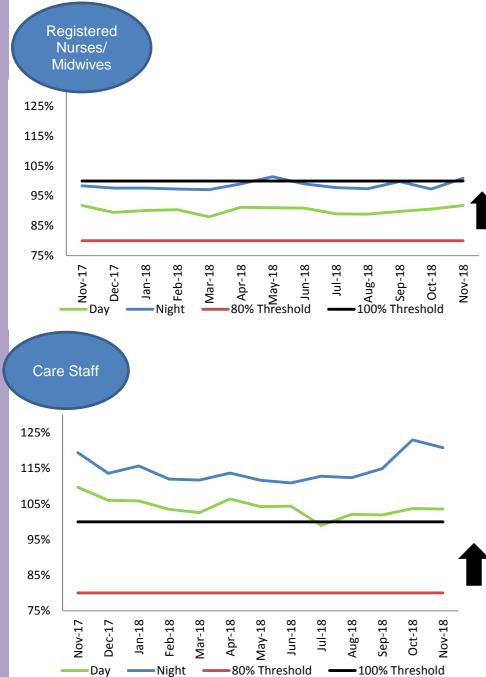

StEIS Category	No. Incidents
Treatment Delay	3
Pressure Ulcer Grade 3	2
Sub optimal care of deteriorating patient	1
Slips Trips Falls	1
Diagnostic Incident	1
Treatment problem/ issue	1

A detailed report providing assurance on the management of each of the STEIS reported incidents is submitted monthly to the Patient Safety and Risk Assurance Committee.

The Trust remains consistent with the percentage of patients with harm free care at 99.3% for November using the National safety thermometer tool.

For November we are reporting the current pressure ulcer position, pending investigation, as follows:

Pressure Ulcers	Hospital Aquired	Community Aquired
Grade 2	2	2
Grade 3	0	1
Grade 4	0	0

Nursing and midwifery staffing in November 2018 continued to be a challenge, although of note is a slight improvement in month with 9 areas falling below an 80% average fill rate for registered nurses on day shifts as opposed to 14 areas in October.

The causative factors remain as in previous months, compounded by escalation areas being opened, pressures within the emergency department, vacancies, sickness and the ability to fill all requests through ELHT internal bank or via agency. Safe care (acuity data) is utilised when considering safe staffing and the redeployment of staff and safe staffing is monitored throughout the day.

Of the 9 areas below the 80% for registered nurses on day shifts, the majority were due to lack of co-ordinator presence which is in addition to safe staffing levels, leaving 1 area of concern for registered nurses:

Ward 16 - The majority of the low fill rate was due to co-ordinator unavailability. There were a total of 9 shifts which were below previously agreed safe staffing levels. However on 8 of these occasions there were a reduced number of beds in operation and registered nurse staffing remained at a ratio of 1:8 in daylight hours.

2 areas on the day shift and 1 area for the night shift for health care support workers fell below the 80% average fill rate

Ward 2 (ACV) - was only opened for 15 days within the month of November with some beds closed within that time frame, hence the figures looking skewed.

Ward C4 – Whilst the ward only had 26% of day shifts with the agreed 4 health care support workers present, the ward has trainee nursing associates working on the ward, who are currently not counted within planned and actual staffing

It should be noted that actual and planned staffing does not denote acuity, dependency, the amount of women in labour or bed occupancy. The divisions consistently risk asses and flex staffing resources to ensure safety is maintained. Of the staffing DATIX incidents reported the divisions have given assurance that no harm has been identified as a consequence of staffing.

Average Fill Rate

			Average F	ill Rate		CH	PPD	Number of wards < 80 %						
		Day	у	Ni	ght			Da	ıy	Night				
Mon	nth	registered	Average fill rate - care	Average fill rate - registered nurses /midwives (%)	Average fill rate - care	-	Care Hours Per Patient Day (CHPPD)	registered nurses/ midwives	care staff	registered nurses/ midwives	care staff			
Nov-	-18	91.8%	103.6%	100.9%	120.8%	26,380	8.68	9	2	0	1			

Red Flag Incidents

There were 5 red flag incidents reported in November, 1 relates to the emergency department and the inability to reliably carry out intentional rounding. The division has given assurance that no harm occurred as a consequence. Three of the red flags relate to SAS (C18a, C18a, C22), 2 of them were as a result of agency staff not arriving, leaving one registered nurse for a period of time until help could be sent from other areas of the trust. One relates to a ward which was staffed to its current establishment but the staff felt the acuity was such that they should have had a second health care support worker on the night shift. This resulted in a delay answering call bells and providing basic care needs in a timely manner. The division has provided assurance that there were no harms as result of the red flag incidents.

The 5th red flag relates to the gynaecology ward and will be discussed with the Family Care section of this report

Actions taken:

• Safe staffing conference at 10 am followed up with meetings through out the day where required to ensure safe staffing, with contingencies agreed for weekends and out of hours, utilising acuity and dependency (Safe Care)

- Extra health care assistant shifts are utilised to support registered nurse gaps if required
- On going active recruitment.

• The Trust has engaged with Health Education England (HEE) to work collaboratively with the Global Learners Programme. 25 offers of employment were given initially. Between 3/10/18 and 21/11/18, <u>7</u> nurses have arrived, with the first nurse recently passing her OSCE and achieving her NMC registration. Of the original offers of employment, another 9 nurses are in regular contact with us and are expected to arrive, hopefully in the New Year. Despite everyone's best efforts, 9 nurses have disengaged with us and are not answering emails and attempts to keep in touch and the Trust will make a decision in the next couple of weeks to withdraw the offer of employment. Skype interviews are due to take place the week commencing the 17th December for a further cohort of Indian nurses and the Trust hopes to be able to offer another 20 posts (supported by finance)

• The Trust has agreed to recruit a further 20 trainee nursing associates.

Family Care

On reviewing Datix 10 incidents were reported overall as Red Flag events in Family Care Division in November.

Of these, 10 incidents reported 2 have been excluded as they related to medical staffing.

Of the remaining 8 incidents reported 5 of them occurred within Maternity Services and 1 related to the Gynaecology Ward and 2 the Paediatric Unit, all related to staffing issues.

The incidents were reported under the following category and sub-categories:

Maternity Services - 5

- 2 staffing issue staff shortage other. No harm, impact prevented.
- 1 staffing issue staff shortage midwives. No harm, impact prevented.
- 2 staffing issue staff indicated concerns. No harm, impact prevented.

3 of the above 5 incidents related to the number of Transitional Care babies being on the Postnatal Ward

Gynaecology Ward – 1

1 staffing issue- less than 2 registered nurses on a shift. No harm, impact not prevented.

Due to vacancies and sickness Gynaecology had to use agency this month to fill the shifts. There was a red flag incident this month when from 2am till 7am there was only 1 registered nurse on duty as an agency nurse did not turn up for the shift. The duty sister on the BGH site was informed and was aware to support the ward and the acuity was safe and no patients came to any harm.

Paediatric Unit – 2

- 1 staffing issue staff shortage nursing. No harm, impact prevented.
- 1 staffing issue staff shortage other. No harm, impact prevented.

No harm was caused.

There was appropriate escalation and implementation of the escalation policy when acuity and activity was high. Workload was prioritised and staff moved to the areas with the highest workload. All area leads, shift co-ordinators, Matron on Call, and Night Manager were informed of plans and communication was excellent throughout.

Maternity

Where the midwife staffing levels are not at the maximum levels, staff are rotated dependent on acuity and services diverted to other areas of maternity to maintain safety at all times. This is completed formally as part of safety huddles within a 24 hour period with interim or point prevalent huddles if required. Acuity and activity are assessed four times daily with a multi professional team being part of the safety huddles on Central Birth Suite, the huddles assess the whole picture across maternity services at ELHT and staff with relevant skills and competencies are moved accordingly to ensure safe staffing throughout the services.

Maternity

Month	Dec-17	Jan-18	Feb-18	Mar-18	Apr-18	May-18	Jun-18	Jul-18	Aug-18	Sep-18	Oct-18	Nov-18
Staffed to full Establishment	01:30.0	01:29	01:28.7	01:28.6	01:29	01:28.2	01:28.7	01:29.2	01:29	01:27	01:26	01:28
Excluding mat leave and vacancies	01:31.1		1:29.9 9.21wte on maternity leave	1:29.84	01:30	01:29.3	01:29.9	01:30.8	01:30	01:28.4	01:27.5	01:29
With gaps filled	01:30.1	01:28.3	01:28.7	01:28.5	01:28.4	01:28.5	01:28.8	01:29.4	01:29	01:27	01:26	01:28
through ELHT Midwife staff	Bank usage	Bank usage		Bank usage	Bank usage	Bank usage	Bank Usage	Bank Usage	Bank Usage	Bank Usage	Bank Usage	Bank Usage
bank	6.43 WTE	10.04 WTE		9.59 WTE	10.4 WTE	6.35 WTE	7.9 WTE	9.5 WTE	9.28 WTE	9.5 WTE	6.5WTE	5.74WTE

The staffing figures do not reflect how many women were in labour or acuity of areas. The midwife to birth ratio should be 1:28 for the period 01/10/18 - 31/03/18

NICU

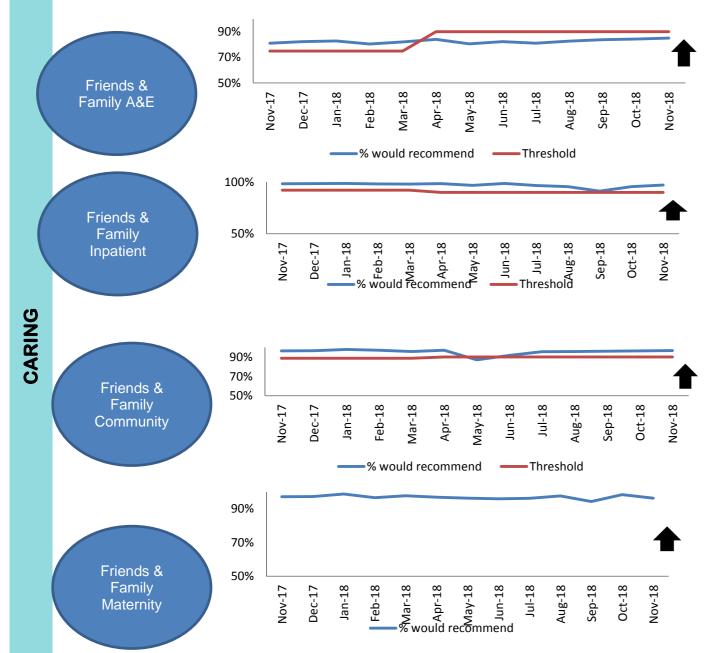

Staffing pressures in November on NICU were due to sickness approximately 7 WTE, mainly short term, over the month, combined with also high activity resulting in closure of the unit to external activity at times.

Nurse staffing levels for the acuity are monitored throughout the day and if acuity changes shift are put out to bank and agency to fill the gaps to ensure safe staffing and where necessary the unit closed to external admissions to maintain safety.

Paediatrics

Activity and acuity are closely monitored and recorded 3 times throughout the day on safe staffing.

Please see Appendix 2 for UNIFY data and nurse sensitive indicator report

These metrics reflect national measurement methodology, which measures the proportion of patients that would recommend the Trust to friends and family. The threshold has been revised to 90% from April 2018.

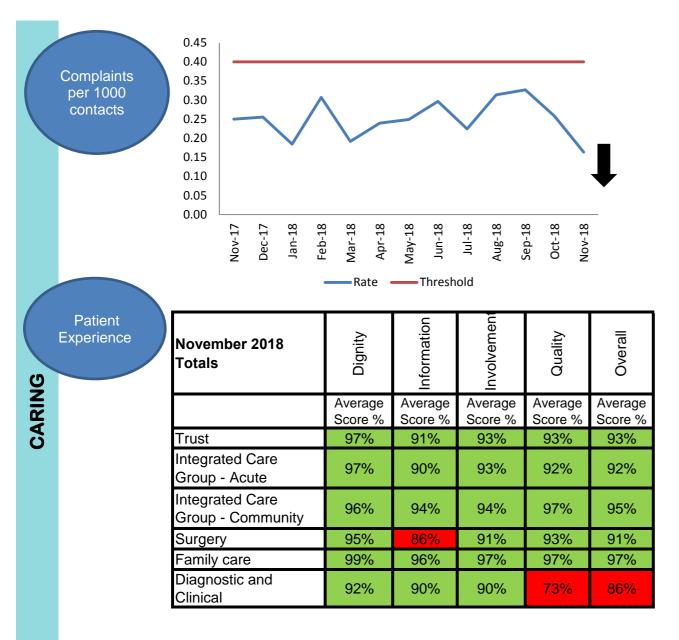

The proportion that would recommend A&E to friends and family has increased in November to 85.1% with a response rate of 20.2%

The proportion that would recommend inpatient services has improved to 97.1% in November. The response rate was 47.3%

Community services would be recommended by 96.7% in November.

Maternity services would be recommended by 96.3% in November.

Volunteer support is now available for inputting responses and matrons are alerted to areas with low response rates.

The Trust opened 20 new formal complaints in November. The number of complaints closed was 27.

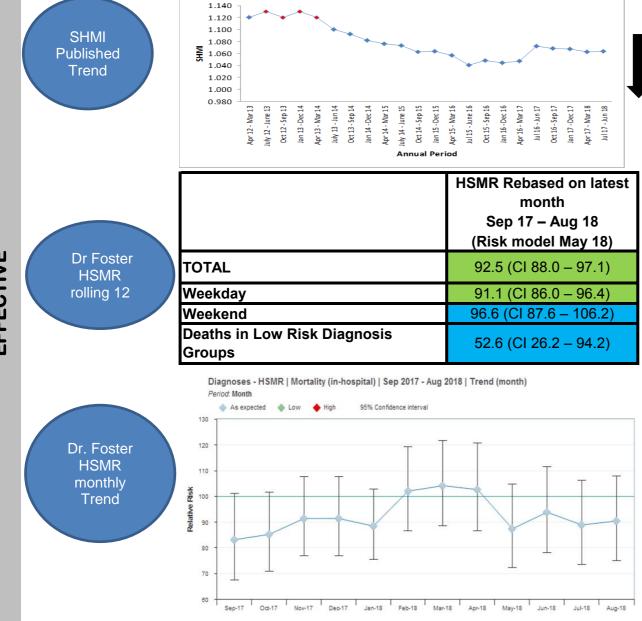

ELHT is targeted to achieve a threshold of at or less than 0.4 formal complaints per 1,000 patient contacts – made up of inpatient, outpatient and community contacts. The Trust on average has approximately 116,000 patient contacts per calendar month.

For November the number of complaints received was 0.16 Per 1,000 patient contacts.

The table demonstrates divisional performance from the range of patient experience surveys in November 2018. The threshold is a positive score of 90% or above for each of the 4 competencies.

The overall Trust performance from the range of patient experience surveys is above the threshold of 90% for all of the 4 competencies in November 2018.

Two divisional areas fell below threshold in November the Information competency in Surgical Division and the Quality competency in Diagnostic & Clinical Support.

SHMI Trend

The latest Trust SHMI value as reported by the Health and Social Care Information Centre and Care Quality Commission for the period July 17 to June 18 has remained at 1.063 and is still within expected levels, as published in November 2018.

The latest indicative 12 month rolling HSMR (September 17 – August 18) remains 'significantly better than expected' at 92.5 against the monthly rebased risk model.

The weekday HSMR is also 'significantly better than expected'

Septicaemia continues to alert on the HSMR and the SHMI.

There are currently two SHMI groups with significantly high relative risk scores. These are being investigated through the mortality steering group and each have a nominated clinical lead and an associated action plan.

Two learning disability deaths were reviewed through the Learning Disability Mortality Review Panel in July. All cases have been reported to the LeDeR National Programme. The LDMR Panel continue to meet on a monthly basis as required to review cases.

The Trust has an established mortality steering group which meets monthly to review performance and develop specific action plans for any alerting mortality groups identified.

EFFECTIVE

Structured Judgement Review Summary

The new structured judgement review process was launched at the beginning of December 2017 for deaths meeting specified criteria. A team of reviewers have been trained on how to complete SJR's and are now undertaking the monthly reviews.

The table below shows a breakdown of SJR's completed and the scores allocated. Any death allocated a SJR score of 1 or 2 will have a stage 2 SJR completed.

The stage 2 SJR reviewer will determine whether or not any lapses in care may have contributed to the death and if so a SIRI and RCA will be triggered.

	Month of Death															
Stage 1	pre Oct 17	Oct-17	Nov-17	Dec-17	Jan-18	Feb-18	Mar-18	Apr-18	May-18	Jun-18	Jul-18	Aug-18	Sep-18	Oct-18	Nov-18	TOTAL

EFFECTIVE

in 2018/19 the Trust is participating in the following 5 national CQUIN schemes as agreed with the CSU in 2017/18:

- 1. NHS Staff Health and Wellbeing
- Reducing the impact of serious infections
 Improving services for people with mental health needs who present to A & E
- Preventing ill health by risky behaviours (2018/2019 only).
 Personalised care/support planning

Clinical Effectiveness Committee will seek assurance that schemes are in progress and on track for delivery with timescales.

CQUIN S	cheme	Target	Apr-18	May-18	Jun-18	Jul-18	Aug-18	Sep-18	Oct-18	Nov-18	Dec-18	Jan-19	Feb-19 Mar-1	9 Q1	Q2	Q3	Q4

Overall performance against the ELHT Accident and Emergency four hour standard deteriorated in November to 79.5%, which remains below the 95% threshold. The performance against the Pennine A&E Delivery Board four hour standard has also deteriorated to 80.7% in November.

The number of attendances during November was 16,354 and of these 13,198 were treated and left the department within 4 hours. (Pennine A&E Delivery Board)

The national performance also deteriorated to 87.6% in November (All types) with 13 out of 134 reporting trusts with type 1 departments achieving the 95% standard.

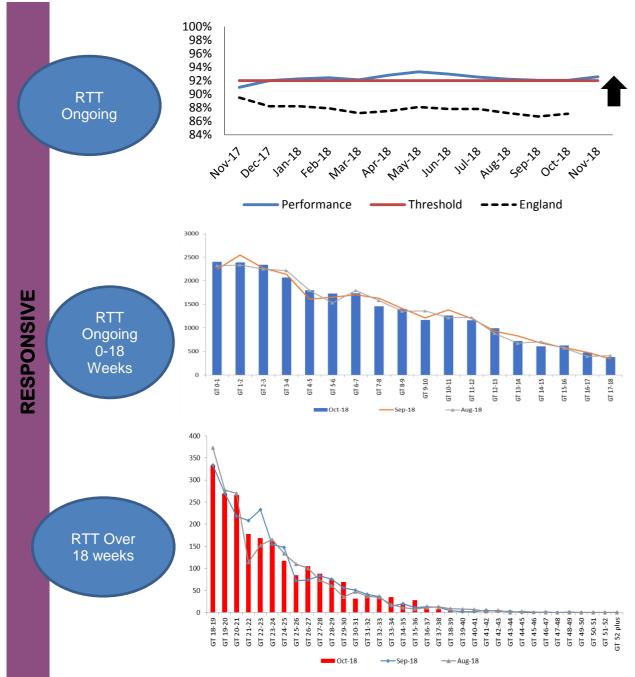

There were 22 reported breaches of the 12 hour trolley wait standard from decision to admit during November. All were mental health breaches. Rapid review timelines are completed in accordance with the NHS England Framework and a root cause analysis will be undertaken.

The number of handovers over 30 minutes decreased to 517 in November compared with 586 for October. The average handover time has decreased in November to 17:41 minutes from 19:16 minutes in October.

The validated NWAS penalty figures are reported as at October as;- 171 missing timestamps, 247 handover breaches (30-60 mins) and 49 handover breaches (>60 mins).

The ambulance handover compliance indicator measures the compliance with PIN entry on completion of patient handover. This was achieved at 95.1% in November, which is above the 90% threshold.

The full action plan is monitored through the Finance & Performance Committee & the A&E Delivery Board.

The 18 week referral to treatment (RTT) % ongoing position was achieved in November with 92.6% patients, waiting less than 18 weeks to start treatment at month end.

There were no patients waiting over 52 weeks at the end of November.

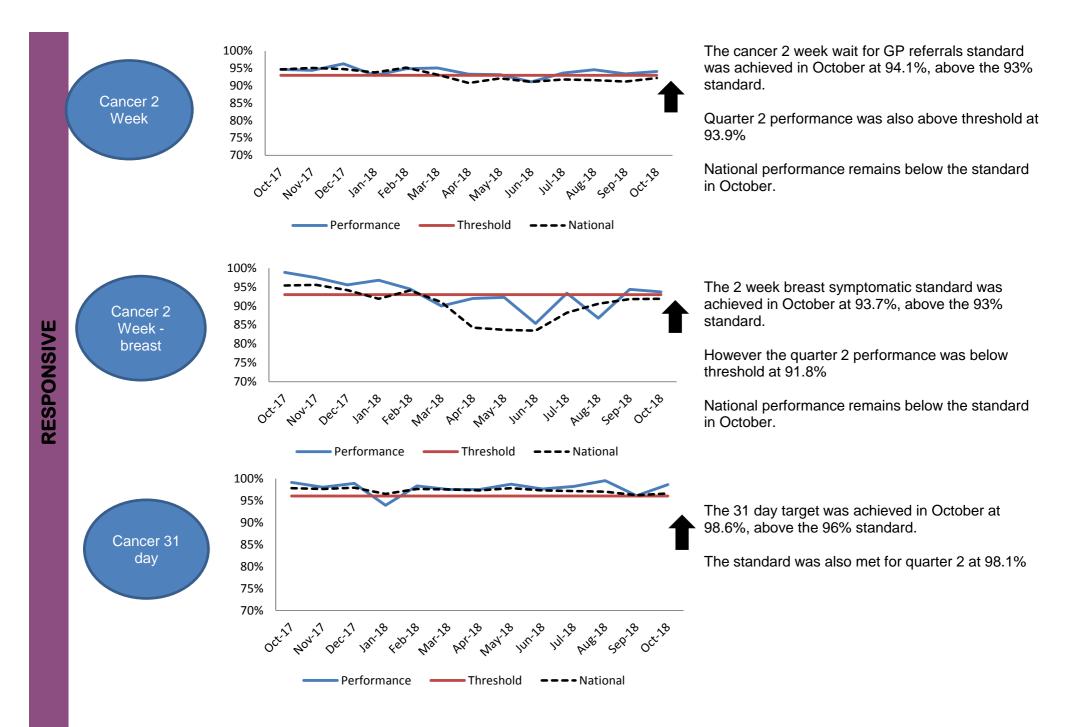

The total number of on-going pathways has reduced in November to 26,728 from 26,858 in October.

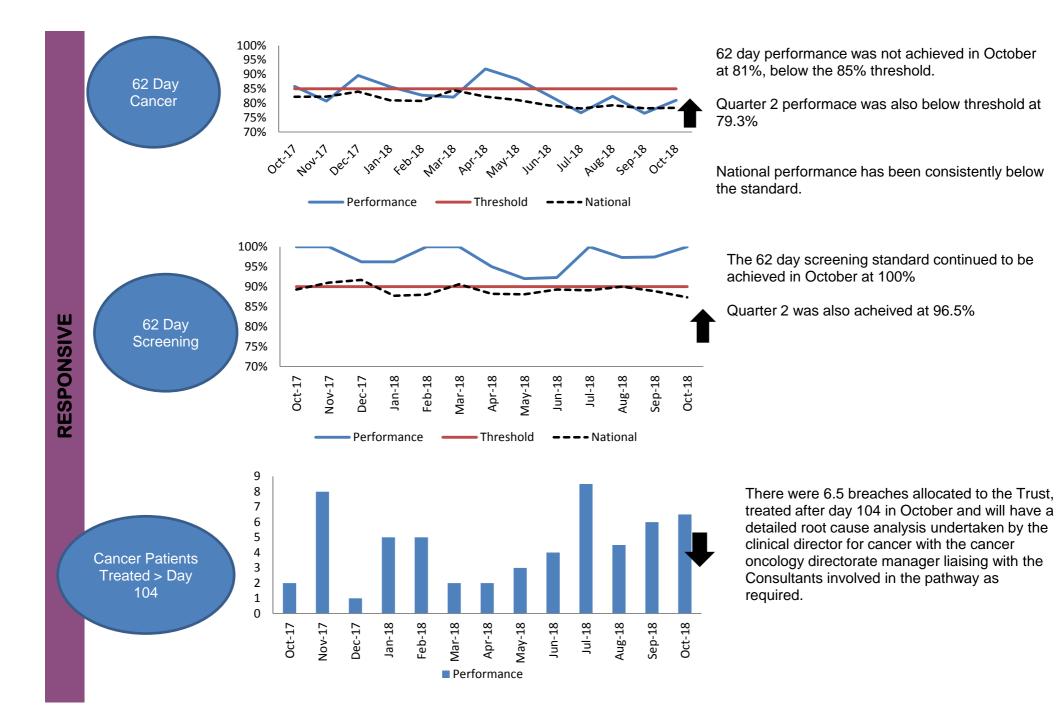

There has been a reduction in patients waiting over 18 weeks at the end of November to 1989 from 2135 in October.

The median wait has reduced to 6.4 weeks in November from 6.6 weeks in October.

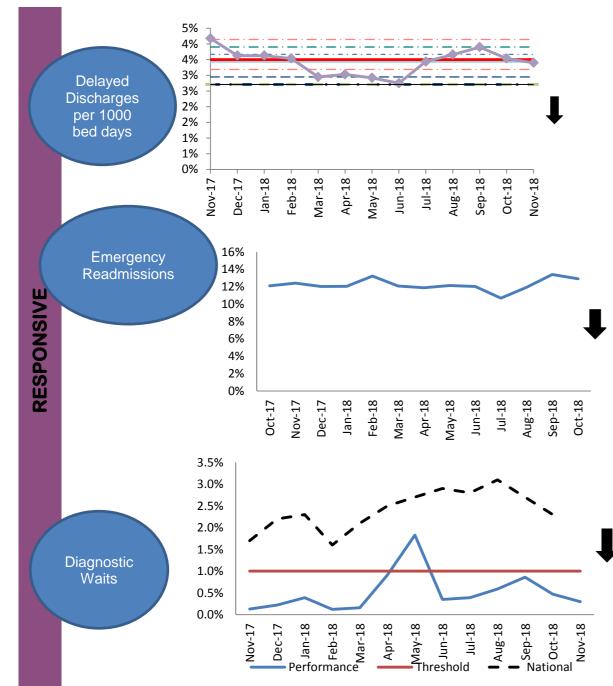

Although no longer a national target, the proportion of admitted and non-admitted patients is included on the scorecard for information.

The latest published figures from NHS England show continued failure of the ongoing standard nationally (reported 1 month behind), with 87.1% of patients waiting less than 18 weeks to start treatment in October, compared with 86.7% in September.

Page 195 of 240

The proportion of delays reported against the delayed transfers of care standard has reduced during November to 3.4% which is below the threshold of 3.5%.

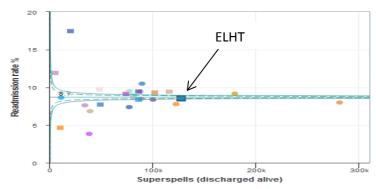

This equates to an average of 28 beds lost per day in November. The top three reasons for the bed days lost due to delayed discharge are; 'Awaiting completion of assessment' (27%), 'Awaiting further non acute NHS care' (19%), 'Patient or family choice' (14%). The achievement of this target is multifactorial, linked to complex discharge processes involving ELHT and partners.

There is a full action plan which is monitored through the Finance & Performance Committee.

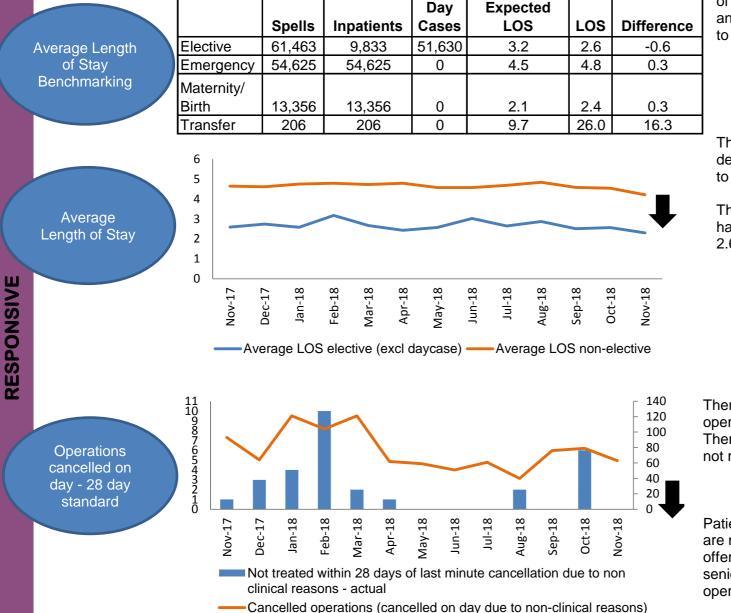

The emergency readmission rate has increased to 12.5% in October 2018 (reported 1 month behind) compared to 12.1% in October 2017.

Dr Foster benchmarking shows the ELHT readmission rate is

In November 0.3% of patients were waiting longer than 6 weeks for a diagnostic procedure, which is within the 1% threshold. Nationally, the performance is still failing the 1% target at 2.3% in October (reported 1 month behind), compared with 2.7% in September.

Dr Foster Benchmarking September 17 - August 18

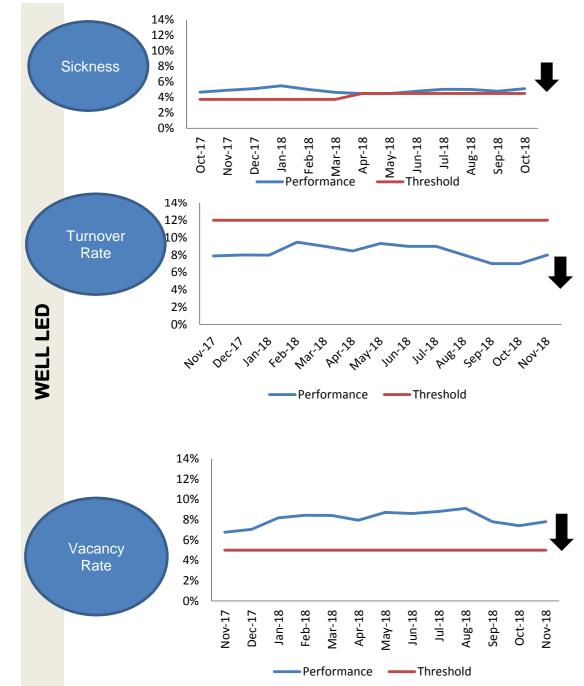

Dr Foster benchmarking shows the Trust length of stay to be above expected for non-elective and below expected for elective when compared to national case mix adjusted.

The Trust non elective average length of stay decreased to 4.2 days in November, compared to 4.5 in October.

The elective length of stay (excluding day case) has decreased to 2.3 days in November from 2.6 days in October.

There were 63 operations cancelled on the day of operation - non clinical reasons, in November. There were no 'on the day' cancelled operations not rebooked within 28 days in November.

Patients that had procedures cancelled on the day are monitored regularly to ensure dates are offered within the 28 days. Risks are escalated to senior managers and escalated at the weekly operations meeting.

The sickness absence rate has increased from 4.80% in September to 5.12% in October 2018. The current rate is higher than the previous year (4.67%).

High sickness rates are a financial risk as bank and agency expenditure increases to cover shifts. Rates are highest in Estates and Facilities and the Integrated Care Group.

A detailed action plan has been developed and a quarterly progress update will be provided to the Trust Board.

The trust turnover rate has increased to 8% in November and the vacancy rate has also increased to 7.8% in November from 7.4% in October.

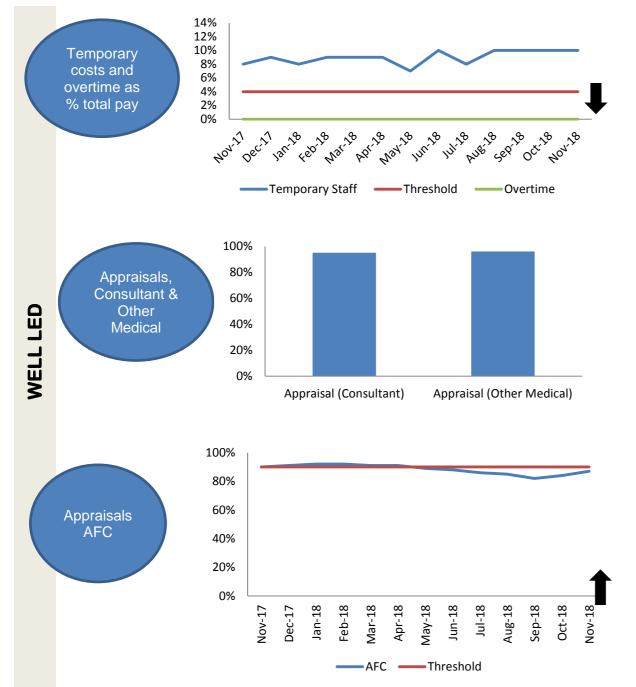

Overall the Trust is now employing 7415 FTE staff in total. This is a net increase of 17 FTE from the previous month. The number of nurses in post at November 2018 stood at 2303 FTE which is 15 less than last month and a net increase of 254 FTE since 1st April 2013.

As at 5th December 2018 there are 52 external/R&R nurses in the recruitment pipeline, scheduled to start between now and September 2019 and 40 changing posts internally. These figures include 4 overseas nurses through the HEE Global Learners Programme (GLP) who are predicted to start with the trust in January and February. This, together with the 7 already in post, will bring the total to 11 arrived in trust

The vacancy rate for nurses now stands at 10.2% (262 FTE)

As of November 2018 there are 89 FTE Medical Posts vacant of which 24 posts have been offered and awaiting pre-employment checks or confirmation of start dates to be agreed

The vacancy rates for doctors now stands at 5.56% (54 FTE).

In 2017/18 East Lancashire Hospitals NHS Trust spent £27.4m on temporary staffing for the year. (£12,832,971 agency; \pounds 14,626,488 bank).

This represented 8% of the overall pay bill. (9% 2016/17;8% 2015/16; 9% 2014/15; 8% 2013/4; 5.5% 2012/13).

In November 2018 the Trust spent \pounds 2,780,322 on bank and agency. This was more than in November 2017 (\pounds 2,296,720) and less than in October 2018 (\pounds 3,016,567).

Total expenditure to date for 2018/19 is £21,850,021. £9.3million expenditure on agency staff and £12.4million expenditure on bank staff.

At the end of November 2018 there were 628 vacancies

Wte staff worked (8,152wte) was 164.6wte more than is funded substantively (8,317wte).

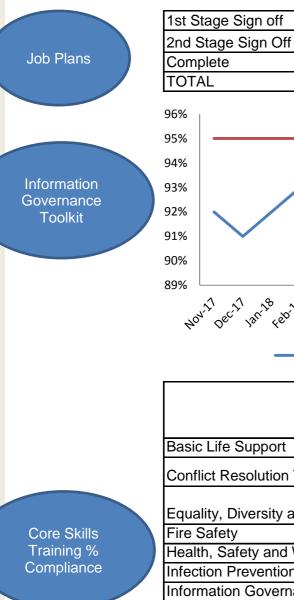

Pay costs are £754k less than budgeted establishment.

The appraisal rates for consultants and career grade doctors are reported cumulative year to date, April – November 2018 and reflect the number of reviews completed that were due in this period.

The consultant and medical staff appraisal rates are above threshold at 95% and 96% respectively.

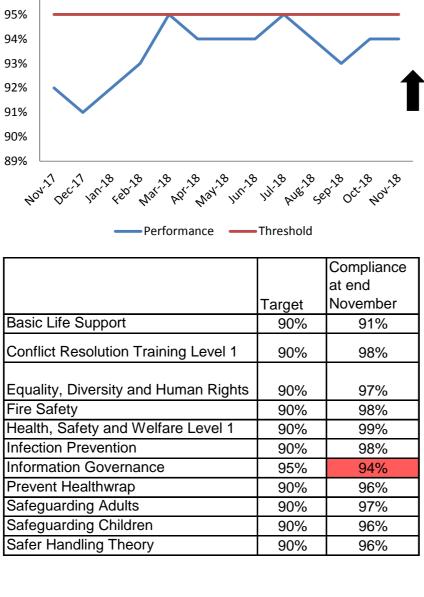

The AFC appraisal rate continues to be reported as a rolling 12 month figure and remains below threshold at 87% in November.

There has been a range of Trust wide actions to support compliance which are on-going. These actions are monitored through the Finance & Performance Committee.

All job plans with the exception of Trauma & Orthopaedics, have been reviewed, at 1st or 2nd sign off stage.

Confirm and Challenge meetings will be held with Divisional Directors during October and November 2018, to sign off job plans within their directorates, chaired by the Deputy Medical Director.

Trauma and Orthopaedics requested an extension to the job plan sign off process, due to undertaking a departmental review and have been granted authorisation to roll over existing job plans from 2017/18.

Information governance toolkit compliance has remained at 94% in November below the 95% threshold.

The core skills framework consists of eleven mandatory training subjects. Training is via a suite of e-learning modules and knowledge assessments on the learning hub (with the option of classroom training available for some subjects). The threshold has been set at 90% for all areas except Information Governance which has a threshold of 95%

Ten of the eleven areas are currently at or above threshold for training compliance rates. Information governance remains below threshold in November.

Divisional actions plans to address non-compliance are in place and are being monitored through divisional meetings. Furthermore, a range of Trust-wide measures to support staff to be fully compliant are in place. These include facilitated e-Learning sessions, bespoke training for wards and departments, cascade training and the availability of real-time compliance reporting to assist managers monitor compliance.

The Trust's underlying control total for 2018-19 is a \pounds 15.798 million deficit.

Access to a Provider Sustainability Fund (PSF) of up to £8.050 million is reliant on 30% achievement of the 4 hour target and 70% achievement of the underlying control total.

The underlying position reported to 30th November 2018 of a £10.347 million deficit is consistent with the planned financial position. The PSF allocation of £3.098 million for the year to date reduces this deficit position to £7.249 million.

The current 'likely' forecast however indicates a financial pressure of \pounds 3.629 million against the Trust's plan for 2018-19. This pressure is a combination of pay pressures (agency and locum costs) and likely slippage in the release of efficiency schemes in the final two quarters. The Trust will need to mitigate this pressure in order to deliver its financial plan.

The Safely Releasing Cost Programme (SRCP) is £18.000 million for 2018-19. £9.980 million has been identified to date, of which £5.155 million is recurrent.

The Better Payment Practice Code (BPPC) targets continue to be achieved across all four areas for the year to date.

The 'Finance and use of resources metrics score' remains at 3 for the financial year to date, with 1 being the best level of performance and 4 being in financial special measures.

The cash balance at 30th November 2018 was \pounds 10.879 million, a reduction of \pounds 7.889 million in month. As a result, an application has been submitted to draw down in January 2019 \pounds 3.750 million of the

summary report November 2018.docx Page 211 of 240

Finance and Performance Committee Update Report

At the meeting of the Finance and Performance Committee held on 26 November 2018 members considered the following matters:

- 1. The Committee received the Integrated Performance Report, including an overview of the current financial position to the end of October 2018. The members noted that there had been a decrease in the number of patients waiting in excess of 30 minutes to be handed over from the ambulance crew to the Trust and the average handover time for patients was 19 minutes and 16 seconds. Both these achievements are as a result of the work being undertaken between the Trust and North West Ambulance Services (NWAS). There were noted to have been 29 breaches of the 12 hour trolley wait standard in the reporting month, all were noted to be patients awaiting mental health assessments or beds. Members noted the increase in the number of patients having their operations cancelled on the day, with six patients falling outside the 28 day rebooking standard; there were no breaches of the 52 week standard in the reporting month of October 2018. Despite the vacancy rate falling slightly in the month, it remained above the threshold at 7.4% as did the sickness absence rate which stood at 4.8% for the same month.
- 2. Non-Executive Committee members sought further assurance from the HR team in relation to sickness absence management. The Non-Executive Committee members expressed their concerns in relation to workforce reporting and performance and it was agreed that the Chair of the Finance and Performance Committee would discuss the possible development of a Workforce Performance Committee with the Trust It was suggested that the Workforce Performance Committee could Chairman. report into the Finance and Performance Committee to gain the required levels of assurance.
- 3. The members received the financial performance report for the month of October and noted that the financial position had deteriorated by a further £1,087,000 in the month, bringing the underlying deficit positon to £9,085,000 before Provider Sustainability Funding of £2,535,000. Members noted the pay pressures and potential slippage in the release of efficiency savings in the second half of the year were risks to the year-end financial position. Mitigation plans are in place to manage and reduce these risks as much as possible. Members also received an update on the Model Hospital and Use of Resources.

- 4. In addition to the standard Sustaining Safe, Personal and Effective Care 2018/19 Report the Committee received an update on the two recent improvement events (Theatres and HR). In relation to progress against the Safely Releasing Costs Programme (SRCP), members noted that the Trust had a fully identified change programme. However, there had been some slippage in terms of delivery with £5,325,000 worth of schemes being RAG rated as red and at risk (30%) with £1,077,000 of these schemes awaiting commencement.
- 5. Committee members received the revised Performance Assurance Framework which incorporated comments received following the presentation of the document to the last meeting. following discussion the document was approved for dissemination across the Trust
- 6. The Committee received an update report on tenders; an update on bank and agency staffing; the timeframe for business planning; the Committee Specific Board Assurance Framework for review; and the minutes of the Contract and Data Quality Board for information.

Kea Ingham, Corporate Governance Manager/Assistant Company Secretary, 27 December 2018

Quality Committee Update

At the meeting of the Quality Committee held on 21 November 2018 members considered the following matters:

- 1. The Committee received an update on the falls collaborative, which has helped to achieve a 28% reduction in the number of inpatient falls (572) between its implementation in 2014 and the most recent year-end figures in 2017. Committee members noted that the plan for the next two years is to continue reviewing falls on a monthly basis; undertake quarterly compliance audits against the falls change package and reduce falls by a further 20% by the end of 2020.
- 2. The Committee received the 2018/19 winter resilience plan which is aligned to the Pennine Lancashire Winter Plan and is based on the following 'big six' schemes for winter: primary care resilience; conveyance avoidance; ambulatory emergency care unit; respiratory and frailty pathway; flow improvement programme; and discharge to assess. Members noted that the Trust has opened two sub-acute wards, giving an additional 51 beds, the most recent being ward 19 at the Burnley General Teaching Hospital site. There is a plan to increase this bed base further with the potential to open a further 24 beds in ward 20 at the Burnley site in early January 2019 if required.
- 3. The Committee received the Serious Investigations Requiring Investigation (SIRI) report that had been presented to the Trust Board earlier in November and discussed the information relating to fractured neck of femur incidents. The report also included the findings of a recently concluded external level three investigation report into the death of a patient in 2015. The report identified a number of issues, including lapses in care, leadership, record keeping, communication and protocols at the time of the incident. The Committee members received assurance that these matters had been identified by the Trust at the time and actions carried out to ensure that such issues did not happen again.
- 4. Members received an update in relation to the recent CQC inspection; the draft report had been received for accuracy checking with a completion and return date of 30 November 2018.
- 5. The Committee received the annual security report covering the year to the end of 31 March 2018. Members noted that the Trust had declared full compliance against two of the four domains (Inform and Involve; and Strategic Governance), whilst the remaining two domains were partially compliant (Prevent and Deter; and Hold to

Page 2 of 4 Retain 30 years Destroy in conjunction with National Archive Instructions (November 2018).docx Page 216 of 240

East Lancashire Hospitals

Account), with three amber and one amber categories respectively. The Committee members briefly discussed physical and non-physical assaults against staff by patients and it was noted that the most significant risk of physical assault was when staff were dealing with patients whose medical condition/treatment is a contributing factors, such as certain types of dementia.

- 6. The Committee received the Customer Relations Annual Report and noted that the Trust had received 343 new complaints within the 2017/18 year, 49 fewer than the previous year and the number of days that complaints are open has halved.
- 7. Members of the Committee received the Mental Health 12 Hour Breach Summary Report covering the period 1 June 2018 to 31 August 2018. Members noted that in the three month period a total of 105 patients have been subject to a 12 hour breach, all of which were patients with mental health needs. The average length of time spent in the department was 12 hours and 44 minutes, with three patients being in the department for in excess of 85 hours. The overall contributing factor to the reason for these breaches was determined to be a lack of bed availability; with all 105 patients breaching the wait time whilst waiting for a suitable bed to become available in the appropriate care setting. Members received an overview of the work that was taking place within the area by the Trust, social care and Lancashire Care NHS Foundation Trust (provider of mental health services) to improve access to mental health services.
- 8. The Committee also received an assurance report relating to Uro-Gynae Vaginal Mesh Implants following a letter received by Medical Directors from NHS Improvement and NHS England. The assurance report outlined the ways in which the Trust will monitor the use of vaginal mesh and review the internal guidance developed.
- 9. The Committee received the Quality Dashboard; an update report on the Nursing Assessment Performance Framework; an update on the Cancer Performance Improvement work; the Committee specific elements of the Board Assurance Framework; Corporate Risk Register; and Summary Reports from the following Sub-Committee Meetings:
 - a) Patient Safety and Risk Assurance Committee (September 2018)
 - b) Infection Prevention and Control Committee (September and October 2018)
 - c) Health and Safety Committee (October 2018)
 - d) Internal Safeguarding Board (November 2018)

- e) Patient Experience Committee (October 2018)
- f) Clinical Effectiveness Committee (October 2018)
- g) Trust Education Directorate Strategic Board (August 2018) and Annual Self-Assessment Report for Health Education England (1 August 2017 to 31 July 2018)

Trust Charitable Funds Committee Update

At the meeting of the Trust Charitable Funds Committee held on 28 October 2018 members considered the following matters and undertook to ensure actions would be taken as outlined in the report.

- 1. The Committee received an overview of the medical equipment considerations for 2018/19 and noted that a strategic approach had been undertaken when determining the list and was based on the following criteria: technology, research and service development; continuous education and quality improvement; and clinical and financial efficiencies and sustainability. The Committee members noted the planned expenditure on equipment of £1,360,000 and requested an analysis of the spending and a note on the approval process Members noted that the demand for medical equipment totalled £2,640,000. It was agreed that the Committee would target areas where equipment was not already funded via the capital plan; equipment that did not meet the value threshold to be classified as a capital asset; and new, innovative equipment that would develop the services provided.
- 2. The Committee members sought further clarification on the infection prevention and control constraints relating to incorporating donors names on equipment purchased through their donations. It was agreed that the Estates and Facilities Team will be asked to attend the next meeting to report on this matter.
- 3. The Committee members received the report of the investment manager for the period ending 30 September 2018. It was noted that the portfolio was valued at £2,067,238 and had performed relatively well in the current market conditions. Income for the period was estimated to be in the region of £69,000.
- 4. The Committee noted that there had been no requests for funds in excess of £20,000 since the last meeting.
- 5. The Committee were updated on the work of the Fundraising Manager. Within the report there was a summary of the various fundraising activities that had taken place and further events planned for the period leading up to Christmas 2018. The Committee members noted that Ms Heinicke had commenced in post as the Community Fundraiser. Members noted the work that was being undertaken to encourage local businesses to select ELHT&Me as their chosen charity. The Committee members sought a clearer reconciliation between the funds reported to have been raised by the fund raising manager and the income reported in the Fund Performance and Utilisation report.

- 6. Committee members received the draft charitable funds accounts and annual report for 2017/18 and agreed to maintain the reserves limit set in the previous year at £500,000.
- 7. The Committee received a progress report and noted that steady progress was being made against meeting the objectives set out in the strategy. Income to the charity has increased in the year and was anticipated to increase further with the expansion of the fundraising team. The Committee members were encouraged, along with the Board members to become ambassadors for the charity and its associated appeals. Members sought further information in relation to the claiming of gift aid, particularly for donations under £20.00 which will be provided at the next meeting in January 2019.
- 8. The Committee also received the Investment Performance Report; Fund Performance and Utilisation Report; and the minutes of the Staff Lottery Committee.

Declaration	15

As Chairman of the Fast Lancashire **Hospitals NHS** Trust, the sole corporate trustee of the Charity, and Chairman of the Committee we are pleased to present the Charity's Annual Report for the period to 31 March 2018.

The Charitable **Funds** Committee acts on behalf of the corporate trustee and the Annual Report is designed to give an insight into the extent of the work that has been undertaken. We would like to take this opportunity to thank those individuals who have served on the Charitable Funds Committee, which acts on behalf of the Trust, during the course of the vear and on their behalf to express our appreciation to the staff of the Trust for their dedication in caring for our local population.

Every single donor and fundraiser enables the Trust to enhance and improve the level of service it provides in so many ways. We would like to extend our sincere thanks and appreciation to everyone who has given their time and contributed throughout the year to improve the level of service the Trust is able to provide to all users.

Professor Eileen Fairhurst

Chairman East Lancashire Hospitals NHS Trust

Mr Stephen Barnes

Non-Executive Director and Chairman of the **Charitable Funds** Committee East Lancashire **Hospitals NHS Trust**

Objectives and Activities

ELHT&Me was launched in 2016 and a strategy was produced to outline the Charity aims and objectives. The strategy was updated in 2017. The aims of the strategy were to increase engagement, participation and involvement. So that ELHT&Me is well recognised by the people and business of East Lancashire as their local hospital charity. This will head to an increase of donations to allow ELHT&Me to better support the trust.

The object of the Charity is 'for any charitable purpose or purposes relating to the general or any specific purposes of the East Lancashire Hospitals NHS Trust or the purposes of the National Health Service'. The Trust, the sole corporate trustee of the Charity, provides a range of health care services, predominantly for the local population of East Lancashire of over half a million people. The main charitable activities of the Charity are to fund:

- improvements to the services provided to patients, primarily through the purchase of equipment that would be outside the NHS funding, as well as improvements to the patient environment and experience; and
- training for Trust staff and to help to develop and improve staff amenities.

During its second year the charity has been able to focus its efforts more squarely on what the role of the charity is all about. It is not to replace NHS funding but to provide those extras that will make a difference to the patients' experience. This may be through state-of-the-art medical equipment or by simple improvements to the patient environment.

In recognition to the NHS celebrating its 70th birthday, **ELHT&Me** launched its ambitious £1Million Appeal. Local businesses, institutions and individuals have been encouraged throughout the year to show their support.

Achievements and Performance

Enhanced chemotherapy chairs have improved patient experience.

Donations to our Childrens ward have provided play items and sensory equipment outside the normal NHS funding.

Grant donations for ELCAS have improved connections to young people between appointments.

The **£1 Million Appeal** is raising money for new equipment, improving facilities and enhancing the patient environment at ELHT's two acute (Royal Blackburn and Burnley General) and three community hospitals (Accrington Victoria, Clitheroe and Pendle).

All the people of Blackburn with Darwen and the rest of East Lancashire will benefit.

ELHT&Me created seven charitable funds to support the million pound appeal. This means patients, their loved ones, members of the public and staff can raise funds or make donations into an area which is important to them.

The seven areas are:

- Children and babies health
- Supporting cancer patients
- Improving equipment
- Women's health
- Men's health
- Making patient areas more friendly
- Improving the patient experience

FINANCIAL REVIEW

Page 229 of 240

Total expenditure for 2017/18 of £760,000 compares to £770,000 in the previous financial year. At £177,000, expenditure on furniture and equipment represents the largest use of charitable funds.

Other significant areas of expenditure for the Charity were the £144,000 spent on staff welfare, training and amenities and the £110,000 spent on medical and surgical equipment, which included £19,000 for ten infusion pumps and £11,300 for recliner trolleys for the new Chemotherapy Unit at Burnley General Teaching Hospital.

Total income has increased to £669,000. Significant items include a legacy of £79,700 from the estate of Margery Sherrington to support neonatal services, as well as a £51,300 donation from the Issa Foundation, which has been used to purchase medical equipment for use in the treatment of diabetes, as well as for neonatal services.

When net losses on investments of £70,000 are taken into account, fund balances have fallen by £161,000 in 2017/18 to £2,305,000, £2,180,000 of which are unrestricted.

Investment Strategy and Policy

The aim of the investment strategy is to 'invest funds so as to provide as high a current income as possible, consistent with the objective of at least preserving the income generating value of capital over the long term'. The balance of investments after taking into account the reserved funds are managed in an investment portfolio designed to provide a return in the medium to longer term. The Charitable Funds Committee is assisted in this aspect by the professional advice of an independent Investment Funds Manager.

The Charitable Funds Committee aims to turn over the majority of charitable funds, excluding specific long term legacies, once every three years.

Other expenditure	158	99
	<u>746</u>	<u>750</u>
TOTAL	760	770

Reserves Policy

The Charity derives its income mainly from donations and legacies, the level of which cannot be accurately predicted year on year.

Since the charity aims to spend the income it receives for its charitable purpose, there are a number of reasons why it needs to retain a proportion of the income it receives as reserves, which include:

- ensuring income from donations and legacies are spent in line with the donors' wishes, particularly where restrictions have been placed on its use.
- ensuring sufficient funds are available to fund planned future projects;
- for gifts of endowment where the charity has no power to treat the monies as income to fund charity related expenditure; and
- meeting current or anticipated expenses such as management, administration and governance costs, including audit costs.

For these reasons, the Charity holds reserves at a minimum level of £500,000.

Analysis of income	2017-18 £'000	2016-17 £'000

GOVERNANCE & MANAGEMENT STRUCTURE,

Page 233 of 240

The Charity which was formerly known as the East Lancashire Hospitals NHS Trust Charitable Fund and other related charities, is now known as ELHT&Me.

The Charity was created under a Trust deed executed on 28 January 2004 and constituted with East Lancashire Hospitals NHS Trust as sole corporate trustee. This deed consolidated a number of charitable funds held by the former Burnley Healthcare and Blackburn, Hyndburn and Ribble Valley Health Care NHS Trusts prior to their merger to form the East Lancashire Hospitals NHS Trust. A deed of amendment was executed on 11 July 2018 to provide clarity as to the purposes for which the charitable funds are held and to simplify the administration of the Charity.

Charitable funds received by the charity are accepted, held and administered as funds and property held on Trust for purposes relating to the health service in accordance with the National Health Service Act 1977 and the National Health Service and Community Care Act 1990.

In practice, responsibility for the monitoring and approval of activities relating to charitable fundraising and the uses to which charitable funds are applied has been delegated by the Trust Board to the Charitable Funds Committee. The terms of reference for the Committee are reviewed annually by the Trust Board and compliance with these terms of reference is also assessed on an annual basis by the Committee and reported back to the Trust Board as part of the reporting from the Charitable Funds Committee.

Membership of the Charitable Funds Committee is drawn from the Trust Board and comprises a Non-**Executive Director** Chair of the Committee, one further Non-Executive Director/Associate Non-Executive Director member, the Director of Finance (as lead director for the Committee), the Director of Nursing and the Director of Communications and Engagement.

The Associate Director of Corporate Governance/ Company Secretary, together with the Deputy Director of Finance or Financial Controller and the Fundraising Manager are normally in attendance at meetings of the Committee to provide advice and assistance. All Trust Board members are entitled to attend the meeting and have sight of the supporting documents. The Committee provides regular reports of its decisions to the formal Trust Board meetings.

There are a number of individual funds within the umbrella of the Charity, each of which has a designated funds manager with day-today responsibility for the administration of the fund, being involved in fundraising activities and decisions on how donations should be expended within the financial framework of the charity.

Director recruitment and appointment

There are different recruitment and appointment processes for the executive and Non-Executive members of the Trust Board. From 1 April 2016, NHS Improvement has had responsibility for the appointment of Non- Executive members to NHS Trust Boards on behalf of the Secretary of State for Health and Social Care. Executive members of the Board are subject to the recruitment and appointment processes of the Trust.

Trust Board Part Two Information Report

- 1. At the meeting of the Trust Board on 14 November 2018, the following matters were discussed in private:
 - a) Round Table Discussion: Lancashire and South Cumbria Integrated Care System (ICS) Memorandum of Understanding (MoU)
 - b) Round Table Discussion: Pathology Collaboration Revised Strategic Outline Case
 - c) Round Table Discussion: CQC Feedback
 - d) Sustaining Safe, Personal and Effective Care 2018/19 Update Report
 - e) Tender Update
 - f) Serious Untoward Incident Report
 - g) Doctors with Restrictions
- 2. The matters discussed were private and confidential and/or identified individuals and/or were commercially sensitive at this time and so the decision was taken that these items should not be discussed in the public domain. As these items progress, reports will be presented to Part 1 of Board Meetings at the appropriate time.

Kea Ingham, Assistant Company Secretary, 21 December 2018
